² Subject to postponement	

Hypothetical Payout Profile*

*Assumes a call premium equal to the lowest possible call premium that may be determined on the pricing date

If the securities are automatically called, the positive return on the securities will be limited to the call premium, even if the closing level of the lowest performing Index on the call date significantly exceeds its starting level. If the securities are automatically called, you will not have the opportunity to participate in any appreciation of the lowest performing Index on the final calculation day at the upside participation rate.

If the securities are not automatically called and the ending level of the lowest performing Index on the final calculation day is less than its threshold level, you will have 1-to-1 downside exposure to the decrease in the level of that Index from its starting level and will lose some, and possibly up to 85%, of the principal amount of your securities at maturity.

The securities are unsecured and unsubordinated obligations of JPMorgan Chase Financial Company LLC, which we refer to as JPMorgan Financial, the payment on which is fully and unconditionally guaranteed by JPMorgan Chase & Co. **Any payment on the securities is subject to the credit risk of JPMorgan Financial, as issuer of the securities, and the credit risk of JPMorgan Chase & Co., as guarantor of the securities.**

If the securities priced on the date of the accompanying preliminary pricing supplement, the estimated value of the securities would be approximately \$952.90 per security. The estimated value of the securities, when the terms of the securities are set, will be provided in the pricing supplement and will not be less than \$930.00 per security. See "The Estimated Value of the Securities" in the preliminary pricing supplement for additional information.
