

Term sheet

To prospectus dated November 21, 2008,
prospectus supplement dated November 21, 2008 and
product supplement no. 18-A-I dated November 21, 2008

Term Sheet to

Product Supplement No. 18-A-I
Registration Statement No. 333-155535
Dated July 22, 2010; Rule 433

JPMORGAN CHASE & CO.

Structured Investments

\$

Knock-Out Buffered Return Enhanced Notes Linked to the S&P 500® Index due August 1, 2013

General

- The notes are designed for investors who seek a return of 1.30 times the appreciation of the S&P 500® Index up to a maximum total return on the notes of 45.80% at maturity. Investors should be willing to forgo interest and dividend payments, and if the Index closing level on the Observation Date is less than the Initial Index Level by more than 50%, be willing to lose most or all of their principal. **Any payment on the notes is subject to the credit risk of JPMorgan Chase & Co.**
- Senior unsecured obligations of JPMorgan Chase & Co. maturing August 1, 2013[†].
- Minimum denominations of \$1,000 and integral multiples thereof.
- The notes are expected to price on or about July 28, 2010 and are expected to settle on or about August 2, 2010[†].

Key Terms

Index:	The S&P 500® Index (the "Index")
Upside Leverage Factor:	1.30
Payment at Maturity:	If the Ending Index Level is greater than the Initial Index Level, you will receive a cash payment that provides you with a return per \$1,000 principal amount note equal to the Index Return multiplied by 1.30, subject to a Maximum Total Return on the notes of 45.80%. For example, if the Index Return is equal to or greater than approximately 35.23077%, you will receive the Maximum Total Return on the notes of 45.80%, which entitles you to a maximum payment at maturity of \$1,458 for every \$1,000 principal amount note that you hold. Accordingly, if the Index Return is positive, your payment at maturity per \$1,000 principal amount note will be calculated as follows, subject to the Maximum Total Return:

$$\$1,000 + [\$1,000 \times (\text{Index Return} \times 1.30)]$$

If the Ending Index Level is equal to or less than the Initial Index Level and **a Knock-Out Event has not occurred**, you will receive the principal amount of your notes at maturity.

If the Ending Index Level is less than the Initial Index Level and **a Knock-Out Event has occurred**, you will lose 1% of the principal amount of your notes for every 1% that the Ending Index Level is less than the Initial Index Level. Under these circumstances, your payment at maturity per \$1,000 principal amount note will be calculated as follows:

$$\$1,000 + (\$1,000 \times \text{Index Return})$$

If the Ending Index Level is less than the Initial Index Level by more than the 50% Knock-Out Buffer Amount, a Knock-Out Event has occurred and the protection provided by the 50% Knock-Out Buffer Amount will terminate and you will lose most or all of your investment at maturity.

Knock-Out Event:	A Knock-Out Event occurs if the Index closing level on the Observation Date (i.e., the Ending Index Level) is less than the Initial Index Level by more than the Knock-Out Buffer Amount. For the avoidance of doubt, the notes are subject to monitoring on a single Monitoring Day (i.e., the Observation Date).
Knock-Out Buffer Amount:	50%
Index Return:	The performance of the Index from the Initial Index Level to the Ending Index Level, calculated as follows:

$$\frac{\text{Ending Index Level} - \text{Initial Index Level}}{\text{Initial Index Level}}$$

Initial Index Level:	The Index closing level on the pricing date
Ending Index Level:	The Index closing level on the Observation Date
Observation Date:	July 29, 2013 [†] , which is also the Monitoring Day (as defined in the accompanying product supplement no. 18-A-I).
Maturity Date:	August 1, 2013 [†]
CUSIP:	48124AXK8

[†] Subject to postponement in the event of a market disruption event and as described under "Description of Notes — Payment at Maturity" in the accompanying product supplement no. 18-A-I.

Investing in the Knock-Out Buffered Return Enhanced Notes involves a number of risks. See "Risk Factors" beginning on page PS-7 of the accompanying product supplement no. 18-A-I and "Selected Risk Considerations" beginning on page TS-2 of this term sheet.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of the notes or passed upon the accuracy or the adequacy of this term sheet or the accompanying prospectus supplement and prospectus. Any representation to the contrary is a criminal offense.

	Price to Public (1)	Fees and Commissions (2)	Proceeds to Us
Per note	\$	\$	\$
Total	\$	\$	\$

- (1) The price to the public includes the estimated cost of hedging our obligations under the notes through one or more of our affiliates.
- (2) If the notes priced today, J.P. Morgan Securities Inc., which we refer to as JPMSI, acting as agent for JPMorgan Chase & Co., would receive a commission of approximately \$11.00 per \$1,000 principal amount note and would use a portion of that commission to allow selling concessions to other affiliated or unaffiliated dealers of approximately \$1.00 per \$1,000 principal amount note. This commission includes the projected profits that our affiliates expect to realize, some of which may be allowed to other unaffiliated dealers, for assuming risks inherent in hedging our obligations under the notes. The actual commission received by JPMSI may be more or less than \$11.00 and will depend on market conditions on the pricing date. In no event will the commission received by JPMSI, which includes concessions to be and other amounts that may be allowed to other dealers, exceed \$25.00 per \$1,000 principal amount note. See “Plan of Distribution” beginning on page PS-30 of the accompanying product supplement no. 18-A-I.

The agent for this offering, JPMSI, is an affiliate of ours. See “Supplemental Plan of Distribution (Conflicts of Interest)” on the last page of this term sheet.

The notes are not bank deposits and are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency, nor are they obligations of, or guaranteed by, a bank.

J.P.Morgan

July 22, 2010

Additional Terms Specific to the Notes

JPMorgan Chase & Co. has filed a registration statement (including a prospectus) with the Securities and Exchange Commission, or SEC, for the offering to which this term sheet relates. Before you invest, you should read the prospectus in that registration statement and the other documents relating to this offering that JPMorgan Chase & Co. has filed with the SEC for more complete information about JPMorgan Chase & Co. and this offering. You may get these documents without cost by visiting EDGAR on the SEC website at www.sec.gov. Alternatively, JPMorgan Chase & Co., any agent or any dealer participating in this offering will arrange to send you the prospectus, the prospectus supplement, product supplement no. 18-A-I and this term sheet if you so request by calling toll-free 866-535-9248.

You may revoke your offer to purchase the notes at any time prior to the time at which we accept such offer by notifying the applicable agent. We reserve the right to change the terms of, or reject any offer to purchase, the notes prior to their issuance. In the event of any changes to the terms of the notes, we will notify you and you will be asked to accept such changes in connection with your purchase. You may also choose to reject such changes in which case we may reject your offer to purchase.

You should read this term sheet together with the prospectus dated November 21, 2008, as supplemented by the prospectus supplement dated November 21, 2008 relating to our Series E medium-term notes of which these notes are a part, and the more detailed information contained in product supplement no. 18-A-I dated November 21, 2008. **This term sheet, together with the documents listed below, contains the terms of the notes and supersedes all other prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, fact sheets, brochures or other educational materials of ours.** You should carefully consider, among other things, the matters set forth in “Risk Factors” in the accompanying product supplement no. 18-A-I, as the notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisers before you invest in the notes.

You may access these documents on the SEC website at www.sec.gov as follows (or if such address has changed, by reviewing our filings for the relevant date on the SEC website):

- Product supplement no. 18-A-I dated November 21, 2008:
http://www.sec.gov/Archives/edgar/data/19617/000089109208005673/e33560_424b2.pdf
- Prospectus supplement dated November 21, 2008:
http://www.sec.gov/Archives/edgar/data/19617/000089109208005661/e33600_424b2.pdf
- Prospectus dated November 21, 2008:
http://www.sec.gov/Archives/edgar/data/19617/000089109208005658/e33655_424b2.pdf

Our Central Index Key, or CIK, on the SEC website is 19617. As used in this term sheet, the “Company,” “we,” “us,” or “our” refers to JPMorgan Chase & Co.

Selected Purchase Considerations

- **CAPPED APPRECIATION POTENTIAL** — The notes provide the opportunity to enhance equity returns by multiplying a positive Index Return by 1.30, up to the Maximum Total Return on the notes of 45.80%, for a maximum payment at maturity of \$1,458 per \$1,000 principal amount note. The notes may be appropriate for investors anticipating moderate appreciation in the Index during the term of the notes and those seeking to enhance returns through leverage within the specified range of performance in exchange for a Maximum Total Return. Because the notes are our senior unsecured obligations, payment of any amount at maturity is subject to our ability to pay our obligations as they become due.
- **LIMITED PROTECTION AGAINST LOSS** — We will pay you your principal back at maturity if the Ending Index Level is not less than the Initial Index Level by more than 50% (i.e., if a Knock-Out Event has not occurred). If the Ending Index Level is less than the Initial Index Level by more than 50% (i.e., if a Knock-Out Event has occurred), the protection provided by the 50% Knock-Out Buffer Amount will terminate and for every 1% that the Ending Index Level is less than the Initial Index Level, you will lose an amount equal to 1% of the principal amount of your notes. For additional clarification, please see “What Is the Total Return on the Notes at Maturity, Assuming a Range of Performances for the Index?” in this term sheet.
- **DIVERSIFICATION OF THE S&P 500® INDEX** — The return on the notes is linked to the S&P 500® Index. The S&P 500® Index consists of 500 component stocks selected to provide a performance benchmark for the U.S. equity markets. For additional information about the Index, see the information set forth under “The S&P 500® Index” in the accompanying product supplement no. 18-A-I.
- **CAPITAL GAINS TAX TREATMENT** — You should review carefully the section entitled “Certain U.S. Federal Income Tax Consequences” in the accompanying product supplement no. 18-A-I. Subject to the limitations described therein, and based on certain factual representations received from us, in the opinion of our special tax counsel, Davis Polk & Wardwell LLP, it is reasonable to treat the notes as “open transactions” for U.S.

federal income tax purposes. Assuming this characterization is respected, the gain or loss on your notes should be treated as long-term capital gain or loss if you hold your notes for more than a year, whether or not you are an initial purchaser of notes at the issue price. However, the Internal Revenue Service (the “IRS”) or a court may not respect this characterization or treatment of the notes, in which case the timing and character of any income or loss on the notes could be significantly and adversely affected. In addition, in 2007 Treasury and the IRS released a notice requesting comments on the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments, such as the notes. The notice focuses in particular on whether to require holders of these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; the relevance of factors such as the nature of the underlying property to which the instruments are linked; the degree, if any, to which income (including any mandated accruals) realized by Non-U.S. Holders should be subject to withholding tax; and whether these instruments are or should be subject to the “constructive ownership” regime, which very generally can operate to recharacterize certain long-term capital gain as ordinary income and impose an interest charge. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the notes, possibly with retroactive effect. Both U.S. and Non-U.S. Holders should consult their tax advisers regarding the U.S. federal income tax consequences of an investment in the notes, including possible alternative treatments and the issues presented by this notice. Non-U.S. Holders should also note that they may be withheld upon at a rate of up to 30% unless they have submitted a properly completed IRS Form W-8BEN or otherwise satisfied the applicable documentation requirements.

The discussion in the preceding paragraph, when read in combination with the section entitled “Certain U.S. Federal Income Tax Consequences” in the accompanying product supplement, constitutes the full opinion of Davis Polk & Wardwell LLP regarding the material U.S. federal income tax consequences of owning and disposing of notes.

Selected Risk Considerations

An investment in the notes involves significant risks. Investing in the notes is not equivalent to investing directly in the Index or any of the component securities of the Index. These risks are explained in more detail in the “Risk Factors” section of the accompanying product supplement no. 18-A-I dated November 21, 2008.

- **YOUR INVESTMENT IN THE NOTES MAY RESULT IN A LOSS** — The notes do not guarantee any return of principal. The return on the notes at maturity is linked to the performance of the Index and will depend on whether a Knock-Out Event has occurred and whether, and the extent to which, the Index Return is positive or negative. If the Ending Index Level is less than the Initial Index Level by more than the 50% Knock-Out Buffer Amount (i.e., if a Knock-Out Event has occurred), the protection provided by the 50% Knock-Out Buffer Amount will terminate and for every 1% that the Ending Index Level is less than the Initial Index Level, you will lose an amount equal to 1% of the principal amount of your notes. Under these circumstances, you could lose most or all of your principal.
- **YOUR MAXIMUM GAIN ON THE NOTES IS LIMITED TO THE MAXIMUM TOTAL RETURN** — If the Ending Index Level is greater than the Initial Index Level, for each \$1,000 principal amount note, you will receive at maturity \$1,000 plus an additional amount that will not exceed the Maximum Total Return on the notes of 45.80%, regardless of the appreciation in the Index, which may be significant.
- **CREDIT RISK OF JPMORGAN CHASE & CO.** — The notes are subject to the credit risk of JPMorgan Chase & Co. and our credit ratings and credit spreads may adversely affect the market value of the notes. Payment on the notes is dependent on JPMorgan Chase & Co.’s ability to pay the amount due on the notes at maturity, if any, and therefore your payment on the notes is subject to our credit risk and to changes in the market’s view of our creditworthiness. Any decline in our credit ratings or increase in the credit spreads charged by the market for taking our credit risk is likely to adversely affect the value of the notes.
- **POTENTIAL CONFLICTS** — We and our affiliates play a variety of roles in connection with the issuance of the notes, including acting as calculation agent and hedging our obligations under the notes. In performing these duties, the economic interests of the calculation agent and other affiliates of ours are potentially adverse to your interests as an investor in the notes. In addition, we are currently one of the companies that make up the Index. We will not have any obligation to consider your interests as a holder of the notes in taking any corporate action that might affect the value of the Index and the notes.
- **CERTAIN BUILT-IN COSTS ARE LIKELY TO AFFECT ADVERSELY THE VALUE OF THE NOTES PRIOR TO MATURITY** — While the payment at maturity described in this term sheet is based on the full principal amount of your notes, the original issue price of the notes includes the agent’s commission and the estimated cost of hedging our obligations under the notes. As a result, and as a general matter, the price, if any, at which JPMSI will be willing

to purchase notes from you in secondary market transactions, if at all, will likely be lower than the original issue price, and any sale prior to the maturity date could result in a substantial loss to you. This secondary market price will also be affected by a number of factors aside from the agent's commission and hedging costs, including those set forth under "Many Economic and Market Factors Will Impact the Value of the Notes" below.

The notes are not designed to be short-term trading instruments. Accordingly, you should be able and willing to hold your notes to maturity.

- **YOUR PROTECTION MAY TERMINATE ON THE OBSERVATION DATE** — If the Index closing level on the Observation Date (*i.e.*, the Ending Index Level) is less than the Initial Index Level by more than the 50% Knock-Out Buffer Amount, the protection provided by the 50% Knock-Out Buffer Amount will terminate and you will be fully exposed to any depreciation in the Index.
- **RISK OF KNOCK-OUT EVENT OCCURRING IS GREATER IF THE INDEX IS VOLATILE** — The likelihood of a Knock-Out Event occurring will depend in large part on the volatility of the Index — the frequency and magnitude of changes in the level of the Index. Since its inception, the Index has from time to time experienced significant volatility.
- **NO INTEREST OR DIVIDEND PAYMENTS OR VOTING RIGHTS** — As a holder of the notes, you will not receive interest payments, and you will not have voting rights or rights to receive cash dividends or other distributions or other rights that holders of securities composing the Index would have.
- **LACK OF LIQUIDITY** — The notes will not be listed on any securities exchange. JPMSI intends to offer to purchase the notes in the secondary market but is not required to do so. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the notes easily. Because other dealers are not likely to make a secondary market for the notes, the price at which you may be able to trade your notes is likely to depend on the price, if any, at which JPMSI is willing to buy the notes.
- **MANY ECONOMIC AND MARKET FACTORS WILL IMPACT THE VALUE OF THE NOTES** — In addition to the level of the Index on any day, the value of the notes will be affected by a number of economic and market factors that may either offset or magnify each other, including:
 - the expected volatility of the Index;
 - the time to maturity of the notes;
 - whether a Knock-Out Event has occurred or is expected to occur;
 - the dividend rates on the equity securities underlying the Index;
 - interest and yield rates in the market generally;
 - a variety of economic, financial, political, regulatory and judicial events; and
 - our creditworthiness, including actual or anticipated downgrades in our credit ratings.

What Is the Total Return on the Notes at Maturity, Assuming a Range of Performances for the Index?

The following table and examples illustrate the hypothetical total return at maturity on the notes. The “total return” as used in this term sheet is the number, expressed as a percentage, that results from comparing the payment at maturity per \$1,000 principal amount note to \$1,000. The hypothetical total returns set forth below assume an Initial Index Level of 1065 and reflect the Maximum Total Return on the notes of 45.80%. The hypothetical total returns set forth below are for illustrative purposes only and may not be the actual total returns applicable to a purchaser of the notes. The numbers appearing in the following table and examples have been rounded for ease of analysis.

Ending Index Level	Index Return	Note Total Return if Knock-Out Event Has Not Occurred (1)	Note Total Return if Knock-Out Event Has Occurred (2)
1917.00000	80.00000%	45.80%	N/A
1757.25000	65.00000%	45.80%	N/A
1597.50000	50.00000%	45.80%	N/A
1491.00000	40.00000%	45.80%	N/A
1440.20769	35.23077%	45.80%	N/A
1384.50000	30.00000%	39.00%	N/A
1278.00000	20.00000%	26.00%	N/A
1171.50000	10.00000%	13.00%	N/A
1118.25000	5.00000%	6.50%	N/A
1075.65000	1.00000%	1.30%	N/A
1065.00000	0.00000%	0.00%	N/A
1011.75000	-5.00000%	0.00%	N/A
958.50000	-10.00000%	0.00%	N/A
852.00000	-20.00000%	0.00%	N/A
745.50000	-30.00000%	0.00%	N/A
639.00000	-40.00000%	0.00%	N/A
532.50000	-50.00000%	0.00%	N/A
532.39350	-50.01000%	N/A	-50.01%
426.00000	-60.00000%	N/A	-60.00%
319.50000	-70.00000%	N/A	-70.00%
213.00000	-80.00000%	N/A	-80.00%
106.50000	-90.00000%	N/A	-90.00%
0.00000	-100.00000%	N/A	-100.00%

(1) The Index closing level is greater than or equal to 532.50 on the Observation Date.

(2) The Index closing level is less than 532.50 on the Observation Date.

Hypothetical Examples of Amounts Payable at Maturity

The following examples illustrate how the total returns set forth in the table above are calculated.

Example 1: The level of the Index increases from the Initial Index Level of 1065 to an Ending Index Level of 1118.25. Because the Ending Index Level of 1118.25 is greater than the Initial Index Level of 1065 and the Index Return of 5% multiplied by 1.30 does not exceed the Maximum Total Return of 45.80%, the investor receives a payment at maturity of \$1,065 per \$1,000 principal amount note, calculated as follows:

$$\$1,000 + [\$1,000 \times (5\% \times 1.30)] = \$1,065$$

Example 2: The level of the Index decreases from the Initial Index Level of 1065 to an Ending Index Level of 532.50. Although the Ending Index Level of 532.50 is less than the Initial Index Level of 1065, because the Index did not close below 532.50 on the Observation Date, a Knock-Out Event has not occurred and the investor receives a payment at maturity of \$1,000 per \$1,000 principal amount note.

Example 3: The level of the Index increases from the Initial Index Level of 1065 to an Ending Index Level of 1491. Because the Ending Index Level of 1491 is greater than the Initial Index Level of 1065 and the Index Return of 40% multiplied by 1.30 exceeds the Maximum Total Return of 45.80%, the investor receives a payment at maturity of \$1,458 per \$1,000 principal amount note, the maximum payment on the notes.

Example 4: The level of the Index decreases from the Initial Index Level of 1065 to an Ending Index Level of 426. Because the Ending Index Level of 426 is less than the Initial Index Level of 1065 by more than the Knock-Out Buffer Amount of 50%, a Knock-Out Event has occurred and the investor receives a payment at maturity of \$400 per \$1,000 principal amount note, calculated as follows:

$$\$1,000 + (\$1,000 \times -60\%) = \$400$$

Historical Information

The following graph sets forth the historical performance of the S&P 500[®] Index based on the weekly Index closing level from January 7, 2005 through July 16, 2010. The Index closing level on July 21, 2010 was 1069.59. We obtained the Index closing levels below from Bloomberg Financial Markets. We make no representation or warranty as to the accuracy or completeness of the information obtained from Bloomberg Financial Markets.

The historical levels of the Index should not be taken as an indication of future performance, and no assurance can be given as to the Index closing level on the pricing date or on the Observation Date. We cannot give you assurance that the performance of the Index will result in the return of any of your initial investment.

Supplemental Plan of Distribution (Conflicts of Interest)

We own, directly or indirectly, all of the outstanding equity securities of JPMSI, the agent for this offering. The net proceeds received from the sale of notes will be used, in part, by JPMSI or one of its affiliates in connection with hedging our obligations under the notes. In accordance with NASD Rule 2720, JPMSI may not make sales in this offering to any of its discretionary accounts without the prior written approval of the customer.
