Notes on non-GAAP financial measures

- 1. In addition to analyzing the Firm's results on a reported basis, management reviews Firmwide results, including the overhead ratio, on a "managed" basis; these Firmwide managed basis results are non-GAAP financial measures. The Firm also reviews the results of the lines of business on a managed basis. The Firm 's definition of managed basis starts, in each case, with the reported U.S. GAAP results and includes certain reclassifications to present total net revenue for the Firm and each of the reportable business segments on a fully taxable-equivalent (FTE<sup>-</sup>) basis. Accordingly, revenue from investments that receive tax credits and tax-exempt securities is presented in the managed results on a basis comparable to taxable investments and securities. These financial measures allow management to assess the comparability of revenue from year-to-year arising from both taxable and tax-exempt sources. The corresponding income tax impact related to tax-exempt litems is recorded within income law equipsement have no impact on net income as reported by the Firm as a whole or by the lines of business. For a reconciliation of the Firm's results from a reported to managed basis, see page 7 of the Earnings Release Financial Supplement
- 2. Second-quarter 2021 net income, earnings per share and ROTCE excluding credit reserve releases ("significant item") are non-GAAP financial measures. The credit reserve releases represent the portion of the provision for credit losses attributable to the change in allowance for credit losses. Excluding credit reserve releases resulted in a decrease of 50.25 per 542 staffer to income from \$1119 los \$9.68; a decrease of \$0.75 per 158 for \$0.75 per 259 from \$3.78 decreases of \$0.75 per 250 from \$3.78 decreases \$1.75 per 25
- 3. Tangible common equity ("TCE"), return on tangible common equity ("ROTCE") and tangible book value per share ("TBVPS"), are each non-GAAP financial measures. TCE represents the Firm's common stockholders' equity (i.e., total stockholders' equity less preferred stock) less goodwill and identifiable intangible assets (other than mortgage servicing right)s, net of related deferred at slabilities. For a reconscilation from common stockholders' equity to TCE: see page 9 of the Earnings Release Financial Supplement. ROTCE measures the Firm's net income applicable to common equity as a percentage of average TCE. TBVPS represents the Firm's TCE at period-end divided by common shares at period-end. Book value per share was 584 x85, 582 x31 and \$76.91 at June 30, 2021, Marci 31, 2021 and June 30, 2020, respectively. TCE, ROTCE and TBVPS are utilized by the Firm, as well as investors and analysts, in assessing the Firm's use of equity
- 4. Adjusted expense and adjusted overhead ratio are each non-GAAP financial measures. Adjusted expense excludes Firmwide legal expense of \$185mm, \$28mm and \$118mm for the three months ended June 30, 2021, March 31, 2021 and June 30, 2020, respectively. The adjusted overhead ratio measures the Firm's adjusted expense as a percentage of adjusted managed net revenue. Management believes this information helps investors understand the effect of these items on reported results and provides an alternate presentation of the Firm's performance
