Date of action: Record date January 6, 2017

The terms of the warrants may be viewed on the Securities and Exchange Commission's website at:

Amount of taxable dividend: \$0.0457 per warrant

Effect on basis: The taxable dividend is added to cost basis in the warrants.

16 Describe the calculation of the change in basis and the data that supports the calculation, such as the market values of securities and the valuation dates ▶ The valuation reference date is January 3, 2017, one day before the ex-dividend date.

Calculation: The excess of (A) over (B):

(A) The fair market value of the warrants immediately after the adjustment to exercise price is calculated using an American style option pricing model with pricing inputs including: volatility, the risk free return, the market price of common shares, the dividend yield on common shares, and the remaining term of the warrants.

(B) The fair market value, determined immediately after the adjustment to exercise price and using all of the pricing inputs described in (A) above, of the warrants as if no adjustment to exercise price had occurred.

Effect on Basis: The taxable dividend is added to cost basis in the warrants.
