Certain Product Characteristics

If the Final Value of the Underlying is greater than its Initial Value, you will receive a cash payment that provides you with a return per $1,000 principal amount note equal to the Underlying Return multiplied by the Upside Leverage Factor, subject to the Maximum Return on the notes.

If the Final Value of the Underlying is equal to or less than its Initial Value by up to the Buffer Amount, you will receive the principal amount of your notes at maturity. If the Underlying declines from its Initial Value by greater than the Buffer Amount, you will lose 1% of the principal amount of your notes for every 1% that the Underlying has declined beyond the Buffer Amount.

Any payment on the notes is subject to the credit risk of JPMorgan Chase Financial Company LLC, as issuer of the notes and the credit risk of JPMorgan Chase & Co., as guarantor of the notes.

* To be determined on the Pricing Date, but not less than 15.75% or greater than 19.75%
