CURRENT REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

Date of Report: January 19, 2000 Commission file number 1-5805

THE CHASE MANHATTAN CORPORATION (Exact name of registrant as specified in its charter)

Delaware (State or other jurisdiction of incorporation) 13-2624428 (I.R.S. Employer Identification No.)

270 Park Avenue, New York, NY (Address of principal executive offices)

10017 (Zip Code)

Registrant's telephone number, including area code (212) 270-6000

The Chase Manhattan Corporation ("Chase") announced on January 19, 2000 operating diluted earnings per share of \$1.97 in the fourth quarter of 1999, up 50 percent from \$1.31 per share in the fourth quarter of 1998. Reported diluted earnings per share were \$1.98 in the 1999 fourth quarter, up 51 percent from \$1.31 in the fourth quarter of 1998. Diluted operating earnings per share for the full year 1999 increased 38 percent to \$6.21 from \$4.51 in 1998. Operating earnings rose to \$5.39 billion from \$4.02 billion in 1998. Reported net income for the full year was \$5.45 billion, compared with \$3.78 billion in 1998. Operating results (revenues, expenses and earnings) exclude the impact of credit card securitizations, restructuring costs and special items.

At an analyst meeting held on January 19, 2000 following the release of earnings (which was open to investors and the press and "webcast" live on the Internet), management of Chase discussed fourth quarter and full year 1999 results. At the meeting, management indicated that:

- The compound annual growth rate of market-sensitive revenues, based upon a logarithmic regression of total market-sensitive revenues over the period 1988-1999 (not including any market-sensitive revenues from Hambrecht and Quist Group), was 15%. Chase's market-sensitive revenues for full year 1999 would have increased by approximately 11% had Hambrecht and Quist Group's market-sensitive revenues been included for full year 1999.
- Global Services is targeting double digit revenue growth in its investor services and fiduciary services businesses for full year 2000. In addition, Chase expects to effect certain efficiency improvements in its Global Services business during the year.
- National Consumer Services is targeting double digit earnings growth for full year 2000, primarily as a result of expense management, the continued effects of improved credit quality and continuing moderate revenue growth. The credit card net charge-off ratio for full year 2000 is anticipated to be lower than for the full year 1999.
- Expense management will include longer-term strategic restructuring initiatives, such as relocations of operations for Global Services businesses and consumer call centers, and other business initiatives, such as consolidations of operations. In the fourth quarter of 1999, Chase took a restructuring charge of \$100 million associated with its business consolidation initiatives and a charge of \$75 million in connection with its relocation initiatives. Chase anticipates realizing approximately \$80 million annually in savings from its business consolidation initiatives, commencing in 2001. In addition, Chase anticipates that the total cost of its relocation initiatives to amount to approximately \$360 million (including the aforementioned \$75 million charge taken in 1999, an additional \$200 million of expenses expected to be incurred in 2000, and expenses of approximately \$85 million expected to be incurred in 2001). Savings from the relocation initiatives are expected to be approximately \$50 million in 2001, eventually increasing to approximately \$130 million annually.
- As previously disclosed in its Quarterly Report on Form 10-Q for the quarter ended September 30, 1999, Chase has identified some deficiencies in the computerized bond recordkeeping system in the bond paying agency function within Chase's Capital Markets Fiduciary Services group and has a project underway to remedy those deficiencies. Expenses in Global Services during the fourth quarter included costs associated with that project. While management considers it likely that additional costs will be incurred during the remaining course of the project, it does not, based upon its experience to date, expect them to be material. The Securities and Exchange Commission has commenced an investigation relating to the question of whether, in connection with this matter, there have been violations of its transfer agency recordkeeping or reporting regulations and whether Chase's disclosures regarding these issues have been adequate and timely.

A copy of Chase's earnings press release is attached as an exhibit hereto. The information contained herein and in the press release may contain statements that are forward looking within the meaning of the Private Securities Litigation Act of 1995. Such statements are subject to risks and uncertainties and Chase's actual result may differ materially from those set forth in such forward looking statements. Those uncertainties may include, among others, the risk of adverse impacts from an economic downturn, increased competition, unfavorable political or other developments in foreign markets, governmental or regulatory policies, market volatility in securities markets, interest or foreign exchange rates and other factors impacting Chase's operational plans or the adequacy of Chase's allowance for credit losses. For a more detailed discussion of these uncertainties, reference is made to Chase's reports filed with the Securities and Exchange Commission, in particular Chase's Annual Report on Form 10-K for the year ended December 31, 1998.

Chase Manhattan Reports Record Fourth Quarter and Full Year 1999 Results; Announces New \$5 Billion Common Stock Repurchase Authorization

New York, January 19, 2000 - The Chase Manhattan Corporation (NYSE:CMB) today reported fourth quarter 1999 diluted operating earnings per share of \$1.97, a 50 percent increase from \$1.31 per share in the same 1998 quarter. Operating earnings and reported net income in the fourth quarter of 1999 were \$1.68 billion and \$1.69 billion respectively. Operating earnings and reported net income were \$1.15 billion in the 1998 fourth quarter.

Diluted operating earnings per share for the full year 1999 increased 38 percent to 6.21 from 4.51 in 1998. Operating earnings rose to 5.39 billion from 4.02 billion in 1998. Reported net income for the full year was 5.45billion, compared with \$3.78 billion in 1998.

# Fourth Quarter 1999 Highlights

- Record private equity gains of \$1.31 billion Strong investment banking and trading results Chase H&Q integration moving smoothly and quickly
  - Solid National Consumer Services earnings

# Full Year Financial Highlights

- Operating earnings per share increased 38 percent Revenues were up 17 percent Return on equity of 24 percent Repurchased net \$2.3 billion of common stock

- Increased common dividend 14 percent

"1999 was a terrific year for Chase and these results provide a strong signal that this company is capable of producing exceptional returns," said William B. Harrison, Jr., Chairman and Chief Executive Officer. "Both fourth quarter and full year results demonstrate clearly that the new equation at Chase has fully emerged.

"Market leadership positions and financial discipline provide a durable platform for growth while focused acquisitions and portfolio investments continue to provide significant upside opportunities," continued Mr. Harrison. "The creation of Chase.com, the acquisition of Hambrecht & Quist, and the accelerated investment pace of Chase Capital Partners are the types of opportunities from which Chase will continue to benefit. While revenues from private equity investments may vary from quarter to quarter, we believe that the Chase Capital Partners business system will be a significant long-term source of value creation."

Chase's Board of Directors also authorized the repurchase of up to \$5 billion of Chase's common stock in the open market or through negotiated transactions. This authorization is in addition to any amounts necessary to provide for issuances under Chase's dividend reinvestment plan and its various stock-based director and employee benefit plans. The new authorization becomes effective immediately.

"Chase is totally committed to Shareholder Value Added," explained Mr. Harrison. "A disciplined capital policy is a key component of that commitment." At year-end, Chase's Tier One capital ratio was at the upper end of its target range of 8 to 8.25 percent. Capital generated in excess of target ratios will be used for continued purchases of Chase common stock, or for future investment and acquisition opportunities.

Financial Performance

Shareholder Value Added	1,027	557	119	2,763	1,357	97
Cash Return on Common Equity	31.6%	1,020bp		25.6%	600bp	

Line-Of-Business Results

GLOBAL BANK		Fu]	Full Year 1999			
(dollars in millions)	1999	0(U)1998	0(U)3Q1999	1999	0(U) 1	998
Operating Revenues	\$3,214	46%	44%	\$10,379	2,424	
Cash Operating Earnings	1,209	78	82	3,564	1,177	49
Shareholder Value Added	766	189	210	1,885	1,109	143
Cash Return on Common Equity	36.0%	1,450bp	1,510bp	27.9%	850bp	

Cash operating earnings in the Global Bank were \$1.21 billion in the 1999 fourth quarter, compared with \$680 million in the prior-year quarter. Operating revenues of \$3.21 billion in the fourth quarter of 1999 were 46 percent higher than in the 1998 fourth quarter. For the year, operating revenues and cash operating earnings rose 30 percent and 49 percent, respectively, from 1998 levels. Shareholder value added in the 1999 fourth quarter was \$766 million, compared with shareholder value added of \$265 million in the 1998 fourth quarter. For the year, shareholder value added increased to \$1.89 billion, compared with \$776 million for 1998.

- Private equity-related investment gains in the fourth quarter were \$1.31 billion, compared with \$244 million in the fourth quarter of 1998. These results were significantly higher than in any prior quarter and reflect the rapid growth of investments over the past five years, early focus on New Economy businesses, and a vibrant equity market. Strong fourth quarter revenues are the result of initial public offerings of portfolio investments, such as Cobalt Networks, Triton PCS, and Telecorp; from appreciation in market values of public securities owned throughout the quarter, such as Digital Island and Stamps.com; and from sales of securities in both the private and public portions of the portfolio (see page 18 for a detailed description of private equity investments).
- Investment banking fees in the 1999 fourth quarter increased to \$499 million, a 31 percent increase from the fourth quarter of 1998. These results reflect strong syndicated finance activity, ongoing momentum in Chase's merger and acquisitions and bond practices, and strong performance from Chase H&Q during the period following its acquisition on December 9. Investment banking fees for the year rose 26 percent to \$1.89 billion, benefiting from significant market share growth in loan syndications, mergers and acquisitions advisory, and corporate bond underwriting, plus focused initiatives in Europe and the New Economy. Over the past five years, Chase's investment banking fees have increased at a compound annual growth rate of 26 percent.
- Total trading revenues, including related net interest income, were \$633 million in the fourth quarter. Despite Year 2000-induced slowdowns in several markets, both active market making businesses and market share gains continued to drive results. For the full year, trading revenues, including related net interest income, totalled \$2.88 billion, a 48 percent increase. Investment securities activities had securities losses of \$59 million in the fourth quarter, compared to securities gains of \$167 million in the similar period of 1998. For the full year, securities gains were \$101 million, a decrease of \$508 million from 1998. The investment portfolio is managed on a total return basis, including realized and unrealized gains and losses on the securities and the assets and liabilities being hedged. Total market return for full-year 1999 was \$278 million versus \$523 million in 1998.

GLOBAL SERVICES	Fourth Quarter Full Year 1999					
(dollars in millions) Operating Revenues Cash Operating Earnings Shareholder Value Added Cash Return on Common Equity	1999 \$812 127 31 17.2%	0(U)1998 7% (5%) (35%) (320bp)	0(U)3Q1999 1% (16) (44) (340bp)	1999 \$3,120 525 145 18.1%	0(U)19 \$294 39 (48) (370bp)	998 10% 8 (25)

In the fourth quarter, Global Service's operating revenues rose seven percent, primarily reflecting increased business activity in Capital Markets Fiduciary Services, Chase's trust business, and a slowdown in Global Investor Services, Chase's custody business. Cash operating earnings decreased five percent to \$127 million as expenses in the quarter rose 12 percent, reflecting costs to address record keeping functions related to bond administration in Capital Markets Fiduciary Services.

For the full year, Global Service's operating revenues increased 10 percent and cash operating earnings were eight percent higher than in 1998. Of Global Services' three major business lines, two had strong revenue growth in 1999: up 20 percent at Global Investor Services, and up 16 percent at Capital Markets Fiduciary Services. Revenues at Treasury Solutions, Chase's cash management business, were consistent with last year's level, primarily reflecting the significant decline in excess balances during the course of the year.

NATIONAL CONSUMER SERVICES		Fourth Quart	er 	Full	l Year 1999	
(dollars in millions) Operating Revenues	1999 \$2,503	0(U)1998 2%	0(U)3Q1999 %	1999 \$9,847	0(U)19 \$698	98
Cash Operating Earnings	426	2	(2)	1,677	232	16
Shareholder Value Added	156	(3)	(10)	636	218	52
Cash Return on Common Equity	20.7%	(70bp)	(110bp)	21.1%	260bp	

Operating revenues for National Consumer Services increased to \$2.5 billion, an increase of two percent over the fourth quarter of 1998. Cash operating earnings of \$426 million increased by two percent as increased business activity and improved credit costs were partially offset by significant investments in internet and technology activities. For the full year, 1999 revenue was up eight percent and NCS achieved record cash operating earnings of \$1.68 billion, up 16 percent over 1998. The increase in cash operating earnings was a result of both business volume growth and lower credit costs. Shareholder Value Added of \$636 million was 52% better than in 1998 due to the improvement in earnings and the disciplined use of capital.

- Cash operating earnings for cardmember services increased 11 percent in the fourth quarter. The increase reflects significantly improved credit quality. Fourth quarter operating revenues declined six percent, due to lower yields and fees as a result of the improving credit quality of the portfolio, and as a result of higher interest rates. For the year, cash operating earnings were up 16 percent to \$523 million. The increase in cash operating earnings reflects a two percent increase in revenue and improved credit quality due to lower consumer bankruptcies and enhanced collections performance. The cash return on managed assets for the full year was 1.45 percent.
- Home finance revenues increased to \$341 million, a 21 percent increase from fourth quarter 1998, and cash operating earnings rose 10 percent, primarily as a result of growth in servicing and portfolio levels. For full year 1999, home finance revenues were 18 percent higher than in the prior year, due to higher volumes of originations and servicing, and cash operating earnings increased by 13 percent.
- Regional consumer banking revenues rose eight percent from the fourth quarter of 1998, reflecting higher deposit levels, the benefit from higher interest rates, and growth in consumer banking fees. Cash operating earnings grew by 15 percent. Revenues and cash operating earnings for the full year increased by nine percent and 17 percent, respectively over 1998.

- Revenues from diversified consumer services were \$280 million in the fourth quarter, down two percent from the same 1998 quarter as auto origination levels have slowed from peak levels in late 1998 and early 1999. For the full year, revenues from diversified consumer services were up 20 percent while cash operating earnings increased 33 percent.
- Middle Market revenues were \$251 million, up two percent from the fourth quarter of 1998. Cash operating earnings increased four percent over the prior year quarter. These results reflect growth in loan volume along with improved credit quality and disciplined expense management. For the year, middle market revenues were up two percent and cash operating earnings increased four percent.

#### Additional Financial Information

- Chase acquired Hambrecht & Quist Group for \$1.46 billion on December 9. Chase H&Q is one of the leading providers of investment banking services to companies in the highest growth sectors of the global economy, where media, telecommunications, information technology and the internet converge. The integration efforts are proceeding smoothly with revenues exceeding initial expectations. Although Chase only benefited from H&Q's revenues from December 9, total fourth quarter revenues for H&Q were \$371 million, compared to average quarterly revenue of approximately \$163 million for the previous four reported quarters.
- Total assets at December 31, 1999 were \$406 billion compared with \$371 billion at September 30, 1999 and \$366 billion from a year ago. Management estimates that approximately \$28 billion of the increase in assets and \$10 billion of the deposit increase from September 30, 1999, is a result of Year 2000-related Chase balance sheet management actions and cash management activities of clients. Chase's Tier One capital ratio was 8.2 percent at December 31, 1999, compared with 8.3 percent on December 31, 1998, despite the temporary growth in the year-end balance sheet and net repurchases of \$2.3 billion during the year.
- On a managed basis, including securitizations, net credit losses were \$810 million in the fourth quarter of 1999, up from \$633 million in the third quarter of 1999 and up from \$695 million from the fourth quarter of 1998. Consumer net charge-offs, on a managed basis, were \$523 million, down from \$531 million in the third quarter of 1999 and \$579 million in the fourth quarter of 1998, primarily reflecting a decline in the 1999 fourth quarter in the credit card net charge-off ratio to 5.24 percent. Commercial net charge-offs in the fourth quarter of 1999 were \$287 million, compared with \$102 million in the third quarter of 1999 and \$116 million in the fourth quarter of 1998, reflecting a charge-off related to one large Asian credit. For the fourth quarter of 1999, total net charge-offs on a reported basis were \$570 million and the provision for credit losses was \$454 million. The allowance for loan losses declined by \$98 million to \$3.46 billion at year-end. Nonperforming assets at December 31, 1999, were \$1.80 billion compared with \$2.02 billion at September 30, 1999 and \$1.61 billion at December 31, 1998.

- Total operating noninterest expenses increased 12 percent to \$12.1 billion in 1999, and were up 11 percent to \$3.2 billion in the fourth quarter, reflecting higher incentives related to revenue increases as well as investment spending and costs related to Year 2000 issues.
- Operating results (revenues, expenses and earnings) for 1999 exclude the impact of credit card securitizations, restructuring costs and special items. The 1999 fourth quarter reported results included interest income from prior years' tax refunds of \$62 million and a net restructuring charge of \$48 million. The net restructuring charge reflects a \$75 million charge taken in connection with planned staff reductions and premises and equipment dispositions resulting from the relocation of several business functions, and a \$100 million charge associated with restructuring actions undertaken in certain businesses. These charges were partially offset by the reversal of \$127 million of costs primarily related to occupancy not fully utilized under the \$510 million charge taken in 1998.

The Chase Manhattan Corporation is one of the world's premier financial services institutions, with operations in 48 countries around the globe. Chase has a top-tier ranking in all areas of investment banking, private banking, trading and global markets activities as well as information and transaction processing. Chase, a leading provider of financial solutions to large corporations, financial institutions, government entities, middle market firms, small businesses and individuals, has relationships with more than 30 million consumers across the United States through products and services such as credit cards, mortgages, online banking, debit cards, deposit products and auto loans. Chase can be reached on the Web at www.chase.com. A live audio webcast of Chase's fourth quarter and full year 1999 analyst presentation will be available in the investor relations site of www.chase.com at 11 a.m. on January 19, 2000.

This press release contains forward-looking statements. Those statements are based on management's current expectations or beliefs and are subject to a number of factors and uncertainties that could cause actual results to differ materially from those described in the forward-looking statements. For a discussion of certain factors that could cause actual results to differ materially from those described in the forward-looking statements, please refer to Chase's filings with the Securities and Exchange Commission, particularly the section entitled "Important Factors that may Affect Future Results" in Chase's Annual Report on Form 10-K for the year ended December 31, 1998.

Diluted

<sup>(</sup>a) Represent results as reported in Chase's financial statements, except that revenues are categorized between market-sensitive and less market-sensitive revenues and restructuring costs have been separately displayed. Market-sensitive revenue includes investment banking fees, trading-related revenue (including trading-related net interest income), securities gains and private equity gains.

private equity gains.

(b) This column excludes the impact of credit card securitizations.

(c) Includes restructuring costs and special items. The 1999 fourth quarter results included interest income from prior years' tax refunds of \$62 million and a net restructuring charge of \$48 million. The net restructuring charge reflects a \$75 million charge taken in connection with planned staff reductions and premises and equipment dispositions resulting from the relocation of several business functions, and a \$100 million charge associated with restructuring actions undertaken in certain businesses. These charges were partially offset by the reversal of \$127 million of costs primarily related to occupancy not fully utilized under the \$510 million charge taken in 1998. Also included in the 1999 full year results were \$166 million in gains from sales of nonstrategic assets, of which \$95 million was from the sale of One New York

Plaza and \$71 million was from the sale of branches in Beaumont, Texas, and a special contribution of \$100 million. The 1998 full year results included interest income from prior years' tax refunds of \$191 million, costs incurred for accelerated vesting of stock-based incentive awards of \$37 million, and a \$510 million charge taken in connection with initiatives to streamline support functions, and merger-related restructuring costs of \$19 million.

<sup>(</sup>a) Estimated cross-border disclosure is based on the Federal Financial Institutions Examination Council ("FFIEC") guidelines governing the determination of cross-border risk. Under FFIEC guidelines, resale agreements are reported by the country of the issuer of the underlying security. Chase, however, does not consider the cross-border risk of resale agreements to depend upon the country of the issuer of the underlying security and, as a result, has presented these amounts separately in the above table.

<sup>(</sup>b) Includes loans and accrued interest, interest-bearing deposits with banks, acceptances, other monetary assets, issued letters of credit and undrawn commitments to extend credit.

<sup>(</sup>c) Includes cross-border trading debt and equity instruments and the mark-to-market exposure of foreign exchange and derivative contracts. The amounts associated with foreign exchange and derivative contracts are presented after taking into account the impact of legally enforceable master netting agreements.

d) Excludes Bermuda and Cayman Islands. (e) Excludes Japan, Australia and New Zealand. The net cross-border exposure for Japan, Australia and New Zealand at December 31, 1999 was \$4.9 billion,

\$2.0 billion and \$0.3 billion, respectively, compared with \$5.2 billion, \$1.9 billion and \$0.6 billion, respectively, at December 31, 1998. Japan also had country-related resale agreements of \$3.3 billion at December 31, 1999, compared with \$1.7 billion at December 31, 1998.

Policy:

Public securities held by Chase Capital Partners are marked-to-market at the quoted public value less liquidity discounts, with the resulting unrealized gains/losses included in the income statement. Chase's valuation policy for public securities incorporates the use of these liquidity discounts and price averaging methodologies in certain circumstances to take into account the fact that Chase can not immediately realize such public quoted values due to the numerous regulatory, corporate and contractual sales restrictions. Non-Public investments are carried at cost, with the exception of holdings in which a subsequent investment by an unaffiliated party indicates a valuation in excess of cost and holdings for which evidence of an other-than-temporary decline in value exists.
