## JPMorganChase

Structured
Investments

JPMorgan Chase \& Co.
\$
Principal Protected Notes Linked to the U.S. Dollar Index ${ }^{\circledR}$ due July 22, 2009

## General

- Senior unsecured obligations of JPMorgan Chase \& Co. maturing July 22, 2009*.
- Cash payment at maturity of principal plus the Additional Amount, as described below.
- The notes are designed for investors who seek exposure to any appreciation of the level of the U.S. Dollar Index ${ }^{\circledR}$, which measures the performance of the U.S. dollar against each of six major global currencies, over the term of the notes. Investors should be willing to forgo interest payments while seeking full principal protection at maturity.
- Minimum denominations of $\$ 1,000$ and integral multiples thereof.
- The notes are expected to price on or about July 17, 2007 and are expected to settle on or about July 20, 2007.

CUSIP:

The U.S. Dollar Index ${ }^{\circledR}$ (the "Index")
At maturity, you will receive a cash payment, for each $\$ 1,000$ principal amount note, of $\$ 1,000$ plus the Additional Amount, which may be zero.

The Additional Amount per \$1,000 principal amount note paid at maturity will equal \$1,000 x the Index Return x the Participation Rate; provided that the Additional Amount will not be less than zero.

At least $325 \%$. The actual Participation Rate will be determined on the pricing date and will not be less than 325\%.
The Eurozone euro, the Japanese yen, the British pound, the Canadian dollar, the Swedish krona, the Swiss franc or any successor currency included in the U.S. Dollar Index ${ }^{\circledR}$ or any successor index thereto.

* Subject to postponement in the event of a market disruption event and as described under "Description of Notes - Payment at Maturity" in the accompanying product supplement no. 13-ו.

Investing in the Principal Protected Notes involves a number of risks. See "Risk Factors" beginning on page PS-5 of the accompanying product supplement no. 13-I and "Selected Risk Considerations" beginning on page TS-2 of this term sheet.

JPMorgan Chase \& Co. has filed a registration statement (including a prospectus) with the Securities and Exchange Commission, or SEC, for the offering to which this term sheet relates. Before you invest, you should read the prospectus in that registration statement, each prospectus supplement, product supplement no. 13-I and any other documents relating to this offering that JPMorgan Chase \& Co. has filed with the SEC for more complete information about JPMorgan Chase \& Co. and this offering. You may get these documents without cost by visiting EDGAR on the SEC website at www.sec.gov. Alternatively, JPMorgan Chase \& Co., any agent or any dealer participating in this offering will arrange to send you the prospectus, each prospectus supplement, product supplement no. 13-I and this term sheet if you so request by calling toll-free 866-535-9248.

You may revoke your offer to purchase the notes at any time prior to the time at which we accept such offer by notifying the applicable agent. We reserve the right to change the terms of, or reject any offer to purchase the notes prior to their issuance. In the event of any changes to the terms of the notes, we will notify you and you will be asked to accept such changes in connection with your purchase. You may also choose to reject such changes in which case we may reject your offer to purchase.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of the notes or passed upon the accuracy or the adequacy of this term sheet or the accompanying prospectus supplements and prospectus. Any representation to the contrary is a criminal offense.

|  | Price to Public | Fees and Commissions (1) | Proceeds to Us |
| :--- | :--- | :--- | :--- |
| Per note | $\$$ | $\$$ | $\$$ |

(1) If the notes priced today, J.P. Morgan Securities Inc., whom we refer to as JPMSI, acting as agent for JPMorgan Chase \& Co., would receive a commission of approximately $\$ 27.50$ per $\$ 1,000$ principal amount note and would use a portion of that commission to pay selling concessions to other dealers of approximately $\$ 5.00$ per $\$ 1,000$ principal amount note. The actual commission received by JPMSI may be more or less than $\$ 27.50$ and will depend on market conditions on the pricing date. In no event will the commission received by JPMSI, which includes concessions to be paid to other dealers, exceed $\$ 40.00$ per $\$ 1,000$ principal amount note. See "Underwriting" beginning on page PS-23 of the accompanying product supplement no. 13-I.

The notes are not bank deposits and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency, nor are they obligations of, or guaranteed by, a bank.

## JPMorgan

May 24, 2007

## ADDITIONAL TERMS SPECIFIC TO THE NOTES

You should read this term sheet together with the prospectus dated December 1, 2005, as supplemented by the prospectus supplement dated December 1, 2005 relating to our Series E medium-term notes of which these notes are a part, and the more detailed information contained in product supplement no. 13-I dated March 7, 2006. This term sheet, together with the documents listed below, contains the terms of the notes and supersedes all other prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, fact sheets, brochures or other educational materials of ours. You should carefully consider, among other things, the matters set forth in "Risk Factors" in the accompanying product supplement no. 13-I, as the notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisers before you invest in the notes.

You may access these documents on the SEC website at www.sec.gov as follows (or if such address has changed, by reviewing our filings for the relevant date on the SEC website):

- Product supplement no. 13-I dated March 7, 2006: http://www.sec.gov/Archives/edgar/data/19617/000089109206000563/e23554 424b2.pdf
- Prospectus supplement dated December 1, 2005: http://www.sec.gov/Archives/edgar/data/19617/000089109205002390/e22885 424b2.txt
- Prospectus dated December 1, 2005: http://www.sec.gov/Archives/edgar/data/19617/000089109205002389/e22923 base.txt

Our Central Index Key, or CIK, on the SEC website is 19617. As used in this term sheet, the "Company," "we," "us," or "our" refers to JPMorgan Chase \& Co.

## Selected Purchase Considerations

- PRESERVATION OF CAPITAL AT MATURITY - You will receive at least 100\% of the principal amount of your notes if you hold the notes to maturity, regardless of the performance of the Index. Because the notes are our senior unsecured obligations, payment of any amount at maturity is subject to our ability to pay our obligations as they become due.
- APPRECIATION POTENTIAL - At maturity, in addition to your principal, for each $\$ 1,000$ principal amount note you will receive a payment equal to $\$ 1,000 x$ the Index Return $x$ the Participation Rate ${ }^{\dagger}$; provided that this payment (the Additional Amount) will not be less than zero. $\dagger$ The Participation Rate will be determined on the pricing date and will not be less than $325 \%$.
- DIVERSIFICATION OF THE INDEX CURRENCIES - The notes are linked to changes in the value of a group of global currencies (the "Index Currencies") relative to the U.S. dollar and enable you to participate in potential increases in the value of the U.S. dollar relative to the Index Currencies during the term of the notes. The Index derives its value from a group of currencies which currently include the Eurozone euro, the Japanese yen, the British pound, the Canadian dollar, the Swedish krona and the Swiss franc. Each Index Currency is weighted to reflect the general representation of foreign trade between the United States and each country or region whose currency is included in the Index. The following are the current weightings of the Index Currencies as a percentage of the total value of the Index: Eurozone euro-57.6\%; Japanese yen-13.6\%; British pound-11.9\%; Canadian dollar—9.1\%; Swedish krona—4.2\%; Swiss franc—3.6\%.
- TAXED AS CONTINGENT PAYMENT DEBT INSTRUMENTS - You should review carefully the section entitled "Certain U.S. Federal Income Tax Consequences" in the accompanying product supplement no. 13-I. Subject to the limitations described therein, and based on certain factual representations received from us, in the opinion of our special tax counsel, Davis Polk \& Wardwell, the notes will be treated for U.S. federal income tax purposes as "contingent payment debt instruments." You will generally be required to recognize interest income in each year at the "comparable yield," as determined by us, although we may not make any payments with respect to the notes until maturity. Interest included in income will increase your basis in the notes. Generally, amounts received at maturity or earlier sale or disposition in excess of your basis will be treated as additional interest income while any loss will be treated as an ordinary loss to the extent of all previous inclusions with respect to the notes, which will be deductible against other income (e.g., employment and interest income), with the balance treated as capital loss, which may be subject to limitations. Purchasers who are not initial purchasers of notes at the issue price should consult their tax advisers with respect to the tax consequences of an investment in the notes, including the treatment of the difference, if any, between such purchasers' basis in the notes and the notes' adjusted issue price.
- COMPARABLE YIELD AND PROJECTED PAYMENT SCHEDULE - We will determine the comparable yield for the notes and will provide such comparable yield, and the related projected payment schedule, in the final term sheet or pricing supplement for the notes, which we will file with the SEC. If the notes had priced May 23, 2007 and we had determined the comparable yield on that date, it would have been an annual rate of $5.29 \%$, compounded semi-annually. The actual comparable yield that we will determine for the notes may be more or less than $5.29 \%$, and will depend upon a variety of factors, including actual market conditions and our borrowing costs for debt instruments of comparable maturities. Neither the comparable yield nor the projected payment schedule constitutes a representation by us regarding the actual amount, if any, that we will pay on the notes.

## Selected Risk Considerations

An investment in the notes involves significant risks. Investing in the notes is not equivalent to investing directly in the Index or any of the currencies underlying the Index. These risks are explained in more detail in the "Risk Factors" section of the accompanying product supplement no. 13-I dated March 7, 2006.

- CURRENCY MARKET RISK - The return on the notes at maturity is linked to the performance of the Index, and will depend on whether, and the extent to which, the Index Return is positive. Any positive Index Return will depend on the aggregate performance of the U.S. dollar relative to the Index Currencies. The value of any currency, including the Index Currencies, may be affected by complex political and economic factors. The value of the U.S. dollar relative to each Index Currency is, at any moment, the result of the interaction between many factors directly or indirectly affecting economic or political developments in the originating country (or countries) of each Index Currency and the United States, including economic and political developments in other countries. Therefore, in calculating the Ending Index Level, increases in the exchange rate of some of the Index Currencies may be moderated, or more than offset, by lesser increases or decreases in the exchange rate of the other Index Currencies. YOU WILL RECEIVE NO MORE THAN THE FULL PRINCIPAL AMOUNT OF YOUR NOTES AT MATURITY IF THE INDEX RETURN IS ZERO OR NEGATIVE.
- THE NOTES MAY NOT PAY AS MUCH AS AN INVESTMENT IN THE INDIVIDUAL INDEX CURRENCIES - You may receive a lower payment at maturity than you would have received if you had invested in the Index or the Index Currencies individually or contracts related to the Index Currencies for which there is an active secondary market. If the Ending Index Level does not exceed the Initial Index Level, the Additional Amount will be zero. Because the Ending Index Level will be calculated based on the Index closing level on a single business day near the end of the term of the notes, the level of the Index at the maturity date or at other times during the term of the notes could be higher than the Ending Index Level. This difference could be particularly large if there is a significant decrease in the level of the Index during the latter portion of the term of the notes or if there is significant volatility in the Index closing level during the term of the notes, especially on dates near the Observation Date.
- CERTAIN BUILT-IN COSTS ARE LIKELY TO ADVERSELY AFFECT THE VALUE OF THE NOTES PRIOR TO MATURITY - While the payment at maturity described in this term sheet is based on the full principal amount of your notes, the original issue price of the notes includes the agent's commission and the cost of hedging our obligations under the notes through one or more of our affiliates. As a result, the price, if any, at which JPMSI will be willing to purchase notes from you in secondary market transactions, if at all, will likely be lower than the original issue price and any sale prior to the maturity date could result in a substantial loss to you. The notes are not designed to be short-term trading instruments. Accordingly, you should be willing to hold your notes to maturity.
- LACK OF LIQUIDITY - The notes will not be listed on any securities exchange. JPMSI intends to offer to purchase the notes in the secondary market but is not required to do so. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the notes easily. Because other dealers are not likely to make a secondary market for the notes, the price at which you may be able to trade your notes is likely to depend on the price, if any, at which JPMSI is willing to buy the notes.
- POTENTIAL CONFLICTS - We and our affiliates play a variety of roles in connection with the issuance of the notes, including acting as calculation agent and hedging our obligations under the notes. In performing these duties, the economic interests of the calculation agent and other affiliates of ours are potentially adverse to your interests as an investor in the notes.
- MANY ECONOMIC AND MARKET FACTORS WILL IMPACT THE VALUE OF THE NOTES - In addition to the level of the Index on any day, the value of the notes will be affected by a number of economic and market factors that may either offset or magnify each other, including:
- the expected volatility in the Index;
- the time to maturity of the notes;
- interest and yield rates in the market generally as well as in the markets of the countries whose currencies are used to calculate the Index;
- a variety of economic, financial, political, regulatory or judicial events that affect the Index Currencies or economic markets generally and which may affect the Index closing level on any Index Valuation Date;
- the exchange rate and the volatility of the exchange rate among each of the Index Currencies and the U.S. dollar; and
- our creditworthiness, including actual or anticipated downgrades in our credit ratings.

## Sensitivity Analysis - Hypothetical Payment at Maturity for Each \$1,000 Principal Amount Note

The following table illustrates the payment at maturity (including, where relevant, the payment of the Additional Amount) for a $\$ 1,000$ principal amount note for a hypothetical range of performance for the Index Return from -80\% to $+80 \%$ and assumes a Participation Rate of $325 \%$ and an Initial Index Level of 80 . The following results are based solely on the hypothetical example cited. You should consider carefully whether the notes are suitable to your investment goals. The numbers appearing in the table below have been rounded for ease of analysis.

| Ending Index <br> Level | Index Return | Index Return $x$ <br> Participation Rate <br> $(\mathbf{3 2 5 \%})$ | Additional <br> Amount | Principal | Payment at <br> Maturity |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 144 | $80 \%$ | $260.00 \%$ | $\$ 2,600.00$ | + | $\$ 1,000$ | $=$ |
| 136 | $70 \%$ | $227.50 \%$ | $\$ 2,275.00$ | + | $\$ 1,000$ | $=$ |
| 128 | $60 \%$ | $195.00 \%$ | $\$ 1,950.00$ | + | $\$ 1,000$ | $=$ |
| 120 | $50 \%$ | $162.50 \%$ | $\$ 1,625.00$ | + | $\$ 1,000$ | $=$ |
| 112 | $40 \%$ | $130.00 \%$ | $\$ 1,300.00$ | + | $\$ 1,000$ | $=$ |
| 104 | $30 \%$ | $97.50 \%$ | $\$ 975.00$ | + | $\$ 1,000$ | $=$ |

| 96 | $20 \%$ | $65.00 \%$ | $\$ 650.00$ | + | $\$ 1,000$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
| 88 | $10 \%$ | $32.50 \%$ | $\$ 325.00$ | + | $\$ 1,000$ |

## Hypothetical Examples of Amounts Payable at Maturity

The following examples illustrate how the total returns set forth in the table above are calculated.
Example 1: The level of the Index increases from the Initial Index Level of $\mathbf{8 0}$ to an Ending Index Level of 96.
Because the Ending Index Level of 96 is greater than the Initial Index Level of 80, the Additional Amount is equal to $\$ 650$ and the final payment at maturity is equal to $\$ 1,650$ per $\$ 1,000$ principal amount note, calculated as follows:

$$
\$ 1,000+(\$ 1,000 \times[(96-80) / 80] \times 325 \%)=\$ 1,650
$$

## Example 2: The level of the Index decreases from the Initial Index Level of $\mathbf{8 0}$ to an Ending Index Level of 40.

Because the Ending Index Level of 40 is lower than the Initial Index Level of 80, the final payment per $\$ 1,000$ principal amount note at maturity is the principal amount of \$1,000.

Example 3: The level of the Index increases from the Initial Index Level of $\mathbf{8 0}$ to an Ending Index Level of 88.
Because the Ending Index Level of 88 is greater than the Initial Index Level of 80, the Additional Amount is equal to $\$ 325$ and the final payment at maturity is equal to $\$ 1,325$ per $\$ 1,000$ principal amount note, calculated as follows:

$$
\$ 1,000+(\$ 1,000 \times[(88-80) / 80] \times 325 \%)=\$ 1,325
$$

## Historical Information

The following graph shows the historical weekly performance of the Index at approximately 4:00 p.m., New York City time, from January 4, 2002 through May 18, 2007 as shown on Bloomberg page DXY<INDEX>HP. The Index closing level at approximately 11:00 a.m., New York City time on May 23, 2007 was 82.142. We obtained the relevant Index closing levels from Bloomberg Financial Markets and accordingly, make no representation or warranty as to their accuracy or completeness. The historical levels of the Index should not be taken as an indication of future performance, and no assurance can be given as to the closing level of the Index on the Observation Date. We cannot give you assurance that the performance of the Index will result in a payment at maturity of more than the principal amount of your notes.
