6.25yr Partial Principal at Risk S&P Economic Cycle Factor Rotator Index Notes

The following is a summary of the terms of the notes offered by the preliminary pricing supplement highlighted below

Overview

The S&P Economic Cycle Factor Rotator Index (the Index) is a rules-based index that seeks to rotate its exposure among one of four distinct strategies (each, a Sub-Index) based on the current U.S. business cycle indicated by the Chicago Fed National Activity Index (CFNAI). The CFNAI is a weighted average of 85 monthly indicators of national economic activity that provides a single, summary mea of a common factor in these national economic data. Historical movements in the CFNAI have tended in the past to track periods of economic expansion and contraction, as well as periods of increasing and decreasing inflationary pressure. Each Sub-Index is a rules-based index that seeks to maintain a target volatility of 6% by dynamically allocating between the relevant U.S. excess return style index that it references (each, an Underlying Equity Index) and the S&P 5-Year U.S. Treasury Note Futures Excess Return Index (the Underlying Treasury Index). Each Sub-Index deducts a notional borrowing cost based on a composite LIBOR rate.

Summary of Terms

our many or rorms			
Issuer:	JPMorgan Chase Financial Company LLC		
Guarantor:	JPMorgan Chase & Co.		
Minimum Denomination:	\$1,000		
Index (Index Ticker):	S&P Economic Cycle Factor Rotator Index (SPECFR6P)

If these fees and expenses were included, the hypothetical returns shown above would likely be

6.25yr Partial Principal at Risk S&P Economic Cycle Factor Rotator Index Notes

Selected Purchase Considerations

- Selected Putchase Considerations
 The notes offer repayment of at least 95.00% of principal at maturity, subject to the credit risks of JPMorgan Chase Financial Company LLC and JPMorgan Chase & CO.
 The Index tracks the return of a notional dynamic portfolio consisting of (a) one of four Underlying Equity Indices as set forth below and (b) the Underlying Treasury Index, while seeking to maintain an annualized realized volaility approximately equal to 6.0%. Each Underlying Equity Index seeks to provide exposure to the price change, less a notional financing cost deducted on a daily basis, of U.S. companies exhibiting one of the following sets of characteristics: momentum, value, high buybacks and free cash flows, or high dividends and low volaility.
 The Underlying Treasury Index seeks to track the performance of a rolling position in the 5-Year U.S. Treasury Note futures contract.
- contract On a monthly basis, the Index selects one of the four Underlying Equity Indices based on the stage of the U.S. business cycle inferred from the recent itend and average level of the Chicago Fed National Activity Index ("CFNAI"), which is a weighted average of 85 monthly indicators of national economic activity:

- If the CFNAI suggests the concern is currently moving from recovery to contraction, the Index valics are month to confirm the signal
 before rebalancing from Value into High Div Low Vol.
 There is no assurance that the Index methodology used to identify the current phase of the business cycle will be effective.

 Manentum: The S&P Momentum United States LargeMidCap (USD) Excess Return Index is designed to measure the
 performance of U.S. large- and mid-capitalization companies with relatively higher recent performance compared to the S&P
 United States LargeMidCap Index.

 Value: The S&P 500° Pure Value Excess Return Index is designed to measure the performance of stocks in the S&P 500°
 Index the axhibit relatively strong value characteristics (by reference to (1) box value to price ratio, and relatively week growth characteristics (by reference to EPS growth, sales per share growth
 and once momentum). and price mom

 - and price momentum). Butback: The S&P 500⁶ Buyback FCF Excess Return Index is designed to measure the performance of 30 companies (excluding JPMorgan Chase & Co., Visa and their past or present affiliated companies) with relatively higher rates of buying back their own stock, relatively higher levels of trading activity in their stock, and relatively higher free cash flow yields, as compared to the S&P 500⁶ Hoek. <u>High Div Low Voi</u>: The S&P 500⁶ Low Volatility High Dividend Excess Return Index is designed to measure the performance of the 50 least-volatilia among the 75 highest dividend-yielding companies in the S&P 500⁶ Houk, subject to sector and individual constituent concentration limits. Although the S&P 500⁶ Low Volatility High Dividend Excess Return Index will not include any dividends paid on the securities that make up the S&P 500⁶ Low Volatility High Dividend Excess Return Index.

- Selected Risks

- The notes may not pay more than 95.00% of the principal amount at maturity. The Underlying Equity Indices will include the deduction of a notional financing cost calculated based on the relevant LIBOR relets. Any payment on the notes is subject to the coreful risks of JPMorgan Chase Financial Company LLC and JPMorgan Chase & Co. Therefore the value of the notes prior to maturity will be subject to changes in the market's view of the creditworthiness of JPMorgan Chase Financial Company LLC or JPMorgan Chase & Co. Our affiliate, JP. Morgan Securities LLC (JPMST), worked with S&P Dow Jones Indices LLC in developing the guidelines and policies governing the composition and actualation of the Index. JPMorgan Chase & Co. is currently one of the companies that make up the S&P 500[®] Index and may be included in three Underlying Equity Indices.
