#### Item 7.01 Regulation FD Disclosure

On February 25, 2010, JPMorgan Chase & Co. ("JPMorgan Chase" or the "Firm") held an Investor Day during which it provided information to investors about the Firm and its various lines of business.

Exhibit 99.1 is a copy of the slides furnished at, and posted on the Firm's website in connection with, the presentation. The slides are being furnished pursuant to Item 7.01, and the information contained therein shall not be deemed "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, or otherwise subject to the liabilities under that Section. Furthermore, the information contained in Exhibit 99.1 shall not be deemed to be incorporated by reference into the filings of the Firm under the Securities Act of 1933.

The information in, or furnished as an Exhibit to, this Form 8-K contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements are based upon the current beliefs and expectations of JPMorgan Chase's management and are subject to significant risks and uncertainties. Actual results may differ materially from those set forth in the forward-looking statements. Factors that could cause JPMorgan Chase's results to differ materially from those described in the forward-looking statements can be found in JPMorgan Chase's Annual Report on Form 10-K for the year ended December 31, 2009, which has been filed with the Securities and Exchange Commission and is available on JPMorgan Chase's website (www.jpmorganchase.com) and the Securities and Exchange Commission's website (www.sec.gov).

February 25th, 2010

## Disclaimer

#### Forward looking statements

This presentation contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements are based upon the current beliefs and expectations of JPMorgan Chase's management and are subject to significant risks and uncertainties. Actual results may differ from those set forth in the forward-looking statements. Factors that could cause JPMorgan Chase's actual results to differ materially from those described in the forward-looking statements can be found in JPMorgan Chase's Annual Report on Form 10-K for the year ended December 31, 2009, which has been filed with the Securities and Exchange Commission and is available on JPMorgan Chase's website (<u>www.jpmorganchase.com</u>) and on the Securities and Exchange Commission's website (<u>www.sec.gov</u>). JPMorgan Chase does not undertake to update the forward-looking statements to reflect the impact of circumstances or events that may arise after the date of the forward-looking statements.

The 2004 financial information provided in this presentation is presented on a pro forma combined basis, which includes purchase accounting adjustments made in connection with the merger of Bank One Corporation with and into JPMorgan Chase. The 2004 pro forma combined historical results represent how the financial information of JPMorgan Chase and Bank One may have appeared on a combined basis had the two companies been merged as of January 1, 2004. Additional information, including a reconciliation from pro forma results to GAAP, can be found in the Current Report on Form 8-K/A furnished to the Securities and Exchange Commission on July 20, 2005.

FIRM OVERVIEW

8

# Fortress balance sheet extends to balance sheet funding

| Strong Funding<br>and Liquidity<br>Profile | <ul> <li>Very high capital levels</li> <li>\$900B+ of customer deposits covers loans 1.5x</li> <li>IB markets businesses funded with long-term debt to meet cash needs</li> </ul> |
|--|---|
|  | <ul> <li>Liquid investment portfolio and large available collateral pools provide<br/>significant contingency funding sources</li> </ul>  |
|  | Limited reliance on short-term, unsecured funding   |
| Robust Central<br>Treasury                 | <ul> <li>All wholesale funding financing executed centrally to manage maturity<br/>profile, etc.</li> </ul>   |
| Practices                                  | Funds transfer pricing process is controlled centrally to ensure proper and<br>consistent arms-length crediting/charging for liquidity across all LOBs                            |

9

JPM is positioned well for any environment, but execution against key challenges will be critical

Select challenges we face:

- Continued high levels of credit costs in 2010 (at least)
- Economic conditions including high levels of uncertainty
- Legislative and regulatory changes for financial services
- Heightened competition from domestic and foreign banks and non-banks
- Delivering against and beyond growth plans

10

Refinement of standalone business capital requirements validates strong firmwide capital position

| Current <sup>1</sup> | New   | 0//11)  |
|----------------------|---|---|
|                      |   | O/(U)   |

- Standalone capital levels, unique to each LOB, refined to incorporate Tier 1 Common expectations
- Standalone capital levels based on consideration of a number of different factors including:
  - Comparison to peer capital levels by business
  - Level of loan loss reserves
  - LOB earnings power and ability to generate capital over time
  - Economic risk capital

Strong capital position today will be further strengthened by significant earnings and need for lower reserve levels over time

 $^1$  Pro forma Year-end 2009 updated for elements of the new methodology  $^2$  Calculated based on Tier 1 Common

We expect to deliver strong returns across all businesses

1 ROE at Performance Target calculated using target metric and Steady State assumptions. Steady State reflects fully normalized credit and the completion of the run-off in the loan portfolios

14

# Significant earnings upside if the Firm reaches performance targets Steady State reflects normalized credit and stable loan portfolios

Earnings growth will result in significant capital generation

Excess capital provides flexibility for dividend increases, share buybacks, new investments & acquisitions

<sup>1</sup> Net income projections based on performance target and steady state assumptions; additional assumptions were made for TSS and AM ROE targets including Steady State revenue and tax rate

# Agenda

#### Consumer Lending (\$ in billions)

|  | 2007    | 2008    | 2009    |
|--|---------|---------|---------|
| Credit Metrics                           |         |         |         |
| NCO Rate (excl. credit-impaired)         | 0.67%   | 2.08%   | 3.68%   |
| ALL/Loans (excl. credit-impaired)        | 1.24%   | 3.16%   | 5.04%   |
| Key Statistics                           |         |         |         |
| Home Equity Originations                 | \$48.3  | \$16.3  | \$2.4   |
| Avg Home Equity Loans Owned <sup>1</sup> | \$90.4  | \$107.0 | \$135.9 |
| Mortgage Loan Originations               | \$159.4 | \$169.0 | \$150.7 |
| Avg Mortgage Loans Owned <sup>1,2</sup>  | \$36.2  | \$77.4  | \$142.2 |
| 3rd Party Mtg Loans Svc'd (EOP)          | \$615   | \$1,173 | \$1,082 |
| Auto Originations                        | \$21.3  | \$19.4  | \$23.7  |
| Avg Auto Loans                           | \$41.1  | \$43.8  | \$43.6  |

#### Average deposits of \$340.8B up 39% YoY

- YoY increase largely due to the impact of the WaMu transaction
  Deposit margin expansion reflects disciplined pricing strategy and a
- portfolio shift to wider spread deposit products
- Branch production statistics:
  - Checking accounts up 5% YoY
  - Credit card sales up 3% YoY
  - Mortgage originations up 84% YoY
  - Investment sales up 23% YoY

Total Consumer Lending originations of \$181.0B:

Mortgage loan originations down 11% YoY

Auto originations up 22% YoY:

YoY increase driven by market share gains in Prime segments and new manufacturing relationships

#### 3rd party mortgage loans serviced down 8% YoY

APP ENDIX

Includes purchased credit-impaired loans acquired as part of the WaMu transaction
 Does not include held-for-sale loans

14,798

<sup>5</sup> Source: National Mortgage News, 3009

<sup>6</sup> Source: Autocount (including captives), YTD December 2009

#### Leadership positions

- #3 in deposit market share <sup>2</sup>
- #3 in Branch network<sup>3</sup>

#### #3 in Mortgage Servicing

#### Growth initiatives

- Build-out WaMu footprint
  - Create a consistent customer experience
  - Build and train sales force
  - Expand product breadth and service capabilities (i.e., investments sales, small business lending)

#3 in Mortgage Originations

#1 in Auto Finance

#3 in Home Equity Originations

9.2% market share in Mortgage Originations<sup>4</sup>

- Ramping up new build capacity; 120+ new builds in 2010
- Continue to focus on attractive segments (e.g., increase share of affluent investments, small business lending)
- Drive customer engagement through products and service innovation (e.g., mobile banking, credit and debit rewards)

#### Outlook

- NSF/OD policy changes estimated to reduce annualized net income by \$500mm +/-
- Home Lending portfolio expected to decline by 10-15%, reducing net interest income by \$1B +/-
- Credit environment remains uncertain
- Signs of stability ≠ improvement
- Over next several quarters, quarterly losses could reach:
  - \$1.4B for Home Equity
  - \$600mm for Prime Mortgage
- \$500mm for Subprime Mortgage
- Continued elevation in credit-related expense
- Expense remains modestly above 2009 levels, reflecting investments in branch new builds and sales force hires

19

| <sup>1</sup> Calculated based on average equity |          |          |           |

<sup>2</sup> Excludes WaMu
 <sup>3</sup> Source: Based on internal JPM estimates

- 20% market share of General Purpose Credit Card outstandings<sup>2</sup>
- 17.3% market share of sales volume <sup>2</sup>
- #1 co-brand card issuer in the U.S.<sup>3</sup>
- #1 merchant acquirer in e-commerce payment processing<sup>3</sup>

#### **Growth initiatives**

- Continue to focus on increasing customer engagement
  - Capture benefits from recent product launches
  - Increase penetration of Retail channel including newly converted WaMu branches
- Establish Ultimate Rewards as a core relationship tool
- Leverage co-brand partnerships to enhance the brand and drive engagement of affluent customers

#### Outlook

- Chase losses could approach 11% in 1Q10, including the adverse timing effect of payment holiday of approx. 60bps, with improving trend in 2Q10; 2H10 dependent on environment
- WaMu losses could approach 24% +/- over the next several quarters
- Anticipate net income reduction from legislative changes of \$500-\$750mm
- Estimated full year average outstandings expected to decline 10-15% in 2010 due to run-off of WaMu portfolio and lower yielding promotional balances
- Expect \$1B +/- net loss in 1Q10 with improving trend in 2Q10, before potential reserve actions; 2H10 dependent on the environment and reserve actions
- Continue to invest in the business
  - 20

#### Leadership positions

- Maintained middle market top 3 leadership position nationally in market penetration and lead share<sup>4</sup>
  - #1 in lead share and market penetration in 3 of the top 4 MSAs
  - Top 2 leading provider of Treasury Services products and international services to middle market clients
- Top 3 asset-based lending lead arranger in the U.S.<sup>5</sup>
- #1 multi-family lender in the U.S.<sup>6</sup>

#### Growth initiatives

- Build out Middle Market business in the expanded WaMu branch network and grow sales force
  - Targeting growth in distinct geographies within California, Florida, Georgia, Oregon and Washington
- Continue to grow Mid-Corporate segment: focus on prospect conversions, expand international revenue and capitalize on opportunities to cross-sell IB products
- Invest in commercial real estate recovery: prepare business to capitalize on opportunities

#### Outlook

- Strong reserves, but credit expected to remain at elevated levels
  - 21

- A. Financial results are presented on a managed basis, as such basis is described in the Firm's Annual Report on Form 10-K for the year ended December 31, 2009.
- B. All non-GAAP financial measures included in this presentation are provided to assist readers in understanding certain trend information. Additional information concerning such non-GAAP financial measures can be found herein, to which reference is hereby made.
- C. The ratio for the allowance for loan losses to end-of-period loans excludes the following: loans accounted for at fair value and loans held-for-sale; purchased credit-impaired loans; the allowance for loan losses related to purchased credit-impaired loans; and, loans from the Washington Mutual Master Trust, which were consolidated on the firm's balance sheet at fair value during the second quarter of 2009. Additionally, Consumer Lending net charge-off rates exclude the impact of purchased credit-impaired loans. The allowance related to the purchased credit-impaired portfolio was \$1.6 billion at December 31, 2009.
- D. Tier 1 Common Capital ("Tier 1 Common") is defined as Tier 1 capital less elements of capital not in the form of common equity such as qualifying perpetual preferred stock, qualifying noncontrolling interest in subsidiaries and qualifying trust preferred capital debt securities. Tier 1 common capital, a non-GAAP financial measure, is used by banking regulators, investors and analysts to assess and compare the quality and composition of the Firm's capital with the capital of other financial services companies. The Firm uses Tier 1 common capital along with the other capital measures to assess and monitor its capital position.

# Leadership in 2009

8

**Emerging Markets** 

#### 009 client support

- Provided critical capital raising
  - Cemex follow-on
  - Sappi refinancing
  - Petrobras bond
  - VisaNet (now Cielo), the largest Brazilian IPO ever
- Re-opened key emerging markets
  - Hong Kong IPO, Asia High Yield, LBO
- Led 8 of 10 largest Asia primary equity deals
  - Raised \$20B for corporate recapitalizations in Asia
- Sovereign debt issuance for Brazil, Mexico, Qatar and South Africa

#### 2010 priorities

- Expand local client coverage; add onshore bankers
- Build cash equities and derivatives Russia, Brazil, China, India, Taiwan, Korea
- Focus on local debt and Fixed Income flows
- Deliver the firm through cross-selling and Global Corporate Banking

9

Commodities - RBS Sempra acquisition

#### ransaction overview

- Acquiring global metals, global oil and European power and gas assets of RBS Sempra Commodities
  - Closing in 2Q10, subject to regulatory approvals
  - Expected to pay \$1.7B subject to distributions prior to closing
  - Immediately profitable after closing

#### Rationale

- Highly complementary to our existing Global Commodities business
- Allows us to deliver more comprehensive solutions to our clients globally
- Nearly doubles the number of corporate clients
- Diversifies our Fixed Income earnings

10

Commodities – RBS Sempra acquisition

|             | EMEA Power & Gas |           | Base Metals |         | Global Oil |           |

11

Technology - \$1B investment

#### 2009 progress

- Completed Bear Stearns merger
  - Migrated 600,000 OTC Derivatives positions
  - Mapped over 14,000 clients and converted 465,000 total accounts
- Launched state-of-the-art platforms for FX Options, Brazil and Prime Services
- Consolidated infrastructure in US Cash Equities and Commodities
- Processed record volumes, up 82% from pre-merger levels

#### 2010 priorities

- Execute three-year Strategic Reengineering Program focused on:
  - Next-generation front-end derivative and emerging market trading platforms
  - OTC clearing requirements
  - Core processing infrastructure
- Build-out electronic and algorithmic trading infrastructure for Equities
- Implement Prime Services offering globally, including Synthetic Prime Brokerage
- Implement global location strategy

12

#### Our derivatives business remains client-focused

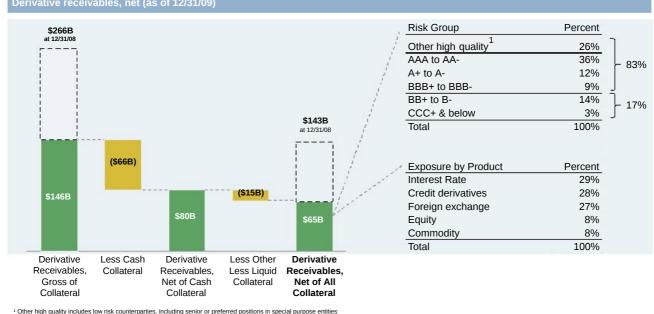

- Derivatives widely used by corporations, governments, agencies and supra-nationals to manage risk and lower the cost of capital
- Derivative receivables, gross of collateral, declined by 45% to \$146B at year-end 2009

13

#### Counterparty exposure is well managed

- Net exposure declined by 55% while revenue increased over 25% year-over-year
- Net derivative receivables represent less than 10% of IB assets at year-end 2009
- IB Level 3 assets, including derivatives, declined over 15% during 2009

<sup>1</sup> Other high quality includes low risk counterparties, including senior or preferred positions in special purpose entities

14

#### Reform we advocate

- Comprehensive, rigorous oversight of all dealers and large market participants
- Transaction reporting for all trades to regulators
- Mandatory clearing of most standardized, highly liquid derivative contracts between dealers and major swap participants

Regulation we believe would be harmful to the economy

- Clearing for all OTC derivative:
  - Disadvantages corporates by tying up liquidity
  - Will divert funding away from job creation
- Exchange trading for all derivatives
  - Even standardized liquid contracts not amenable to exchange trading

Leading the market evolution

- Actively participating in strengthening OTC market infrastructure
- Investing in technology to provide clients superior access to liquidity

- Expect Fixed Income margin compression and reduced capital raising
- Target ROE of 17% +/-
- Focus on growth initiatives:
  - Emerging Markets
  - Commodities
  - Technology
- Maintain leading share through vigilant client focus

16

#### TREASURY & SECURITIES SERVICES

Heidi Miller, Treasury & Securities Services Chief Executive Officer

February 25, 2010

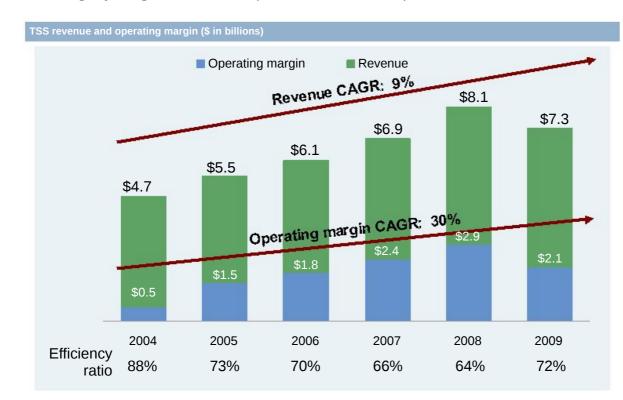

1

International expansion

Global Corporate Bank

- World class market leading franchise
- Strong organic revenue and profit growth over past 5 years
- Truly global business with ~50% of revenue non-US
- High return, low capital intensity, scale advantages
- Stable, annuity-like revenue stream
- Significant client and platform leverage across the firm

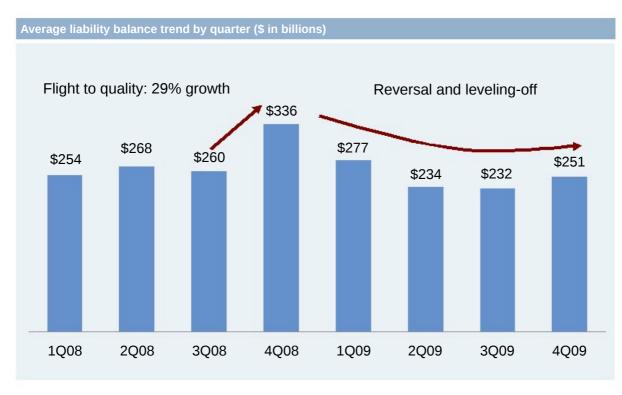

2

TSS – strong 5-year growth trend despite market-driven impact to revenue in 2009

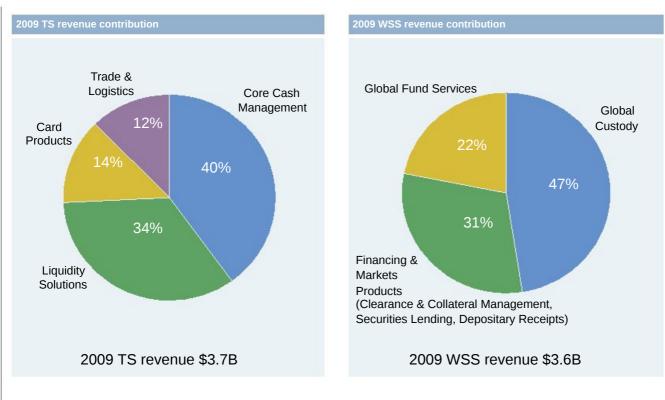

3

# "Flight to quality" impact leveled off

4

## TSS - complete and diversified product set

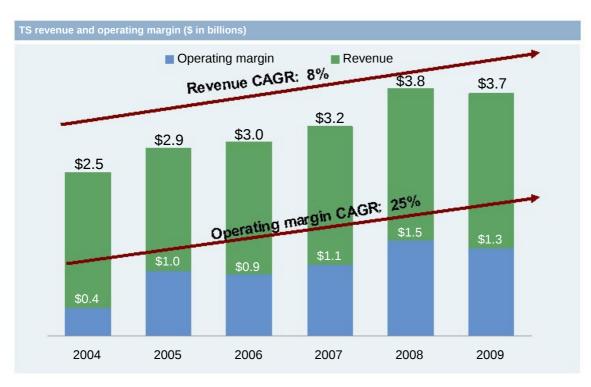

TREASURY & SECURITIES SERVICES

5

TSS - and we continue to win in the market place

#### TS – strong upward trajectory over the period despite deposit spread compression

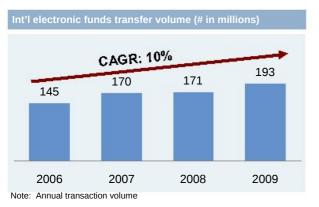

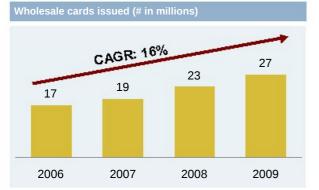

7

Balances and spreads down

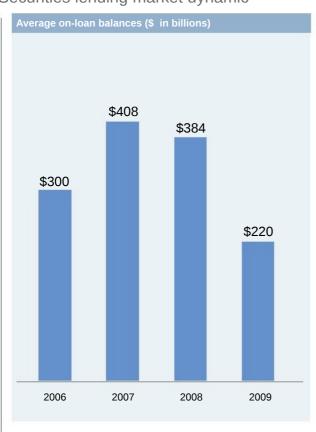

- Securities lending on-loan balances and spreads down
- Decline in FX volatility

Asset levels down due to equity market levels, but net AUC flows positive

# Securities lending market dynamic

#### ecurities lending dynamics

- Balances have declined approximately 40% since end of 2008, driven by:
  - Lower demand from Broker/Dealers
  - Client restrictions on investments and counterparties
  - Government and regulatory actions, which have reduced demand or eliminated economics
- Revenue fell in 2009 due to:
  - Lower balances
  - Lower yield on cash collateral investments due to Fed Funds / LIBOR spread compression and increased client risk aversion
  - Lower intrinsic value for US Treasury securities
  - Lower dividend season revenue
- Industry dynamics

15

 Higher value placed on transparency and risk mitigation - movement to cash vs. security collateral

21,611

2008

CAGR: 18%

15,841

2007

13,428

2006

# TSS continues to focus on international growth

 $\ensuremath{\mathsf{TSS}}$  – a "bankers' bank", but focused on meeting the needs of the world's largest companies

#### Client needs

- Support for increasingly complex international operations
  - Multiple regional/local offices
  - Numerous banking relationships
- Cash visibility
- Liquidity and credit access
- Cash and payments concentration
- Comprehensive working capital and supply chain and risk management solutions
- Risk management (e.g. direct clearing as a sub-custodian)

| Areas of focus for 2010 |
|-------------------------|
| Footprint               |
| Capabilities            |
| Coverage                |
| Credit                  |

22

## Global Corporate Bank – acceleration underway

#### What is it?

A business JV between TSS and the IB to manage corporate banking relationships with approximately 3,000 of the world's largest companies Focus products

- Cash Management
- Liquidity / credit access
- Trade Finance
- Working Capital / Syndicated Lending
- FX

- Derivatives
- Commodities
- Debt Capital Markets
- Local Currency Services

#### Required build out

- More local Corporate Banking coverage
- Footprint additions and branch upgrades
- Increased credit and support infrastructure to support balance sheet growth
- Local treasury operations

- 2009 performance largely market-driven
- Underlying drivers of our business are strong
- A mid-30s% pretax margin still a target
- We continue to invest aggressively in our business
- International expansion and meeting the needs of our largest clients remain top priorities

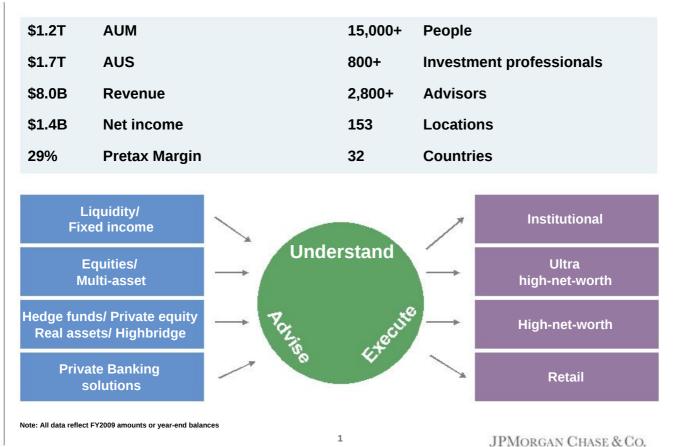

24

#### ASSET MANAGEMENT

Mary Erdoes, Asset Management Chief Executive Officer

February 25, 2010

## Who we are: an integrated manufacturer and distributor of multiple alpha sources

### The depth of the performance-based culture

- 800+ investment professionals: 58% US / 42% International
- 14-year average industry experience; 20%+ over 20 years
- Consistent long-term focus; continuous refinement

## The breadth of distribution globally

- Over 2,800 distribution personnel worldwide covering:
  - Institutions (pension funds, sovereigns, corporates, endowments)
  - Ultra-high-net-worth (in 17 countries)
  - High-net-worth (81 offices across the US)
  - Retail (direct and indirect across 7 major fund platforms)

## The innovation and power of the platform

- Cash: first to launch a AAA-rated money market fund in China
- Fixed income: Strategic Income Opportunity Funds launched last year, now \$8B+
- Equities: fundamental 130/30 was first of its kind, now #1 globally in AUM
- Highbridge: statistical arbitrage engine as basis for \$8B mutual fund platform
- Private Equity: secondary fund launch of \$800mm
- Global Access Portfolios: doubled to \$7.5B in 15 months

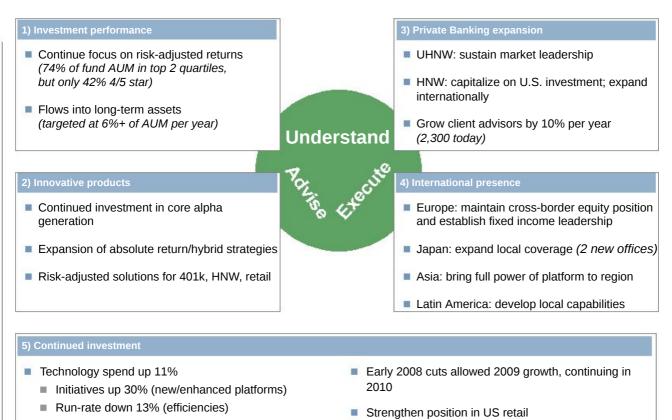

2

3

#### ...where we are headed: 2010 Priorities

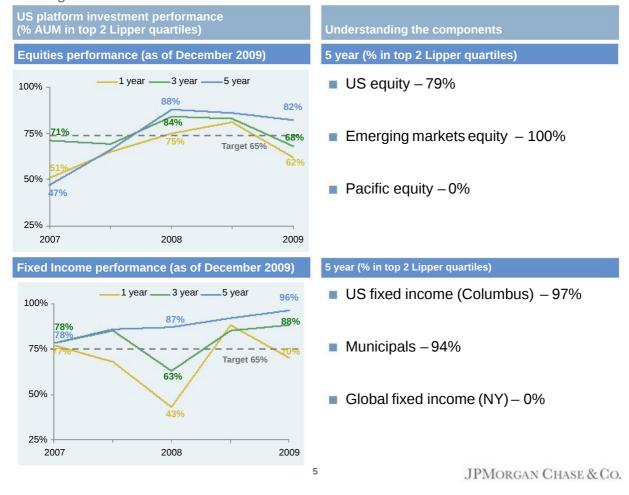

Leverage firmwide capabilities

ASSET MANAGEMENT

4

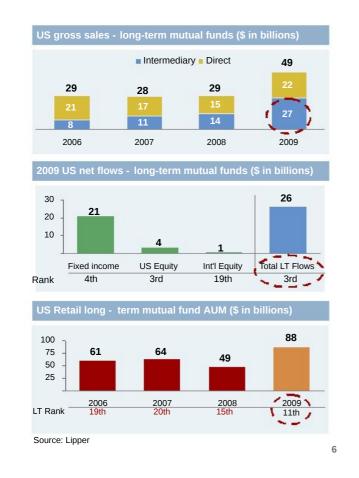

## Investment performance

#### Maintain highest focus...

## US Retail distribution

Long-term investment is now paying dividends...

#### Highlights

- 2009 record results for long-term mutual fund flows; #3 in industry
- #4 US mutual fund family based on 5-year performance (Barron's); 60% of US AUM is rated either 4 or 5 stars
- Aggressive efforts to establish top 5 position in long-term AUM
- Top 10 industry-wide for number of wholesalers, expected to grow by 30%
- Focus
  - Hiring and training
  - Further penetration of traditional products
  - Innovative products (retirement, long/short, inflation, commodities)

## Private Banking

Continue outperformance and outstanding service...

## Highlights

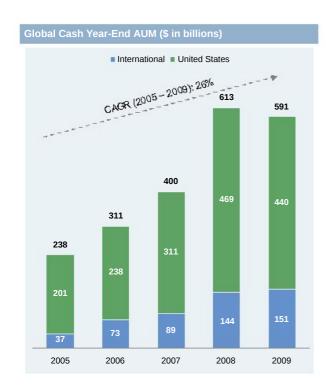

- Client advisor headcount continually increasing; 800+ people over 5 years
- Positive AUS flows every year, totaling \$158B since 2005
- Expense management discipline:
  - Front office headcount: 5% CAGR
  - Non-front office headcount: 2% CAGR
- Credit losses in line with expected stresses through the cycle
- Pretax margin less volatile than competitors
- Focus

7

- Hiring and training
- WaMu footprint
- International HNW
- Product innovation (especially for HNW)

## Liquidity

Extending our leadership position...

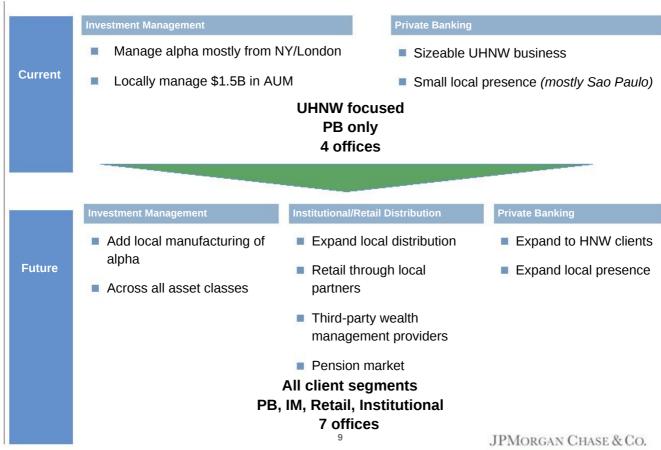

#### Highlights

- Largest global money fund manager
- Largest money fund globally (prime money market fund \$168B)
- Regulatory changes SEC money market regulations (business as usual)
- Focus

8

- Managing expected outflows
- Watching potential areas of concern
  - Floating NAVs
  - Capital against funds
  - Low rate environment/fee compression
- Develop local onshore products for emerging markets

#### International expansion: Brazil case study

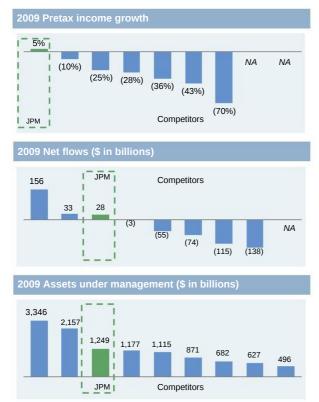

# International expansion: Asia

| Japan<br>(since 1971) | <ul> <li>#1 largest foreign asset management firm</li> <li>Major distributor of hybrid products into Japan</li> <li>Butlocal Japanese equities has to improve performance</li> </ul> |
|-----------------------|--|
| (since 1985)          | <ul> <li>#1 largest foreign asset management firm</li> <li>#1 internet seller of mutual funds</li> <li>Butonly \$11B in AUM, room to grow</li> </ul>                                 |
| China<br>(since 2004) | <ul> <li>#3 largest foreign JV asset management firm</li> <li>#1 AAA-rated money fund provider</li> <li>Buta long way to #1</li> </ul>   |
| Korea<br>(since 2006) | <ul><li>#3 international equity retail flows</li><li>Butranked #31 in total AUM</li></ul>  |

10

## Competitive comparison and global standing

#### External recognition

#### Global

- #1 global money market fund manager (*iMoneyNet*)
- #2 US-based global hedge fund manager (Absolute Return)
- #1 global provider for UHNW clients (*Euromoney*)

#### United States

#4 mutual fund family (<u>Barron's</u>)

#### Europe

 "Gold Standard Award for Funds Management" (Incisive media (UK)); (Only firm ever to win seven Gold Standard awards)

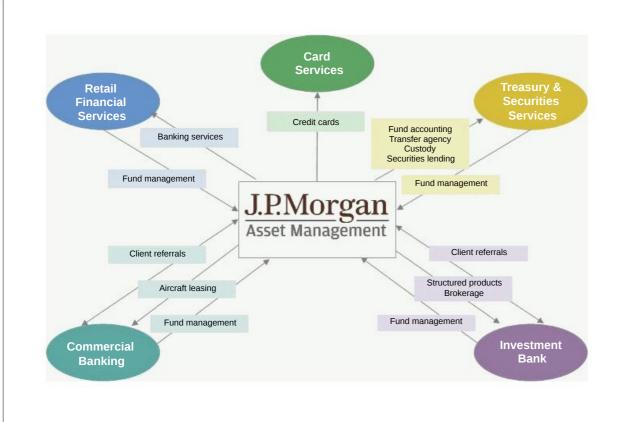

#### 🔳 Asia

- "Asset Management Company of the Year" (*The Asset*)
- "Best overall performing foreign asset manager operating in China" (PriceWaterhouseCoopers survey)
- #1 Private Bank in Asia (Asia Risk Magazine)

Note: Competitors include AllianceBernstein, BlackRock, BNY Mellon, Credit Suisse, Goldman Sachs AM, Legg Mason, Northern Trust, UBS

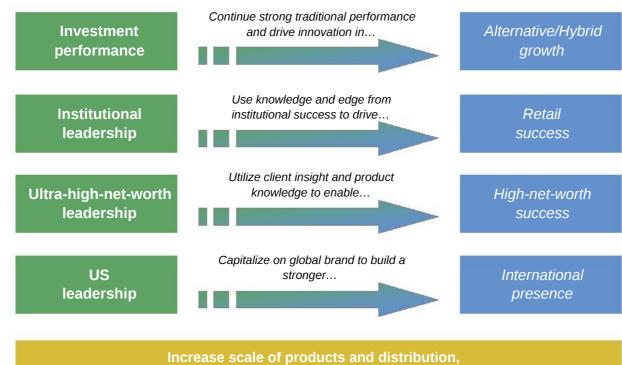

11

## Asset Management greatly benefits from the power of the JPM network

12

Conclusion

capitalizing on investments made in this highly leverageable business

|                       |      |
| Appendix              | 22   |

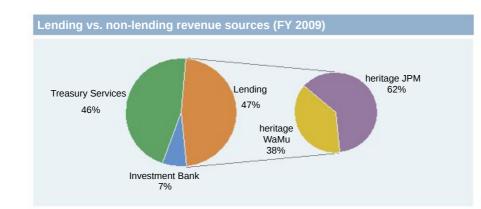

1

## Consistency of earnings through positive operating leverage

2

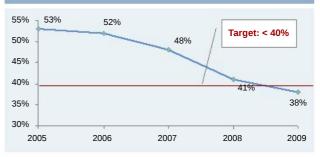

## Key performance metrics

overhead ratio **trend** with target metrics

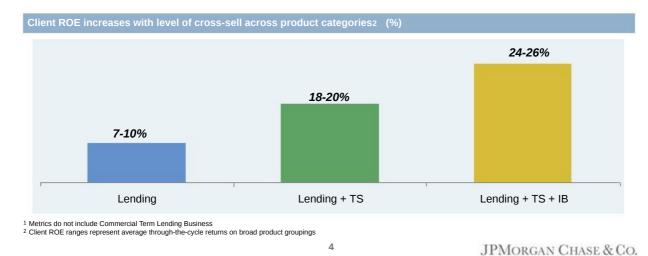

3

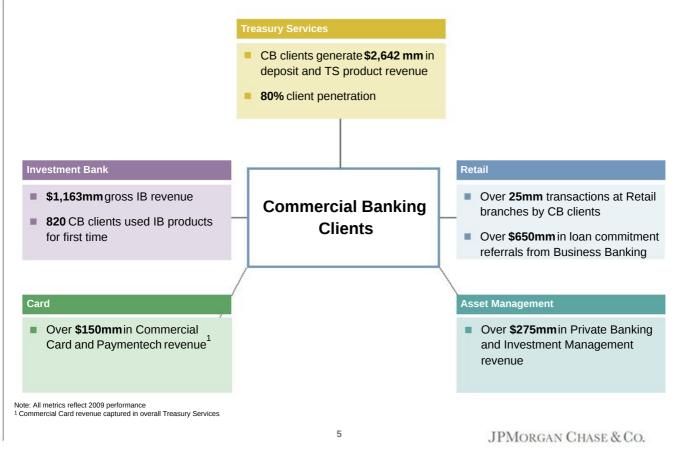

## Profile of a Chase Commercial Banking client

#### Highlights

- Total CB relationships = 55,000
  - 25,000 Middle Market, Mid-Corporate, and Real Estate Banking clients
  - 30,000 Commercial Term Lending relationships
- Average relationship tenor<sup>1</sup> = 18 years +
- In 2009, 1,700 new relationships and over 7,600 expanded relationships<sup>1</sup>
- Average products used per relationship<sup>1</sup> = 7+

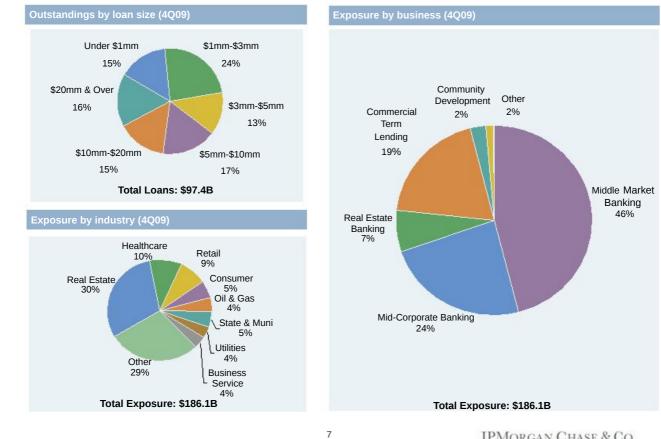

## Cross-LOB impact of Commercial Banking clients

## Conservative client selection and portfolio diversification = moderate credit risk

Dynamic portfolio management produces credit diversity and granularity, minimizing risk of earnings volatility

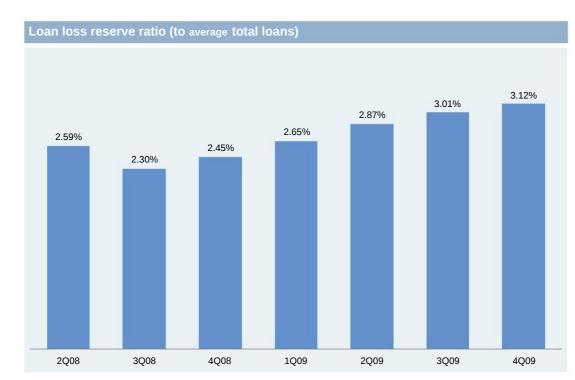

2009 Performance against peers confirms our strategic differences in client portfolio and risk tolerance

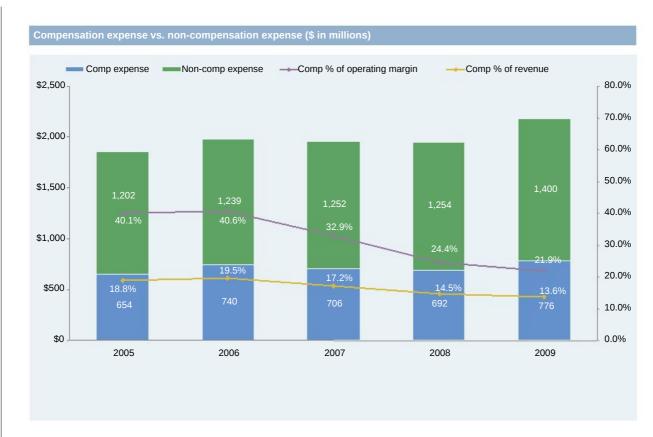

Note: Metrics calculated based on FY 2009 performance, NCO ratios based on average loan balances, NPL ratios based on ending loan balances Peer group includes: BAC, COF, CMA, FITB, KEY, PNC, STI, USB, WFC, ZION CRE defined as Real Estate Banking, Commercial Term Lending, and Community Development. C&I defined as Middle Market, Mid-Corporate, and all other Commercial Banking businesses

8

## Reserve policy supports our "through-the-cycle" mentality

9

## Expense discipline and earnings-driven compensation

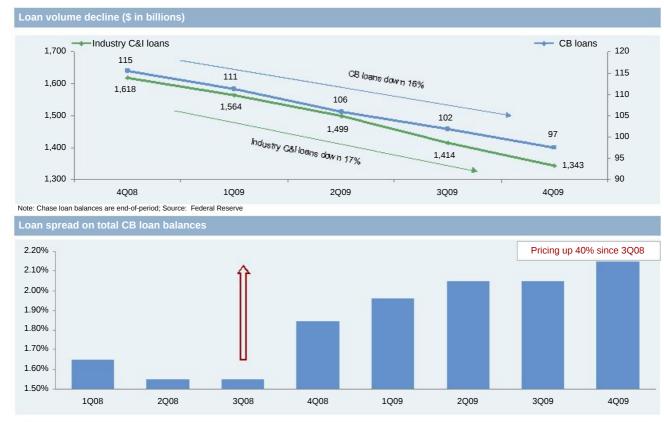

10

|                       |      |
| Appendix              | 22   |

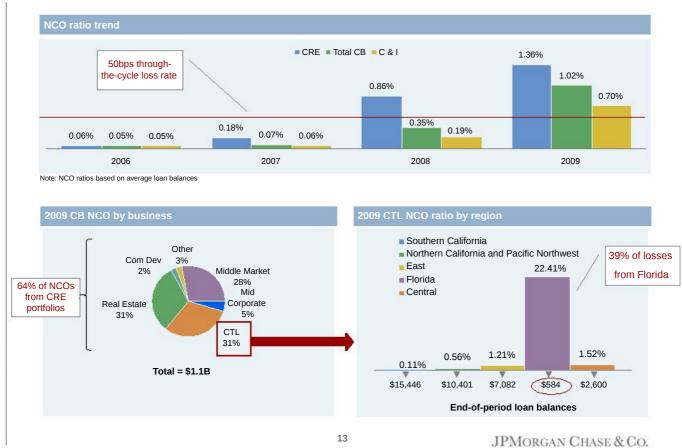

11

## Pricing improvement has offset weakened loan demand

12

## 2009 credit costs driven by commercial real estate

#### Highlights

#### Commercial Term Lending (64% of CRE)

- Stable, seasoned multi-family concentration
- Fully underwritten, "cash flow" lending
- Supply-constrained markets / renters by necessity
- 2009 charge-off rate: 0.91%
  - 0.57% without Florida

#### Real Estate Banking (22% of CRE)

- Institutional grade Real Estate investors and developers
- 2009 charge-off rate: 2.87%

#### Community Development (7% of CRE)

- Low-to-moderate income housing and community redevelopment
- 2009 charge-off rate: 0.80%

#### Middle Market/Mid-Corporate (7% of CRE)

- Investment real estate tied to commercial relationships
- 2009 charge-off rate: minimal

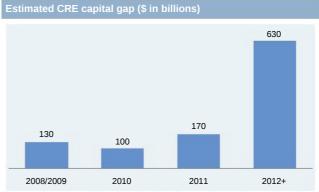

|                                  | Loans  | Exposure |
|----------------------------------|--------|----------|
| Commercial Term Lending          | \$35.6 | \$35.6   |
| For sale housing                 | 0.7    | 1.2      |
| Commercial constr/develop        | 9.7    | 11.4     |
| Real Estate Banking              | 10.4   | 12.6     |
| REB as of % of total CB exposure | 11%    | 7%       |
| Community Development Banking    | 2.3    | 3.8      |
| Middle Market & Mid-Corporate    | 3.2    | 4.1      |
| Total CRE exposure & loans       | \$51.5 | \$56.1   |
| Percentage of total CB exposure  |        | 30%      |

2009 end-of-period balances (\$ in billions)

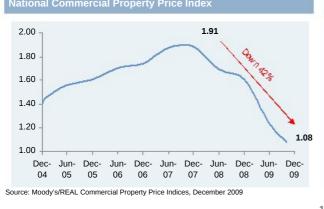

14

## US commercial real estate industry outlook

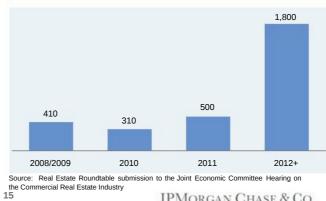

- Fundamentals not improving
- Massive debt maturity problem; refinancing likely requires equity/debt mark-downs
- Diminished CRE bank lending appetite
- Value disconnect between buyers and sellers
- Banks and borrowers: Amend, Pretend, Extend

Source: Real Estate Roundtable submission to the Joint Economic Committee Hearing on the Commercial Real Estate Industry

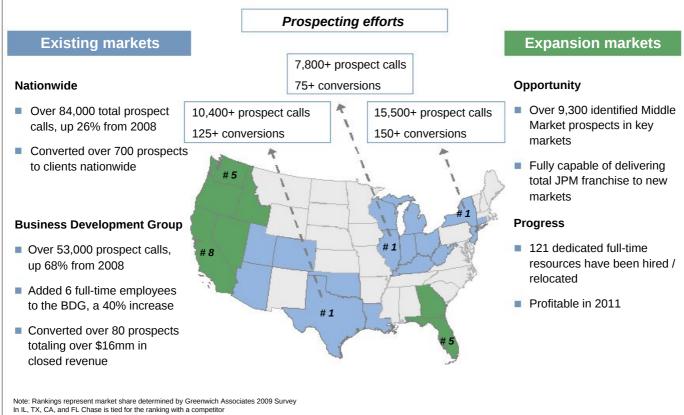

# Agenda

|                       | Page |

|                       |      |

16

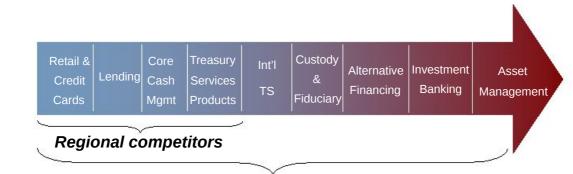

While strong prospecting efforts in mature markets continue, expansion markets provide significant opportunity

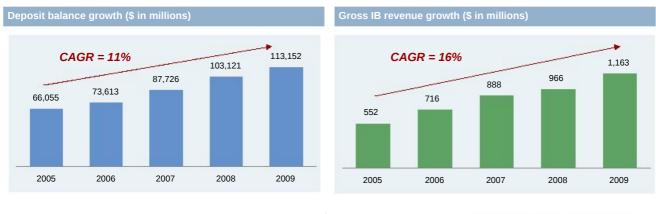

GROWTH OPPORTUNITIES

17

## Differentiated product capabilities continue to drive growth

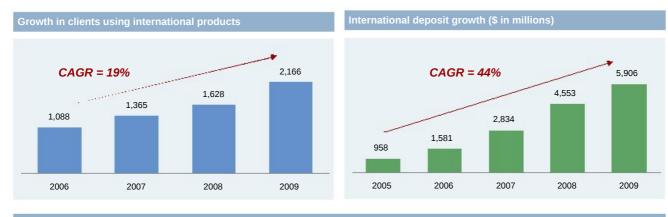

# JPM product capabilities

18

## International capabilities are a key differentiator

19

#### Highlights

#### CB clients have growing international banking requirements

- Companies between \$200mm-\$1B in sales
  - **65%**<sup>1</sup> expect non-US revenue increase in 5 years
  - 60%<sup>1</sup> plan to expand overseas in next 5 years

#### Weak and distracted competitors provide opportunity

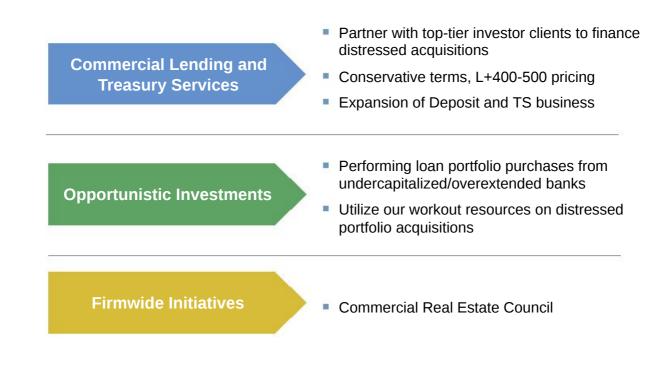

- Increase penetration with current client base
  - An estimated 6,000 clients have meaningful international operations
  - We only do business overseas with one-third

<sup>1</sup> Results from 2009 KPMG Survey on Global Expansion

#### Healthy balance sheet positions us to invest opportunistically

#### Representative example for Commercial Real Estate opportunities

20

#### Great client franchise; low risk and stable earnings

- Loyal, conservative, experienced business owners
- Reliance on bank as primary capital provider/trusted advisor

#### High demand for JPM's full suite of products

- Non-lending revenue growth outpaces more RWA-dependent growth
- Prolific referral targets for IB, TSS, Card, AM

#### Significant benefits and economies of scale

- Risk management: portfolio granularity and distribution
- Self-funding client base
- Expense highly correlated to earnings
- Positive operating leverage

#### Ongoing opportunities for growth

- Expansion markets
- Increasing market share
- Opportunistic investing in recovery

# Agenda

### Commercial Banking organizational overview

#### **Customer segments**

- Middle Market Banking: Commercial, municipal, community financial institutions and not-for-profit clients; annual revenue generally between \$10mm and \$500mm
- Mid-Corporate Banking: Clients with broader, international banking and investment banking needs; annual revenue generally between \$500mm and \$2B
- Real Estate Banking: Full service banking to investors and developers of institutional-grade real estate properties
- Commercial Term Lending: Term financing to real estate investors/owners, primarilymultifamily, but also office, retail and industrial properties

#### **Product specialties**

- Chase Business Credit: Asset Based Lending (ABL) business generally secured and governed by the borrower's accounts receivable and inventory
- **Equipment Leasing:** Term financing for corporate and high-net-worth clients: aircraft, machinery, and other equipment
- Community Development Banking: Community development finance for affordable housing and economic development projects
- Chase Capital Corp: Mezzanine financing for commercial clients

#### CARD SERVICES

Gordon Smith, Card Services Chief Executive Officer

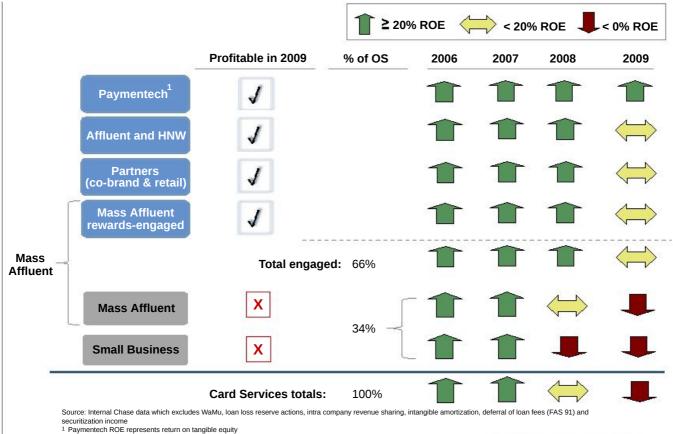

February 25, 2010

- The majority of our business segments have remained profitable through the cycle
- Specific strategies are in place to improve the unprofitable business segments
- We are seeing early signs that credit trends are improving across all stages of delinquency
- Implementation of the majority of provisions in the CARD Act is complete
- Consumer spending is recovering slowly across all income segments, most industry categories and geographies
- The strategic priorities outlined in 2008 are in market, positioning us for growth in a post-CARD Act environment

1

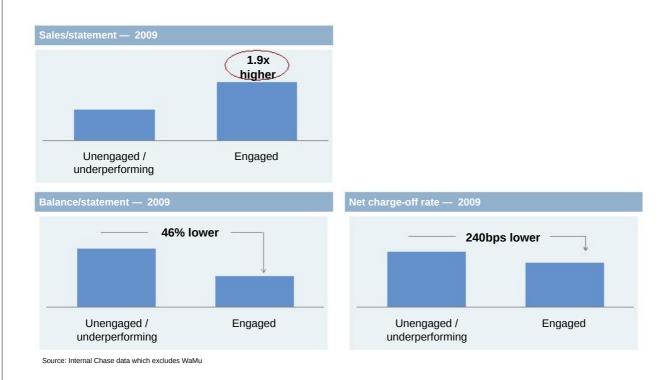

Our ROE target is 20% +/-

4 of our 6 business segments remained profitable through the cycle and those business segments have also shown strong historical performance

2

## In 2009, the rewards-engaged customers outperformed across all key metrics

3

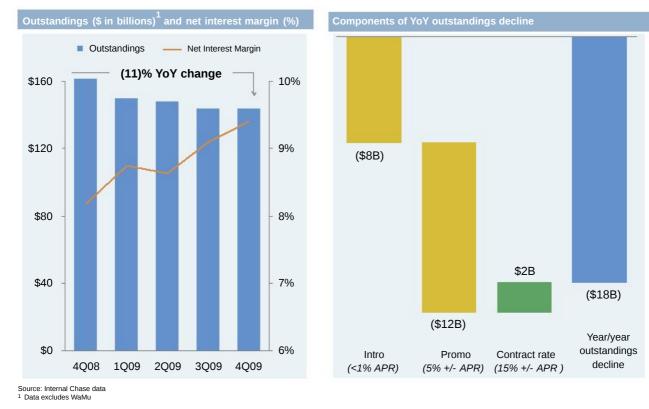

# Strategies are in place to drive improved performance in the underperforming businesses

Through the cycle, we expect returns on the rewards engaged business to return close to historical levels, which exceed our ROE targets

4

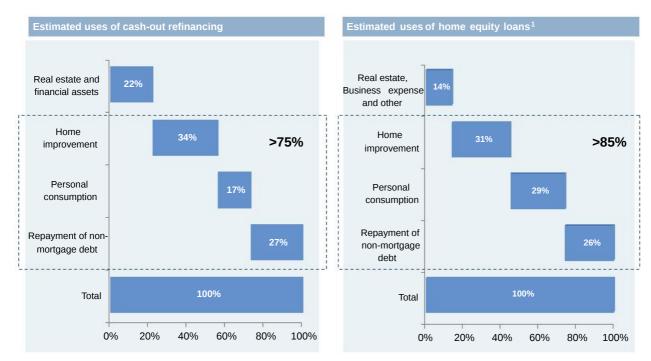

- We have focused on retooling the underperforming businesses:
  - Small business:
    - Invest in unique tools, strategies and infrastructure
    - Launch new products (Ink)
    - Deploy new customer engagement strategies
  - Mass Affluent non-rewards and unengaged customer strategies
    - Implement segment specific risk management strategies
    - Utilize Blueprint to increase overall customer engagement
    - Incorporate income and debt levels into portfolio analytics

#### Outstandings attrition has come largely from low margin loans

5

Historically, a large portion of proceeds from cash-out refinancing and home equity loans were used for personal consumption and to repay non-mortgage debt

Source: 2007 Federal Reserve publication "Sources and Uses of Equity Extracted from Homes"  $^1$  Home equity loans include both closed-end home equity loans and home equity lines of credit

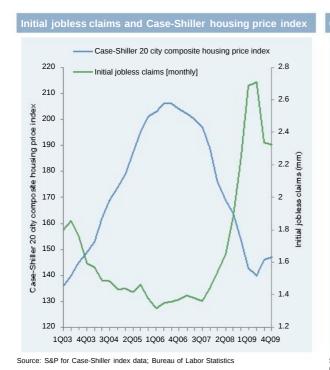

6

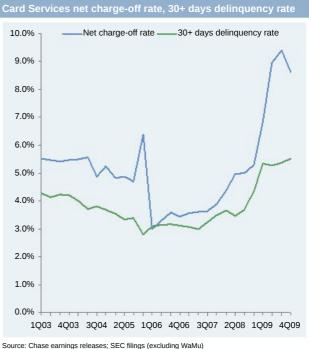

# Agenda

|                              |      |
| Strategy — Progress to date  | 34   |

7

As initial jobless claims and housing prices stabilize, credit losses show signs of improvement

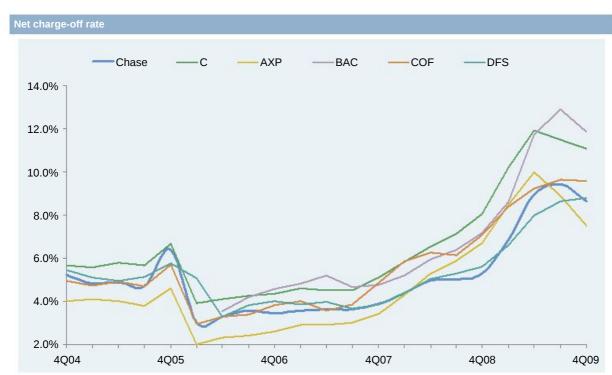

Source: Chase earnings releases; SEC filings (excluding WaMu) Note: Data includes the timing benefit of the payment holiday (approximately 60bps for net charge-off rate and 20bps for 30+ days delinquency)

8

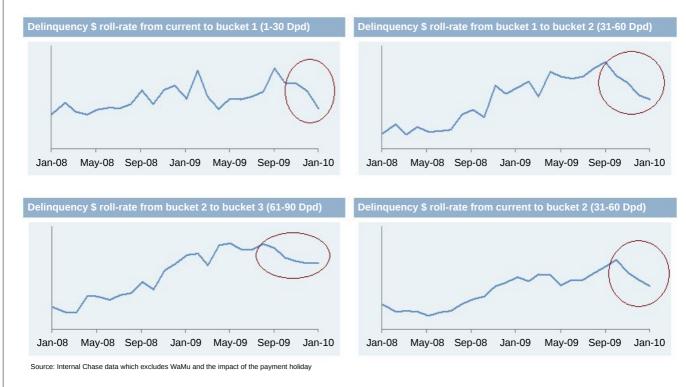

Credit losses have continued to stay at the lower end of the competitive range

Source: Earnings releases; SEC filings Note: Internal Chase data which excludes WaMu and includes the timing benefit of the payment holiday of approximately 60bps in 4Q09

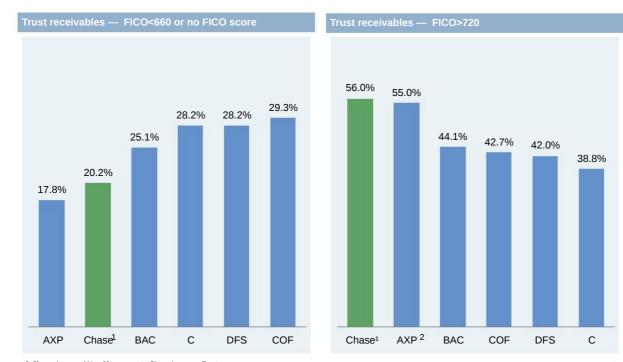

9

#### Roll-rate improvements are being observed in early delinquency buckets

10

## We continue to maintain strong portfolio quality vs. our competitors

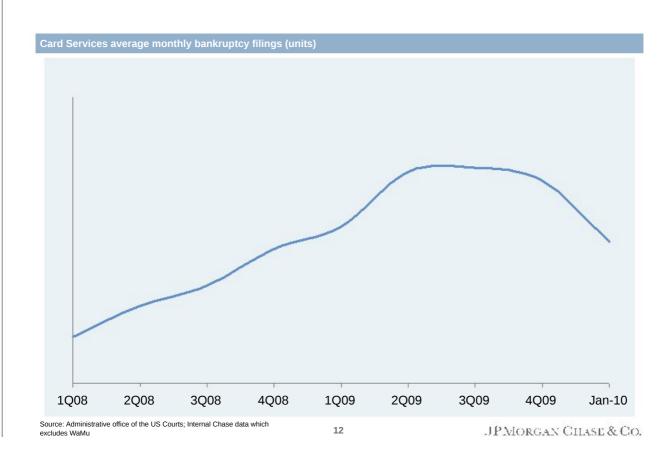

<sup>1</sup> Chase data as of Nov-09; represents Chase Issuance Trust

<sup>2</sup> AXP FICO>720 is based off disclosure in Fixed Income Investor Presentation Source: SEC Filings (BAC - Dec-09, COF - Mar-09, DFS - Dec-09, AXP - Jul-09, C - Sept-09, Chase - Nov-09)

11

Card Services bankruptcy filings have stabilized with improvement observed in January

 Continue to leverage retail and partner customer data to inform our risk management practices

13

- Increase engagement of customers across all segments to help drive superior performance
- Use of overall customer balance sheet to augment our proprietary risk scores
  - Debt-to-income measures
  - Overall changes in debt and exposure levels
  - Loan-to-value/mortgage data overlays
- Dynamic management of credit lines

## Chase relationship data provides powerful additional insight into credit risk

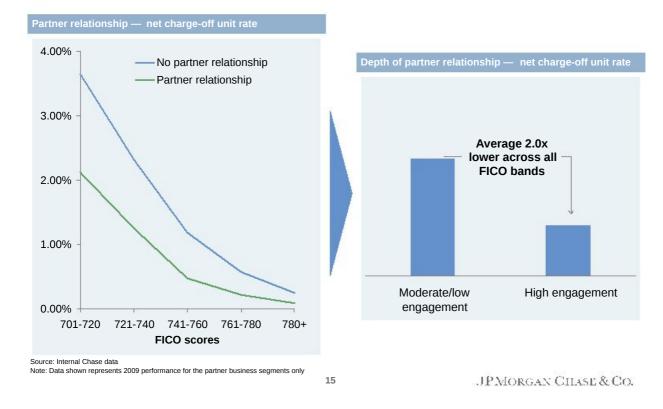

14

Source: Internal Chase data Note: Data shown represents year 2 charge-off rate of a representative acquisition vintage

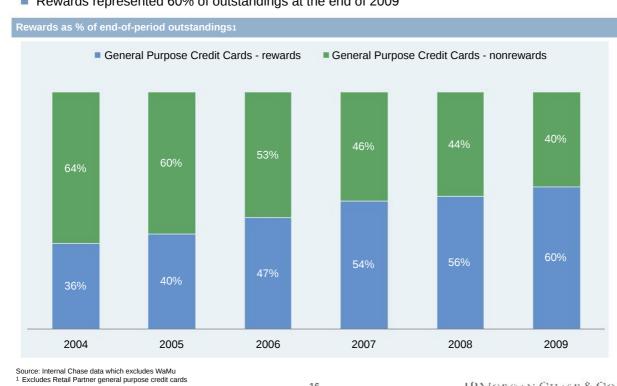

JPMORGAN CHASE & CO.

CREDIT ENVIRONMENT

#### Customers who are engaged with a partner exhibit better risk performance

#### A continued focus on rewards has helped drive a positive risk selection

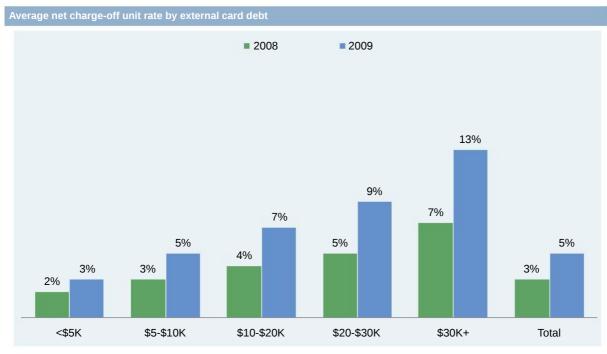

Rewards represented 60% of outstandings at the end of 2009

16

Loss rates have been highly correlated to a customers' external card debt

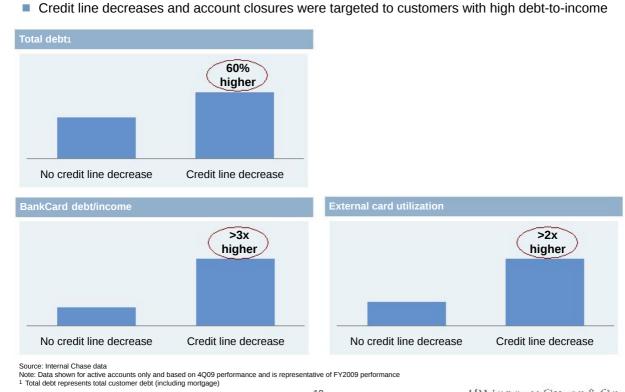

#### Card Services portfolio is skewed to lower debt customers

Source: Internal Chase data Note: 2008 unit loss rates based on Dec-08 performance of a representative Dec-07 vintage; 2009 unit loss rates based on Dec-09 performance of a representative Dec-08 vintage

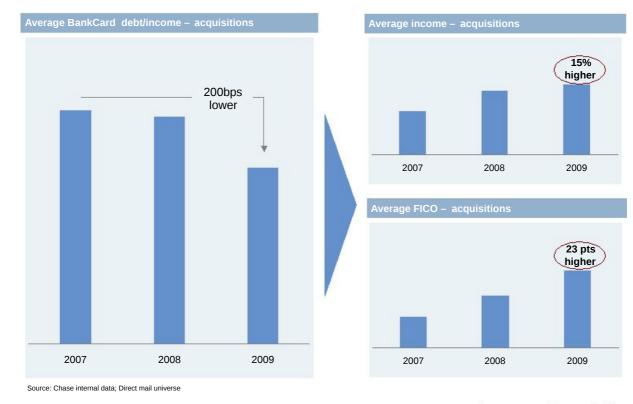

17

#### Over the past 2 years we have reduced portfolio exposure to customers with high debt

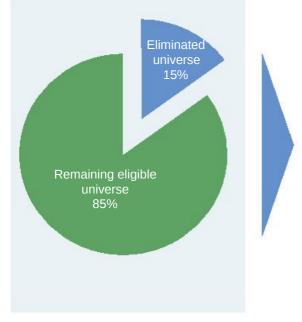

18

We are focused on a core universe of lower risk and lower debt populations for new acquisitions

## Our credit eligible<sup>1</sup> prospect universe has decreased by approximately 15%

Applying behavioral trends related to debt levels, debt-to-income ratio, bankcard utilization and inquiry levels will reduce the eligible prospect population

#### Profile of eliminated universe (vs. remaining)

| BankCard debt            | 2x higher    |
|--------------------------|--------------|
| BankCard utilization (%) | 4x higher    |
| Income                   | 30% lower    |
| Total debt to income     | > 50% higher |

Source: Chase internal data; Direct mail and preapproved universe  $^{\rm 1}$  Credit eligible population defined as those prospects that meet Card Services credit criteria

20

- We have risk management strategies in place to drive improved performance
- As new unemployment claims and housing prices stabilize, credit losses have shown signs of improvement
  - Roll-rate improvements are being observed across all early delinquency buckets
  - We believe continued improvement will be dependent on the following:
    - Absolute level of employment
    - New unemployment claims
    - Home value stability
- Our credit losses have continued to remain at the lower end of the competitive range
- We continue to maintain strong portfolio quality vs. our competitors

<sup>1</sup> Major provisions only; not an exhaustive list

23

Card Services has adapted a number of business practices in response to the new regulations

#### Primary CARD Act provisions

- Pricing restrictions
- Payment allocation
- Time to make payments
- Payment processing
- Fee restrictions
- Pricing review

#### Chase respons

#### General

- Easy, consumer-oriented products, features, communications, and disclosures
- Selective pricing changes

#### Acquisitions

- Shortened introductory APR duration
- Increased Goto APR
- Refinements to offer targeting

#### **Balance Build**

- Elimination of life-of-loan offers
- Shorter duration promotional offers
- Reduced balance transfer volumes

Net income impact: \$500-750mm<sup>1</sup> after tax

<sup>1</sup> Reasonable fees and pricing review impacts not included

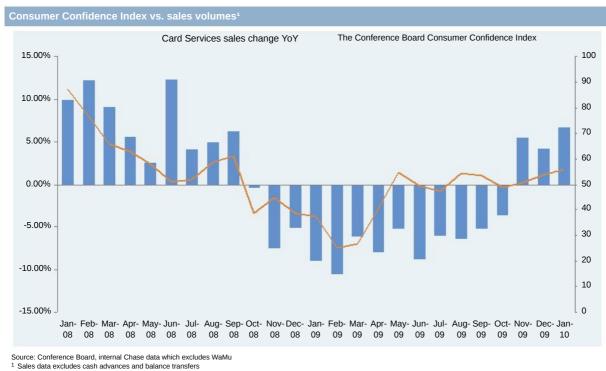

24

25

#### Since 3Q09, we have seen a strengthening in consumer sales

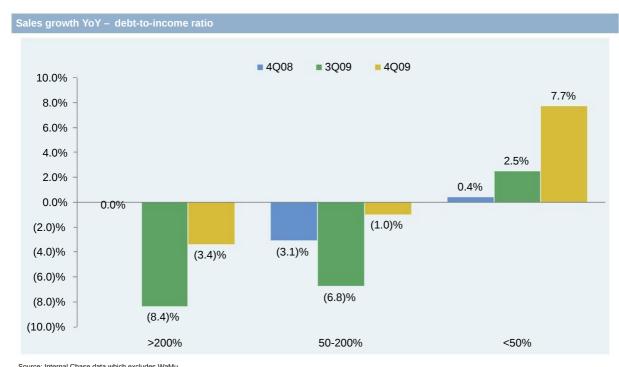

26

# We have seen strengthening in sales across our affluent customers

27

We have also seen a strengthening in sales across our low indebted customers

Source: Internal Chase data which excludes WaMu Note: Debt represents total customer debt (including mortgage)

KEY CONSUMER SPENDING TRENDS

28

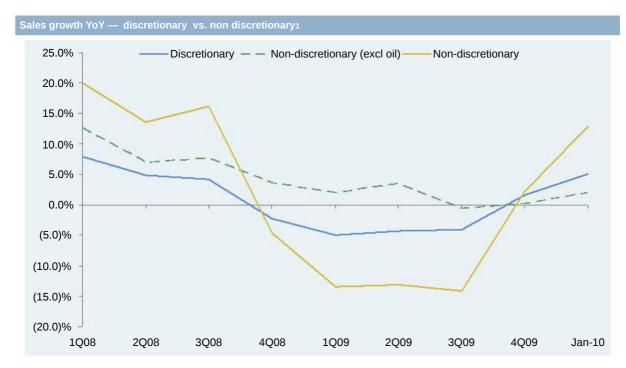

## Sales growth is stronger in states where home prices depreciated least

Source: Internal Chase data which excludes WaMu

29

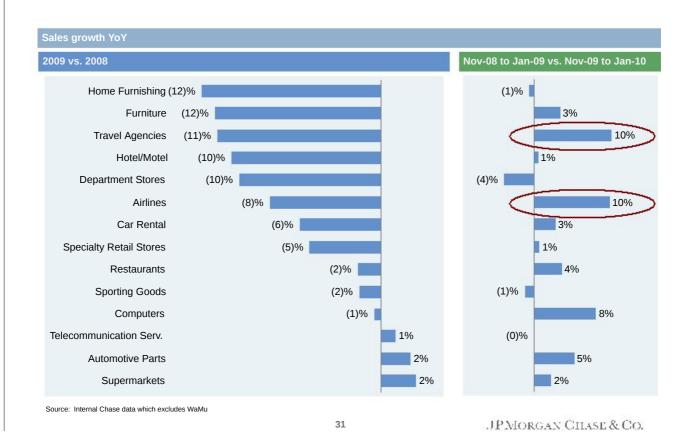

## Sales have strengthened across discretionary and non-discretionary categories

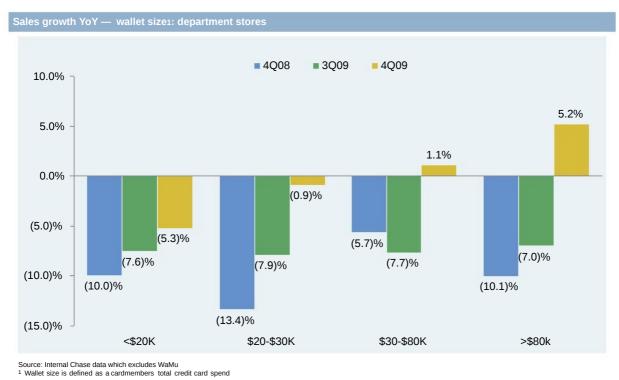

<sup>1</sup> Non-Discretionary includes supermarkets, wholesale clubs, discount stores, pharmacies and gas (except where noted) Source: Internal Chase data which excludes WaMu

30

#### Positive momentum in sales towards the end of 2009 and extending to early 2010

Customers with larger wallet sizes have exhibited a greater rebound in sales within select spending categories

32

# Throughout the downturn Chase continued to gain sales volume market share

Chase sales data excludes WaMu, cash advances, BT's and private label
 DFS sales data excludes cash advances
 BAC includes U.S. and International Consumer, excludes Small Business
 C includes C Branded and excludes non-core Retail Partner portfolios

| enhance and extend brand  | each customer segment                          | experience                                  |
| <ul><li>Leverage branch distribution</li><li>Ensure consistency across<br/>all channels</li></ul>                               | Make redemption easy and intuitive             | Improve customer service                    |

35

In 2009, we delivered on a number of key features outlined in our overall strategy

Over the past 2 years, Card Services has shown strong brand growth

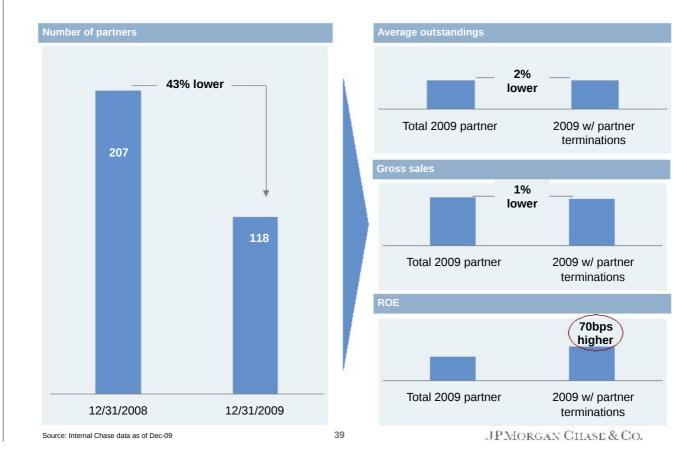

Source: Proprietary Chase Brand Health Tracking Online Survey of 400 US adult consumers per month (2007 - 2009)

37

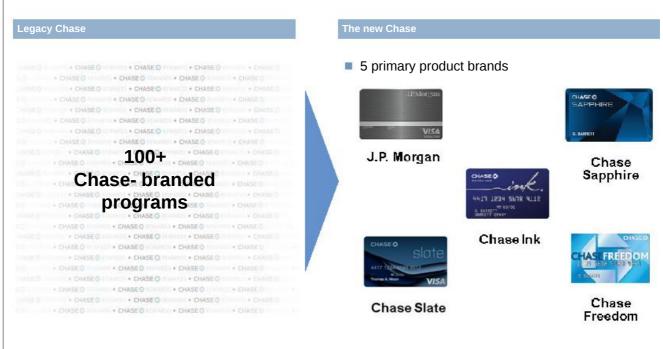

We continue to invest in partners that have strong overall brands which align with Chase

We have made significant progress in rationalizing our existing partner portfolio

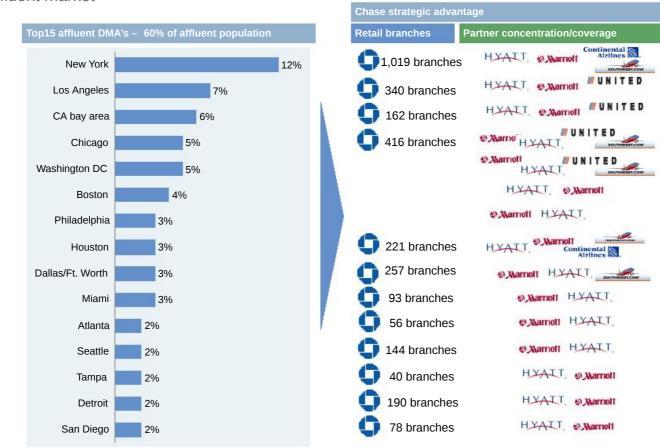

# We have streamlined our proprietary product portfolio

40

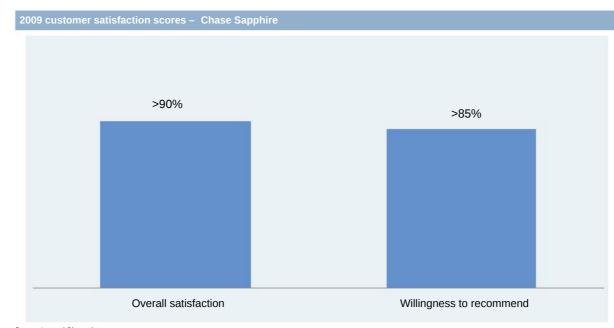

Our branch presence and strong co-brand partnerships provide superior access to the affluent market

Source: Internal Chase data 41 Note: Hotel partner presence based on hotel locations; airline concentration based on location of airline hubs

STRATEGY - PROGRESS TO DATE

# Early results from Sapphire show strong customer satisfaction scores

42

Source: Internal Chase data Note: Satisfaction scores based on Chase proprietary customer survey as of Dec-09

# Early results from Ink Bold show an ability to generate strong engagement

| Average transaction size    |               | Average sales/statement     |               |
|-----------------------------|---------------|-----------------------------|---------------|
|                             | >2x<br>higher |                             | >3x<br>higher |
|                             |               |                             |               |
| Chase business card rewards | Ink Bold      | Chase business card rewards | Ink Bold      |

43

Source: Internal Chase data as of Dec-09

Blueprint was launched, providing customers with a unique set of features that enable them to better manage their finances

# BECOEPRINT.• Design your plan and see progress on every statementImage: Second S

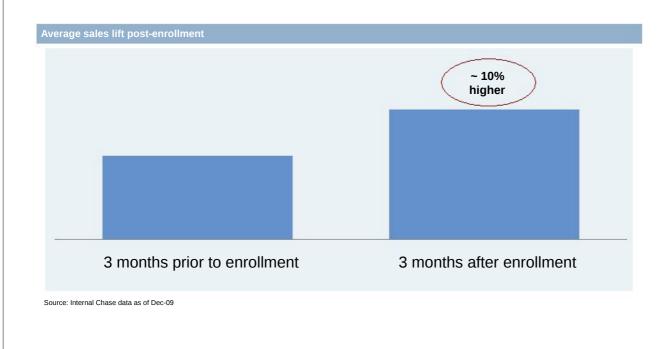

44

# Blueprint has been well-received

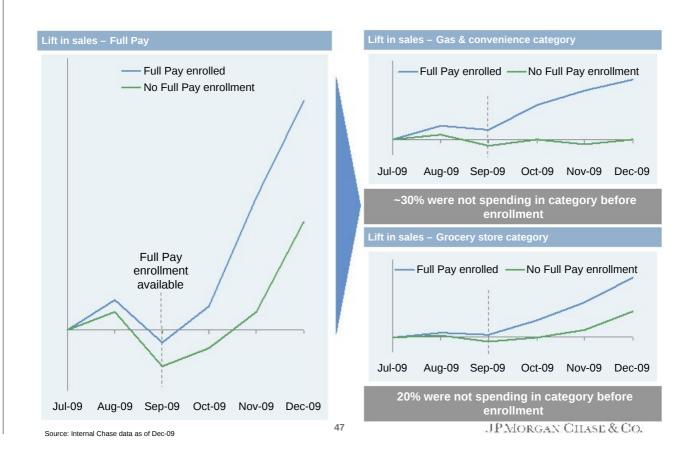

45

Customers using Blueprint have shown early signs of strong spend engagement

46

Full Pay is showing early indications that it is a tool that enables incremental spend capture

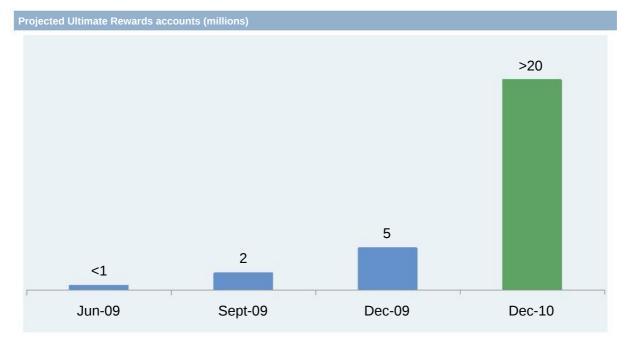

# Ultimate Rewards was launched in May 2009

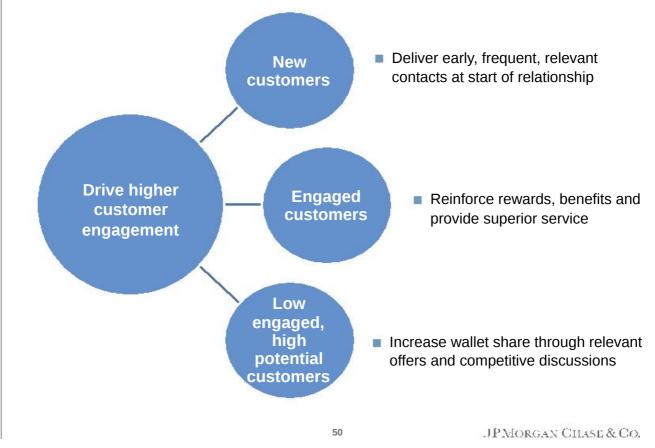

48

In 2010, Chase debit cards will be added to Ultimate Rewards giving customers greater earning power

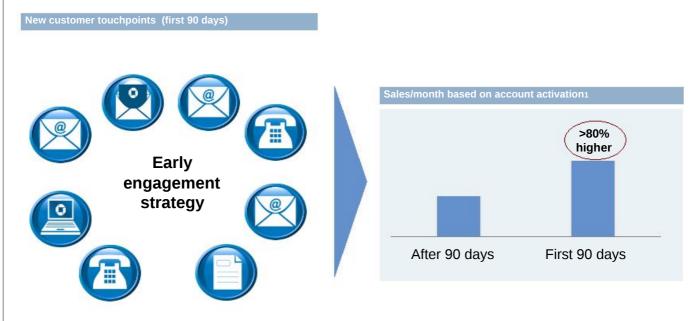

49

We have created targeted engagement strategies across the customer lifecycle to reinforce product value, drive usage and build the Chase brand

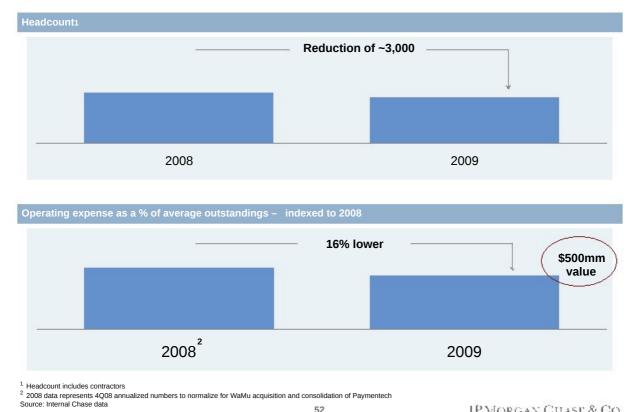

To build stronger relationships with new customers, we have designed an end-to-end engagement strategy utilizing multiple touchpoints during the first 90 days

Source: Internal Chase data <sup>1</sup> Sales/month data for 1Q08 vintage as of 4Q09

51

# We continue to drive down operating expense

52

- Continued to invest in the business throughout the downturn
- Made significant progress towards building a stronger Chase proprietary brand
- Launched a number of key products and features in 2009, early results are encouraging
- Continuing to rationalize our existing partnership portfolio
- Focused on providing a superior customer experience
- 2010 focus will be on execution against our key product launches

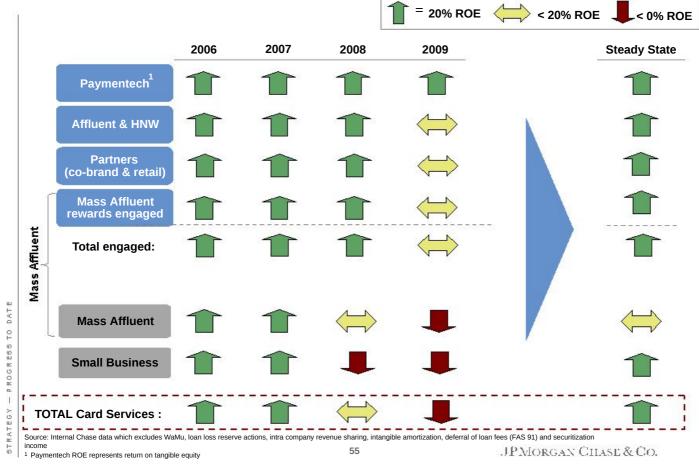

53

- The majority of our business segments have remained profitable through the cycle
- Specific strategies are in place to improve the unprofitable business segments
- We are seeing early signs that credit trends are improving across all stages of delinquency
- Implementation of the majority of provisions in the CARD Act is complete
- Consumer spending is recovering slowly across all income segments, most industry categories and geographies
- The strategic priorities outlined in 2008 are in market, positioning us for growth in a post-CARD Act environment

54

Our ROE target is 20% +/-

In spite of credit and regulatory challenges, repositioning of Card business has potential to achieve a 20% +/- return on equity

### RETAIL FINANCIAL SERVICES

Charlie Scharf, Retail Financial Services Chief Executive Officer

February 25, 2010

# **Retail Financial Services**

| (\$ in millions)          |         |           |
|---------------------------|---------|-----------|
|                           | 2005    | 2009      |
| Retail Financial Services |         |           |
| Net income                | \$3,427 | \$97      |
| ROE                       | 26%     | 0%        |
| Average equity (\$B)      | \$13.4  | \$25.0    |
| Retail Banking            |         |           |
| Total revenue             | \$8,274 | \$17,950  |
| Credit costs              | 206     | 1,142     |

# Great benefit of being part of JPM

| Ability to continue to i                  | nvest throughout the downturn - examples   |
|---|--|
| Marketing                                 | Increased marketing spend by over \$200mm over 4 years; increase of 90% and CAGR of 18% since 2005   |
| New Branches                              | <ul> <li>Grew branch network by 2,513 branches from end of 2005 to 5,154</li> <li>Of which 642 branches represented organic growth of 24%</li> </ul> |
| Additional<br>Salespeople                 | <ul> <li>Added 10,924 Personal Bankers since 2005</li> <li>Of which 4,463 represented organic growth of 63%</li> </ul>                               |
| Replace ATMs<br>with Deposit-<br>Friendly | Added 7,456 Deposit Friendly ATMs since 2007; nearly 50% of current<br>ATM fleet is Deposit Friendly   |
| Frienaly                                  |  |

5

### Great benefit of being part of JPM (continued)

- Building Chase brand with Card enormous benefit
  - Over \$2B marketing spend this year across all Consumer lines of business
  - 1.1mm new Retail Bank customers (since 2007) that were previously only Card customers
  - Specialized cards and joint rewards programs
    - ~40% of bank customers have a Chase card
- Cross-line of business leverage
  - Percentage of customers that used a branch teller in 4Q09
    - 69% of JPM consumer households
    - 69% of Business Banking customers
    - $\,$  48% of PWM customers
    - 38% of CB customers
    - 27% of Private Banking customers
  - Sharing of products with TSS and CB
  - Cross-referrals of affluent customers with AM
  - Of 2009 mortgage originations, 27% of customers had or now have a bank account

6

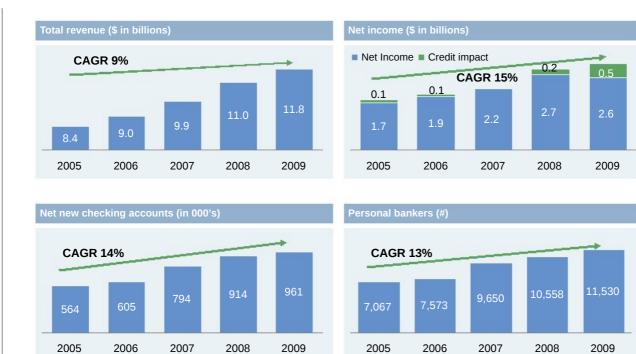

Consistent focus since 2002

- Acquire net new customers grow checking accounts
- Deepen relationships
  - Product (card, loans, investments)
  - Services (bill pay, debit rewards, overdraft protection, alerts, mobile)

7

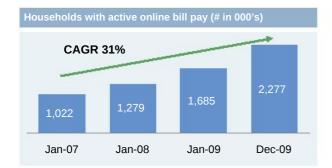

- Invest in Chase distribution network
  - New builds / ATMs
  - Branch rebrand / reconfiguration of interiors and exteriors
- Customer service
- Actively engage customers in the branch

# Chase organic growth - Retail Banking (excluding WaMu)

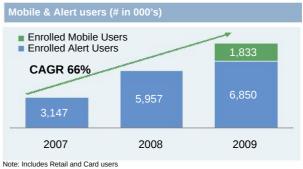

JPMORGAN CHASE & CO.

# Organic growth drivers (excluding WaMu)

RETAIL BANKING

9

# Washington Mutual update

### Conversions complete

- First conversion completed 7 months from announcement
- Last conversion completed in 13 months
- Conversions included:
  - 30,000 new branch workstations
  - Over 2,000 new branch servers
  - Loan and deposit systems
- Finished over 900 "occasio" style branch retrofits
- Installed 1,100+ Deposit Friendly ATMs in heritage WaMu branches

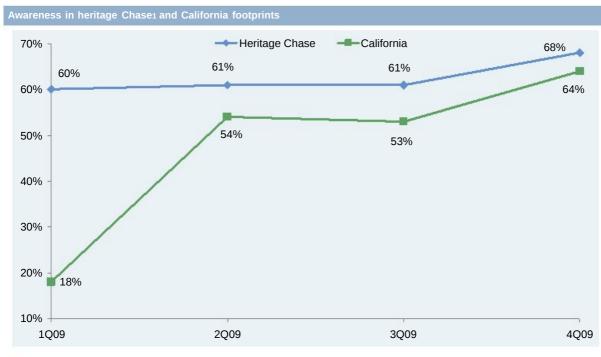

### Business integration - 2010+

- Continue to build and train sales force
  - Over the next few years, we will add
    - Over 2,000 Personal Bankers
       450 +/- Investment Sales
      - Representatives
    - 375 +/- Small Business Bankers
- Create a consistent customer experience

10

Expand ATM presence and continue Deposit Friendly ATM growth

# Unaided awareness in California as a bank with checking

 Core message: We're Chase; We're a robust Retail bank; We're here in (California); We're here to help

 $^1\mbox{Heritage}$  Chase represents Texas, Illinois, New York, and New Jersey

#### WaMu cross-sell and growth drivers

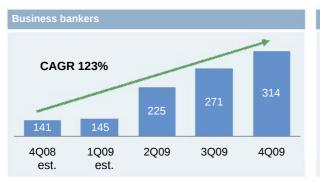

Note: Growth opportunity estimate based on Chase per branch data applied to WaMu branch count

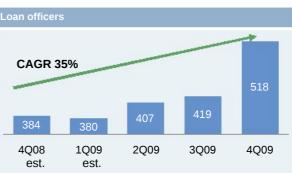

12

#### CA/FL WaMu sales force

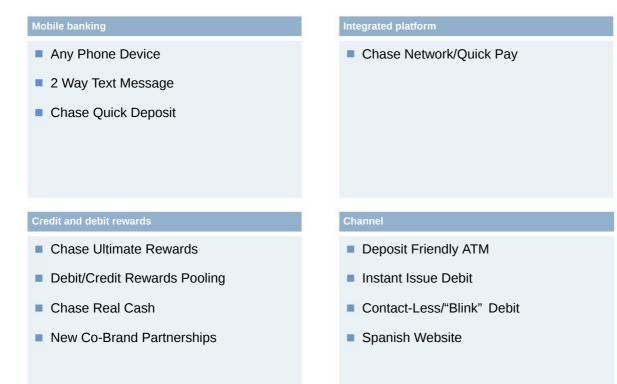

13

#### 2010 products and services innovation

14

#### Business Banking opportunity is significant

| 2009 (\$ in millions, unless otherwise noted) |         |        |
|---|---------|--------|
|   | Chase   | WaMu   |
| Deposits (\$B)                                | \$46.7  | \$7.6  |
| Loans (\$B)                                   | 16.4    | 1.3    |
| Non-lending revenue                           | \$2,100 | \$500  |
| Lending revenue                               | 500     | 100    |
| Subtotal                                      | \$2,600 | \$600  |
| # of branches                                 | 3,190   | 1,863  |
| Revenue per branch (\$ in 000's)              | ~\$800  | ~\$300 |

Leverage the Chase model in WaMu branch footprint

- Offering a full range of products (e.g. Treasury Services, Lending)
- Achievable at minimal additional cost, driving meaningful revenue growth
- \$500k per branch in incremental revenue x 2k WaMu branches = \$1B revenue

15

#### Business Banking has undertaken several initiatives to increase lending

| DUSITIESS DATIKIT              | iy has undertaken several milialives to increase  | lenuing   |
|--------------------------------|---|---|
| Lending initiatives            |   |   |
| Market<br>Coverage             | <ul> <li>Business Banking announced addition of 300+<br/>additional small business bankers on 11/9/09</li> <li>~160 bankers have been added to date</li> </ul>  |   |
| Credit Process<br>Improvements | <ul> <li>Realigned credit policy (in light of stabilizing market conditions) to improve approval rates – implemented new credit scorecard</li> <li>Implemented second review of declined applications to provide more opportunities for approval</li> </ul> | <ul> <li>Initial results have<br/>been very positive:</li> <li>Loan volume is up<br/>sharply year-over-<br/>year</li> <li>Application volume</li> </ul> |
| New /<br>Enhanced<br>Products  | <ul> <li>Launched new Owner Occupied Real Estate promotion that generates significant fee savings for customers</li> <li>Introduced new small business credit cards (Ink cards) that help owners manage their cash-flow needs</li> </ul>                    | <ul> <li>and loan pipeline<br/>continue to get<br/>stronger</li> <li>Chase has become<br/>one of the top SBA<br/>lenders</li> </ul>                     |

Chase committed to lending \$10B to Small Businesses in 2010

16

#### Affluent banking opportunity is significant

|   | Mass    | Affluent     |       |
|---|---------|--------------|-------|
|   | <\$500k | \$500k-\$5mm | Total |
| % of Chase Consumer Bank households     | 92%     | 8%           | 100%  |
| % of Total deposit & investment wallet  | 33%     | 67%          | 100%  |
| Chase share of existing clients' wallet |         |              |       |
| Deposit wallet                          | 28%     | 11%          | 18%   |
| Investment wallet                       | 9%      | 2%           | 4%    |
| Total wallet                            | 19%     | 5%           | 9%    |

Potential incremental opportunity with affluent clients

- Significant opportunity to capture share with existing customers and attract new customers
- Capture of 20-25% wallet share with 10-20% of current affluent clients would result in incremental pre-tax of \$500mm -\$1B

Note: Share of Wallet calculated using total U.S. asset, investment and deposit estimates from IXI WealthComplete®, June 2009. IXI is an Equifax company

17

- Continue to execute in Chase footprint
- Build out WaMu consumer products and customer base
- Build out WaMu Business Banking
- Debit overdraft changes short-term negative but a much better customer experience over time
- Capture greater share of affluent
- Relationship products
- Entry and mass product differentiation

These are large opportunities

18

| Subprime Mortgage   | 364     | 410     | 422     | 452     |  |
| Total Home Lending portfolio  | \$1,778 | \$2,171 | \$2,104 | \$2,226 |  |

Growth in 2008 and 2009 with some degree of leveling in 2H09

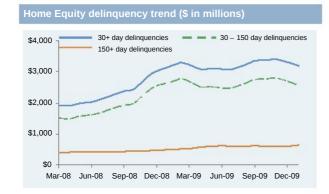

Over the next several quarters, quarterly losses could reach:

- \$1.4B for Home Equity
- \$600mm for Prime Mortgage
- \$500mm for Subprime Mortgage

<sup>1</sup> Includes Option ARM

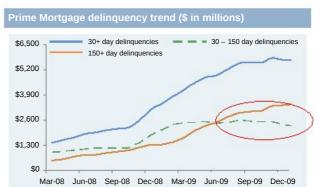

21

# Consumer credit—delinquency trends Excluding purchased credit-impaired loans

Subprime Mortgage delinquency trend (\$ in millions) 30+ day delinquencies

150+ day delinquencies

- 30-150 showing stability across portfolios (not yet improving)
- 150+ rising in mortgage portfolios

Note: Delinquencies prior to September 2008 are heritage Chase Prime Mortgage excludes Held for Sale, Asset Wealth Management and Government Insured Loans

Mar-08 Jun-08 Sep-08 Dec-08 Mar-09 Jun-09 Sep-09 Dec-09

22

30 – 150 day delinquencies

JPMORGAN CHASE & CO.

\$5,000

\$4,000 \$3,000

\$2,000 \$1,000 \$0

#### **Delinquency treatment**

- Delinquent accounts are treated consistently whether in a trial modification or not
- Each month that cumulative trial payments are less than contractual payment an account will age through to the next delinquency bucket
- When a loan is permanently modified the loan is returned to current status

#### Loss recognition

- Accounts are charged-off and written down to collateral value at 150 DPD (days past due)
- Only exception to this policy are accounts that reach 150 DPD during their trial period that are current with each and every scheduled trial payment
  - The cumulative impact of this exception was less than \$150mm at 12/31/09
- We continue to take additional write downs, as required, as loans progress towards foreclosure and REO, with the objective of the extension in foreclosure timelines not to result in deferred losses
- When a loan is permanently modified:
  - A TDR (life of loan) reserve is established; TDR reserves are reviewed on a quarterly basis for continued adequacy
  - Loan is returned to accrual status once 6 payments have been made, 3 after permanent modification
- We will be very transparent about the performance of modified loans in our reporting

## Increase in 150+ mortgage delinquencies - Prime and Subprime mortgage

| (\$ in millions), excluding purchased credit-impaired portfolio |              |            |                              |  |

| Effective trial   | 1,743        | 1,232      | 29%                          |  |
| Effective trial held from write-down                            | 421          | 398        | 5%                           |  |

Note: Numbers in table above represent a combination of Prime and Subprime mortgages  $^1\,\rm Write-down$  as % of gross UPB

- Loans are written down to the fair value of collateral less cost to sell at 150 DPD
- As loans progress through the foreclosure process, additional write downs are recorded. Approximately one-third of loans greater than 150 DPD are being resolved in ways other than foreclosure/REO
- Loan loss reserves are established to cover expected losses for loans that are resolved later and at higher severities through the foreclosure process. In addition to the write-downs shown above we are holding ~20% of the gross UPB in reserve against these delinquent loans 24 UPMORGAN GILASE & CO.

Changes in cash flows trigger accounting events - impairment or change in yields 

Principal credit losses tracked on both a 150 day net charge-off basis and liquidation (cash) basis

150 day net charge-offs provide a leading indicator of liquidation losses (not a cash flow)

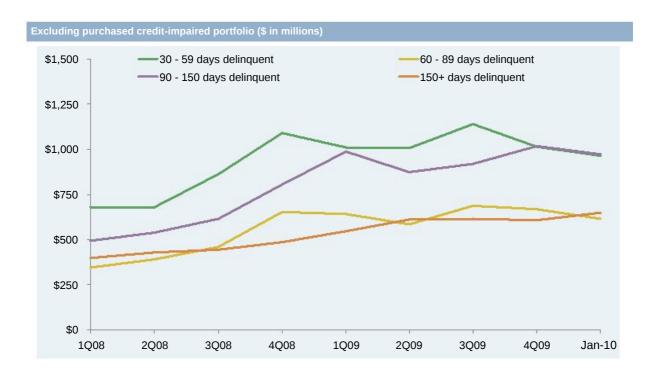

Liquidation losses recorded when cash proceeds received from resolving loan through REO

1 The carrying values above are net of the loan mark but not the LLR

<sup>2</sup> Original loss estimates were \$30.47 billion, resulting in an overall loss rate of 25%. Principal loss estimates, and therefore the adjusted lifetime loss estimates, increased by \$400 million for Option ARMs and \$1 billion for Prime Mortgage. These subsequent increases were recorded as LLR vs. an adjustment to the loan mark Note: 150 day net charge-offs reflect losses recorded on a basis consistent with the non-Purchased Credit Impaired Portfolion. The net losses shown in this table are not included in the net charge offs reported by the firm as these loans were considered impaired on the acquisition date and were written down to fair value in accordance with SOP 03-3

25

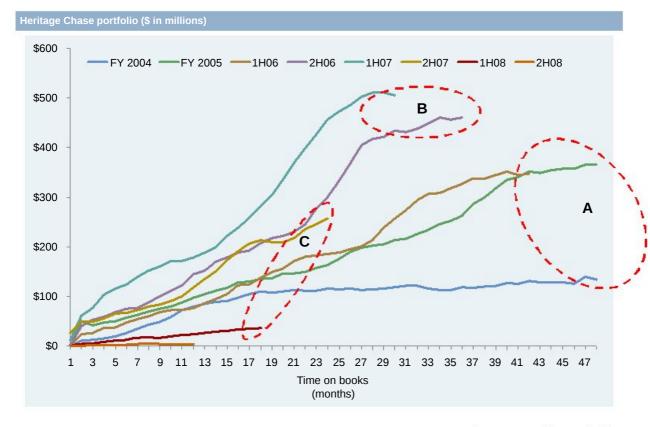

## Home equity delinquency

Note: Data prior to September 2008 is heritage Chase

26

#### Home equity 30-149 day delinquency by vintage

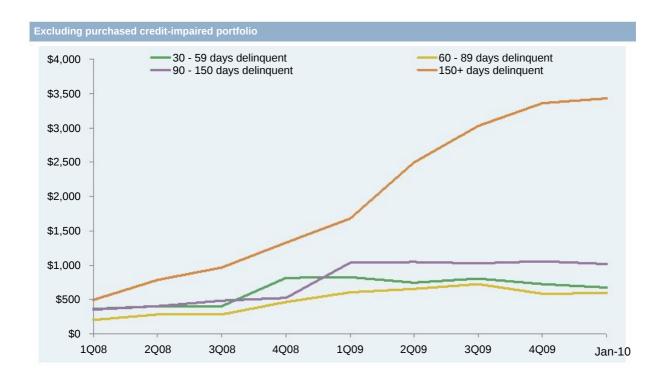

27

- 4Q annualized losses were \$4.7B (excluding purchased credit-impaired)
- HPI projections are used to forecast portfolio balances by CLTV band, and future losses are estimated using vintage loss rates by CLTV band and projecting forward under three scenarios
- Scenario based on:
  - National HPI peak-to-trough of -37%
  - Loss rates staying flat to 4Q09 annualized, and decreasing/increasing 1% annualized per quarter for better/worse scenarios for >100% CLTV loans

| ·37% HPI |                    |                    |          |
|----------|--------------------|--------------------|----------|
|          |                    | Losses (\$B)       |          |
|          | Better             | Flat               | Worse    |
| 2010     | 4.0                | 4.5                | 5.0      |

HOME LENDING PORTFOLIO UPDATES

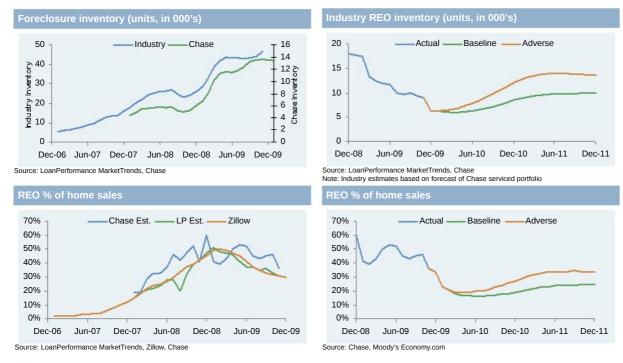

#### Projection of REO - total serviced portfolio

32

- Inventory levels have fallen significantly
  - Lower inflows due to foreclosure timelines and trial modifications
  - Faster outflows average days to sell from 182 (Dec 2008) to 157 (Jan 2010)
- REO expected to grow steadily size and speed of growth will depend on:
  - Foreclosure timelines
  - Loan modifications
  - Delinquencies

#### Distressed inventory trends / forecast - Los Angeles market example

- Market-level analysis to understand impact on home prices/sales: using Chase and industry data/estimates
- Goal: understand potential range of outcomes
- REO levels and % of home sales continue to grow through 2011 and remain high (below peak levels)

33

## Estimated REO as a % of home sales - Top 10 MSAs (Baseline assumptions)

| REO as a % of home sales |      |      |          |
|--------------------------|------|------|----------|
|                          | 2Q09 | 4Q09 | 4Q12     |
| Los Angeles              | 52%  | 39%  | 22 – 28% |
| New York                 | 11%  | 12%  | 12 – 16% |
| Santa Ana                | 30%  | 16%  | 18 – 23% |
| Long Island              | 8%   | 8%   | 5 – 7%   |
| Chicago                  | 33%  | 28%  | 21 – 28% |
| San Diego                | 38%  | 25%  | 24 – 31% |
| San Francisco            | 14%  | 10%  | 9-12%    |
| Oakland                  | 47%  | 20%  | 18 – 23% |
| Phoenix                  | 57%  | 37%  | 39 – 50% |
| San Jose                 | 43%  | 22%  | 14 - 18% |

Expect REO as % of home sales to grow and remain high (but below 2009 peaks) in most markets through at least 2012

34

#### Repurchase risk

#### Background and timing

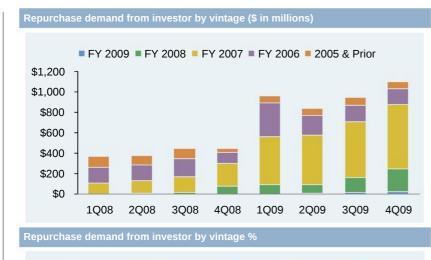

- Repurchase demands and associated losses have grown significantly over the last 12-18 months
- Delinquencies (90+ DPD loans) and accordingly repurchase demands are concentrated in 2005-2007 vintages
- Demands grew through 2008 and into 2009 and remain at elevated levels
- Top drivers for finalized repurchases reflect misrepresentations as follows:
  - Credit / undisclosed debt
  - Income / employment
  - Appraisal
- Misrepresentations typically surface and are resolved through a review process with the GSE's within 24-36 months +/-
- As such we expect, and are seeing, the contribution of earlier vintages to repurchases and losses to decline
  - In 4Q09 approximately 14%, 58% and 20% of repurchase demands respectively came from 2006, 2007 and 2008 vintages

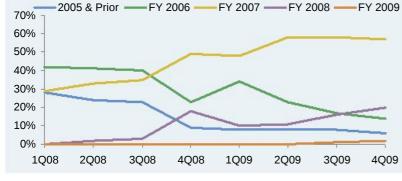

#### Process and accounting

- Demands received from investors are reviewed and ~50% are successfully rescinded ("cured") by providing additional documentation or evidence
  - We are able to put or claim back any losses on ~40% of loans that were third party originated
  - When the repurchase is finalized for our account we either buy-back the loan and include in NPLs or make-whole the investor for losses incurred
  - In 2009, we repurchased or made-whole \$1.1B of loan UPB
- In 2009, \$1.6B of repurchase expenses / reserve build were reflected as contra revenues against production income
  - Settled repurchase expenses have been running at \$150mm+/- per quarter over the last 2-3 quarters
  - In estimating reserves both demands presented and probable future demands are considered; reserves are based on best estimates and experience to date and subject to significant uncertainty
  - At December 31, 2009, we have \$1.5B of reserves in RFS for presented and future demands

37

#### Repurchase risk (continued)

#### Activity overview

- Volume remains elevated at ~\$1B per quarter and likely to remain high as we work through bad vintages
- Channel Mix
  - Wholesale Broker remains elevated at ~45%
- SISA (stated income stated assets) concentration has declined from 43% in 2006 vintage demands to 12% in 2008/09 vintage
- State concentration
  - Florida 29%
  - California 21%
  - Arizona 6%
- Third-party originated 40%

Repurchase risk (continued)

| 2009 repurchases (\$ in millions) |         |
|-----------------------------------|---------|
|                                   | FY 2009 |
| UPB of loans repurchased          | \$1,085 |
| Repurchase expense                | 580     |
| Change in reserves                | 1,032   |
| Total Expense                     | \$1,612 |

- Repurchases result in one of the following outcomes, relative to default status:
  - Loan buyback Repurchase a loan
  - REO Buy back the property
  - Make-Whole Remit funds to the GSE covering loss on disposition of the loan/property
- Of the \$1.1B repurchased in 2009, approximately two-thirds were loans / REO repurchased vs. losses reimbursed
  - \$218mm of repurchased loans on balance sheet in NPL status at 12/31/09
  - \$41mm of REO relating to loan repurchases on balance sheet at 12/31/09

40

#### RFS capital and returns

- Intend to report "RFS ongoing" and "runoff Home Lending portfolios" separately going forward
- Goal to provide clarity to ongoing earnings of RFS franchise
- Clearly separate impact of runoff portfolios which will include
  - WaMu purchased credit-impaired
  - Discontinued products (e.g. subprime, Alt-A, and option-ARM)
  - Broker originated loans
  - Limited documentation loans
  - Current ECLTVs greater than 80%

Note: ECLTV = estimated combined loan to value considering all available lien positions related to the property which we own or service Current ECLTVs are calculated using original appraised value adjusted using the latest HPI published by Moody's Economy.com

| (\$ in billions, unless otherwise noted) |               |                            |                   |  |  |

| Subprime                                 | 14            |                            |                   |  |  |
| Total runoff                             | \$230         | \$5,700                    | (\$5,700)         |  |  |
| Total Home Lending                       | \$270         | \$6,550                    | (\$5,450)         |  |  |

#### At current production level ongoing portfolio expected to run down \$5-10B over the next 2 years – financial impact is not material to RFS results

Note: Table above excludes Mortgage Banking

42

#### RFS capital and ROE - 2009

| (\$ in billions, unless otherwise noted) |               |        |                   |     |  |  |
|--|---------------|--------|-------------------|-----|--|--|
|  | Average Loans | Equity | Net Income (\$mm) | ROE |  |  |
| Retail Banking                           | \$18          | \$9.5  | \$3,903           | 41% |  |  |
| Consumer Lending                         | 109           | 7.5    | 1,894             | 25% |  |  |
| RFS ongoing                              | \$127         | \$17.0 | \$5,797           | 34% |  |  |
| Home Lending runoff                      | 230           | 8.0    | (5,700)           | NM  |  |  |
| Total RFS                                | \$357         | \$25.0 | \$97              | 0%  |  |  |

Retail Banking is allocated capital as a stand alone business with a theoretical asset allocation (i.e. fully matched balance sheet)

- Retail Banking has consistently delivered 40% +/- ROE, performing at target today
- Ongoing Consumer Lending business achieving / priced to target returns
- Total RFS challenged in medium term; will continue until bad loans runoff

| 2009 income over 2010 equity (\$ in billions) |             |             |              |            |  |  |
|---|-------------|-------------|--------------|------------|--|--|
|   | 2009 Equity | 2010 Equity | Proforma ROE | ROE target |  |  |
| Retail Banking                                | \$9.5       | \$10.0      | 39%          | 40%        |  |  |
| Consumer Lending                              | 7.5         | 10.5        | 18%          | 15%        |  |  |
| RFS ongoing                                   | \$17.0      | \$20.5      | 28%          | 30%        |  |  |
| Home Lending runoff                           | 8.0         | 7.5         | NM           |            |  |  |
| Total RFS                                     | \$25.0      | \$28.0      | 0%           | 30%        |  |  |

Ongoing franchise delivers near target ROE in proforma 2009 with higher capital allocated

44

# Simulated runoff portfolio forecast

| Equity                    | \$8.0 | \$7.5 | \$6.5 | \$5.0 |
|---------------------------|-------|-------|-------|-------|
| Total                     | \$230 | \$195 | \$165 | \$140 |
| Other runoff              | 145   | 120   | 100   | 85    |
| Purchased credit-impaired | \$85  | \$75  | \$65  | \$55  |
| Average loans             |       |       |       |       |
|                           | 2009  | 2010  | 2011  | 2012  |
| in billions)              |       |       |       |       |

45

\$3B +/- of capital is freed up over next three years as runoff portfolio liquidates

#### Home Lending runoff portfolio - simulated

| (\$ in millions)              |           |                       |
|-------------------------------|-----------|-----------------------|
|                               | 2009      | 2010                  |
| Net interest income           | \$5,700   | \$4,200               |
| Expense                       | 1,550     | 1,750                 |
| Charge-off and reserve change | 13,600    | 7,000 - 11,000        |
| Net Income                    | (\$5,700) | (\$3,000) – (\$5,000) |

- 2010 results are for scenario purposes only
- In 2011 and 2012:
  - Charge-offs could decline \$2B \$3B per year
  - Reserve releases could range from \$1B \$4B per year
  - Net Income could range from \$0 (\$2.5B) in 2011 and \$0 +/- in 2012
- As the credit environment improves and losses decline, the Home Lending runoff portfolio could break even in 2012 / 2013 after which it could contribute net income of \$500mm +/-, declining slowly over time

Key assumptions

- Retail Banking uses 2010 analyst average, growing at 8% per year thereafter
- Consumer Lending held flat for 2010 scenario, growing at 8% per year thereafter
- Runoff from prior page

| Net income (\$ in millions, equity in billions) |         |                   |                   |             |        |        |  |

# NSF/OD changes

| Date       | Policy Change   |
|------------|---|
| January 28 | Reduce daily maximum number of NSF / OD items from 6 to 3   |
| March 29   | Debit card & ATM transaction posting order modified so transactions are<br>recognized as they occur, not largest to smallest; checks, ACH, and deposits still<br>post at end of day; deposits post first, everything else posts high to low |
|            | Implement a \$5 cushion (if the account is overdrawn by less than \$5 at the end o<br>the day Chase will not charge an overdraft fee)   |
|            | Move to a flat \$34 NSF fee from a tiered structure that charged up to \$35   |
|            | Move to a standard \$15 extended overdraft fee  |
|            | Customers have the option to say "no" to Chase Debit Card Overdraft Coverage  |
| July 1     | New checking accounts can choose to opt in or out of Chase Debit Card<br>Overdraft Coverage   |
| August 15  | All checking account customers (i.e. existing portfolio) that have not chosen to opt<br>in will no longer receive Chase Debit Card Overdraft Coverage   |
|            | Annualized after-tax financial impact: ~\$500mm   |
|            | 50 JP Morgan Chase & Co.  |

## Home Lending average loss per unit / severity

### Home Equity severity ~90%

### 57% of 2009 losses are coming from Home Equity

Note: Severity is calculated by taking total cum losses for a loan and dividing by the last outstanding principal balance. The severity month is tagged by the most recent month in which the loan took a loss

51

## Purchased credit-impaired current ECLTVs

| As of December 31, 2009 |         |                                     |                   |                                    |

- CA/FL represented 65% at year-end 2009
- The underlying customer delinquency rate for the purchased credit-impaired loans was 28% at December 31, 2009
- 24% (or \$24.2 billion) is in some stage of loss mitigation or in the process of foreclosure

<sup>1</sup>Represents the combined unpaid principal balance of loans which considers all available lien positions related to the property, which we own or service, divided by the collateral value. Current property values are estimated based on home valuation models utilizing nationally recognized home price index valuation estimates and do not represent actual appraisals <sup>2</sup>Ratios of carrying value to current collateral value for the prime mortgage and option ARM portfolios are net of the allowance for loan losses of \$1.1 billion and \$491 million, respectively, as of December 31, 2009 Note: ECLTV = estimated combined loan to value considering all available lien positions related to the property which we own or service

Current ECLTVs are calculated using original appraised value adjusted using the latest HPI published by Moody's Economy.com

| Accretable Yield % - Net <sup>1,2</sup> | NA       | 2.79%    | 2.26%    | 2.29%    | 2.42%    |

Remaining accretable yield represents interest income to be recognized over the remaining life of loans at current market rates

For variable rate loans, the interest rate recorded is adjusted based on the underlying variable rate index

In 2009, \$2.1B of net interest income, or 2.43%, earned on purchased credit-impaired portfolio.

The impact on the total Consumer Lending portfolio, which had a reported 270 bps net yield, was (8) bps

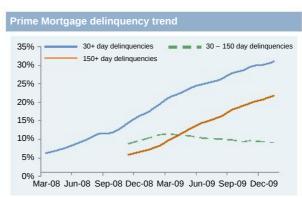

<sup>1</sup>Accretable yield dollars and percentages are net of internal funding costs <sup>2</sup>Accretable yield percentages calculated using average loan balances, net of LLR

## Option ARM recast risk - total portfolio

| Option ARM recasts - current accounts (\$ in millions) |         |         |         |         |          |
|--|---------|---------|---------|---------|----------|
|  | 2010    | 2011    | 2012    | 2013+   | Total    |
| Total UPB  | \$6,322 | \$3,946 | \$5,024 | \$4,252 | \$19,544 |
| Weighted-average payment shock %                       | 7%      | 28%     | 49%     | 12%     | 23%      |
| Weighted-average ECLTV at recast                       | 105%    | 119%    | 102%    | 60%     | 97%      |

- Most borrowers are making minimum payments or payments that are below interest only
  - **52%** of all borrowers are making minimum payments
  - Of borrowers who are current today 78% are making minimum payments and 18% are negatively amortizing
- ~\$15B in current conventional Option Arms are projected to recast in the next 3 years with increasingly severe payment shock.
- Bulk of recasts are scheduled from bad vintages in 2005-2007
- ECLTV and payment shock at recast drive delinquency
- Modification efforts targeting borrowers with high payment shocks are underway

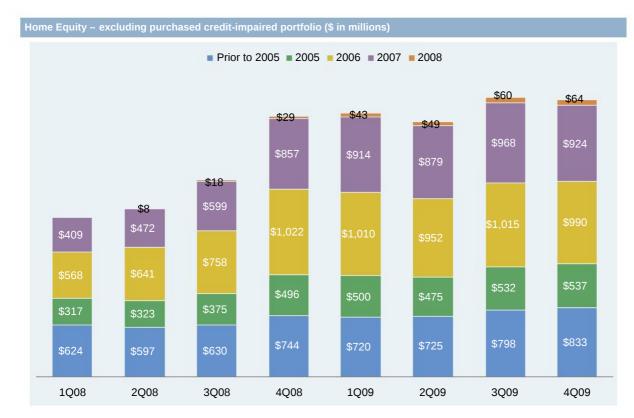

Note: Estimates made using current market interest rates ECLTV = estimate combined loan to value considering all available lien positions related to the property which we own or service Current ECLTVs are calculated using original appraised value adjusted using the latest HPI published by Moody's Economy.com

# Key assumptions used for REO forecast

| Delinquency<br>Assumptions     | <ul> <li>Delinquency units (30+)</li> <li>Increase 10% to 25% through mid 2010</li> <li>Delinquency units (30-59)</li> <li>Flattish to +7% though mid 2010</li> </ul>  |
|--------------------------------|--|
| Loss Mitigation<br>Assumptions | <ul> <li>% of delinquent units that flow into loss mitigation</li> <li>50%-75%</li> <li>% of loss mitigation units that turn into permanent modifications</li> <li>12.5%-25%</li> <li>Recidivism rate on completed modifications</li> <li>1 year out: 35%-50%</li> <li>3 years out: 50%-65%</li> </ul> |
| Foreclosure<br>Timelines       | Timelines to remain at current levels  |
| Conservative assum             | ptions used to understand the range of outcomes – business may perform meaningfully better   |

REO and distressed sales lower with:

- Lower delinquency
- Higher percent of permanent modifications
- Lower recidivism
- Current elongated foreclosure timelines (timing only for REO)

# Modification overview

| Program Summary (as of January 31, 2010) |         |                                |         |         |  |  |  |
|--|---------|--------------------------------|---------|---------|--|--|--|
|  | HAMP    | Chase<br>Programs <sup>2</sup> | Agency  | Tota    |  |  |  |
| Modifications offered <sup>3</sup>       | 222,192 | 193,104                        | 232,166 | 647,462 |  |  |  |
| Approved for permanent modifications     | 41,149  | 70,888                         | 30,676  | 142,713 |  |  |  |
| Permanent modifications completed        | 11,592  | 60,210                         | 28,089  | 99,892  |  |  |  |

- 25 customers do not pay as agreed
- 75 customers pay as agreed
  - 29 do not submit all documents required or submit documents that require refinement for underwriting
  - 13 are not HAMP eligible but will qualify for other modification products
  - 33 are able to be underwritten

- Dedicated resources
  - 15 operating sites across the country
  - Approximately 14,750 staff dedicated to loss mitigation
  - Local loan-modification counselors in 34 Chase Homeownership Centers
- Focused campaign
  - Borrowers assigned a specific agent with end-to-end responsibility

- Many borrowers return forms missing key information (signatures, SSN, etc.) or do not return one of four required documents
- Current outreach strategy includes 36 calls, 15 letters, and 2 door-knocks per account prior to cancellation for missing documents
- Treasury issued a new directive <sup>5</sup> requiring mortgagor document perfection prior to HAMP trial modification offer

### Modification offers continue to grow, but obtaining documents required for HAMP completion remains an issue

<sup>1</sup> Data in table from January 1, 2009 through January 31, 2010. HAMP program launched April 1

<sup>2</sup> Chase program modifications include Home Equity
 <sup>3</sup> HAMP modifications offered data as of January 29, 2010

- <sup>4</sup> Seasoned population are those HAMP modifications with first payments due April <sup>5</sup> Treasury directive issued January 28, 2010 and effective June 1, 2010
