Automatic Call

If the closing price of one share of each Fund on any Review Date is greater than or equal to its Call Value, the notes will be automatically called for a cash payment, for each \$1,000 principal amount note, equal to (a) \$1,000 plus (b) the Call Premium Amount applicable to that Review Date, payable on the applicable Call Settlement Date. If the notes have not been automatically called and the Final Value of either Fund is less than its Barrier Amount, you will lose more than 30.00% of your principal amount at maturity and could lose all of your principal amount at maturity.

The price, if any, at which JPMS will be willing to purchase notes from you in the secondary market, if at all, may result in a significant loss of your principal.
- Potential conflicts: We and our affiliates play a variety of roles in connection with the issuance of notes, including acting as calculation agent and hedging our obligations under the notes, and making the assumptions used to determine the pricing of the notes and the estimated value of the notes when the terms of the notes are set. It is possible that such hedging or other trading activities of J.P. Morgan or its affiliates could result in substantial returns for J.P. Morgan and its affiliates while the value of the notes decline.
