Pillar 3 Quarterly Disclosure Report as at 30th June 2017

- J.P. Morgan Capital Holdings Limited
- J.P. Morgan Securities plc.

1. Introduction

Background

The need to assess whether an institution should disclose some information more frequently than annually, under Part Eight of the Capital Requirements Regulation ('CRR')¹, originates in Article 433 and the requirements are further articulated in the European Banking Authority ('EBA') Guidelines² ('the Guidelines'), which were adopted by the Prudential Regulation Authority ('PRA') from 15th October 2015.³

All J.P. Morgan Chase entities regulated under the Capital Requirements Directive IV ('CRD IV')⁴ have applied the Guidelines by:

- Enhancing the Pillar 3 process to include a full assessment of the need to publish data more frequently than annually; and
- Identifying the key data elements to disclose in order to meet the needs of potential users of the disclosure.

Scope

J.P. Morgan Capital Holdings Limited ('JPMCHL') is the highest consolidated level of J.P. Morgan entities within the UK and is defined as an Other Systemically Important Institution ('O-SII') as disclosed by the EBA on 25th April 2016.

All J.P. Morgan European regulated entities have been considered for more frequent disclosure. The internal assessment process (under Title II of Guidelines) to determine which J.P. Morgan entities should disclose more frequently than annually concluded that both **JPMCHL** and **J.P. Morgan Securities Plc ('JPMS plc')** are the only European entities meeting the qualitative and quantitative thresholds to necessitate more frequent disclosure.

No items have been omitted due to confidentiality, materiality or for proprietary reasons under Titles III and IV of the Guidelines.

The data disclosed in this document represents disclosure for the second quarter of 2017, as at 30th June 2017 and is produced on an unaudited basis.

Any line items that are not applicable have been hidden for presentation purposes.

Means of Disclosure (Art. 434)

The disclosure report is made available according to Article 434 CRR on the website of JPMorgan Chase & Co. ('JPMC') at <u>http://investor.shareholder.com/jpmorganchase/sec.cfm</u>. The latest Annual disclosure is also available via this link.

Firmwide Disclosure

The ultimate parent of the entities in scope of this disclosure is JPMorgan Chase & Co., which is incorporated in the United States of America. Firmwide disclosure is made under the Basel III requirement available at the below link. In addition, the U.S. Securities and Exchange Commission filings made at the firmwide level, 10K and 10Q, provide further information at the following link: http://investor.shareholder.com/jpmorganchase/sec.cfm.

2. Own Funds (Art. 437)

Capital resources represent the amount of regulatory capital available to an entity to cover all risks. Defined under the CRR, capital resources are designated into two tiers, Tier 1 and Tier 2. Tier 1 capital consists of Common Equity Tier 1 ('CET1') and Additional Tier 1 ('AT1'). CET1 is the highest quality of capital and typically represents share capital, reserves and audited profit; AT1 contains hybrid debt instruments; Tier 2 capital typically consists of subordinated debt and other eligible capital instruments.

As part of the Firm's legal entity rationalisation efforts, management undertook certain steps in June 2017 to simplify the UK legal entity structure of the JPMCHL group. Key events that impacted JPMCHL included:

- J.P. Morgan Overseas Capital LLC ("JPMOC LLC") distributed ordinary shares in JPMCHL to J.P. Morgan International Finance Limited ("JPMIFL"), resulting in JPMCHL becoming a wholly owned subsidiary of JPMIFL.
- Fixed rate preference shares issued by J.P. Morgan Chase International Holdings ("JPMCIH") to J.P. Morgan Whitefriars (UK) were contributed in to JPMCHL by its immediate parent JPMIFL. As a result, the non-controlling interest in the Group was reduced by \$1,957 million with a corresponding increase in capital contribution reserve.
- JPMCHL became 100% parent of JPMS plc following a series of inter-company transactions.

The above changes have been deemed to be highly significant changes in the period, impacting the disclosures in this document. The impacts are as follows: -

- Significant increase in Table 1, Row 3: Accumulated other comprehensive income (and other reserves, to include unrealised gains and losses under the applicable accounting standards) and Table 3, Other Reserves.
- Removal of the rows in Table 1 which were relevant to non-significant investment deduction for JPMCHL. The changes
 increased the non-significant investment deduction threshold resulting in the non-significant investment exposure
 becoming lower than the threshold.

The information represented in the tables below constitutes the applicable data elements for Own Funds identified in Title VII of the Guidelines.

The final column represents the capital position on a fully-phased in basis after all CRR transitional provisions have expired and phase-out of grandfathered capital instruments under pre-CRR national transposition measures is complete. Other capital impacts including instrument maturity or behavioural changes are not considered for the fully-phased in position.

3. Capital Requirements (Art. 438)

The tables below show a breakdown of the risk weighted assets and associated Minimum Capital Requirements for JPMCHL and JPMS plc. The Minimum Capital Requirement is the amount of Pillar 1 capital that the CRR requires JPMCHL and JPMS plc to hold at all times. Both JPMCHL and JPMS plc's Total Capital Resources must be greater than its Minimum Capital Requirement, allowing for a capital excess to cover any additional obligations, for example, Pillar 2. The standardised approach has been used for the calculation of Credit Risk. Market Risk Capital Requirements have been measured by using combination of the standardised approach and internal models including Value-at-Risk (VaR) approved by the PRA. This is the first UK Pillar 3 disclosure document to include Market Risk Capital Requirements that have been measured by internal models. Previously all Market Risk Capital Requirements were calculated using the standardised approach. The basic indicator approach has been used for the calculation of Operational Risk Capital Requirements. The information represented in the tables below constitutes the key data elements for Capital Requirements identified in Title VII of the EBA Guidelines.

4. Leverage (Art. 451)

The leverage ratio is a measure of Tier 1 capital as a percentage of exposure as defined under the CRR rules.

The requirement for the calculation and reporting of leverage ratios was introduced as part of CRD IV in 2014, and amended by the European Commission Delegated Act (EU) 2015/62 in 2015.

As a result of this, CRD IV legislation allows for the calculation of a transitional leverage ratio aligned to the phasing in of a number of capital deductions and the phasing out of grandfathered instruments as allowed for the calculation of own funds under the CRR.

CRD IV does not currently include a minimum Leverage Ratio requirement; however, the Basel Committee on Banking Supervision ("the Basel Committee") has indicatively proposed a minimum requirement of 3%.

Leverage risk is monitored through the same processes and frameworks as capital adequacy and stress-testing. The latter is particularly important, as it is forward-looking: if the Firm's leverage ratios remain sustainable under stressed conditions, the risk of forced de-leveraging will be low.

The Firm has adopted a point-in-time calculation of the leverage ratio, as per Commission Delegated Regulation 2015/62.

The information represented in the tables below constitutes the key applicable data elements for leverage identified in Title VII of the EBA Guidelines.
