## \$ Callable Contingent Interest Notes Linked to the Lesser Performing of the S&P 500<sup>®</sup> Index and the Russell 2000<sup>®</sup> Index due June 28, 2016

### General

- The notes are designed for investors who seek a Contingent Interest Payment with respect to each Review Date for which the Index closing level of each of the S&P 500<sup>®</sup> Index and the Russell 2000<sup>®</sup> Index is greater than or equal to 70% of its Initial Index Level, which we refer to as an Interest Barrier. Investors should be willing to forgo fixed interest and dividend payments, in exchange for the opportunity to receive Contingent Interest Payments.
- Investors in the notes should be willing to accept the risk of losing some or all of their principal if a Trigger Event (as defined below) has occurred and the risk that no Contingent Interest Payment may be made with respect to some or all Review Dates. **Any payment on the notes is subject to the credit risk of JPMorgan Chase & Co.**
- The notes may be redeemed early, in whole but not in part, at our option on any of the Interest Payment Dates (other than the final Interest Payment Date) set forth below at a redemption price per \$1,000 principal amount note of \$1,000 plus any accrued and unpaid Contingent Interest Payment, as described below.
- Unsecured and unsubordinated obligations of JPMorgan Chase & Co. maturing June 28, 2016<sup>†</sup>
- The payment at maturity is **not** linked to a basket composed of the Indices. The payment at maturity is linked to the performance of each of the Indices individually, as described below.
- Minimum denominations of \$10,000 and integral multiples of \$1,000 in excess thereof
- **The terms of the notes as set forth in "Key Terms" below, to the extent they differ from or conflict with those set forth in the accompanying product supplement no. 29-I, supersede the terms set forth in product supplement no. 29-I. In particular, the notes will be subject to early redemption at our option as described under "Key Terms — Early Redemption" below and will not be subject to an automatic call.**

### Key Terms

Indices:	The S&P 500 <sup>®</sup> Index (Bloomberg ticker: SPX) and the Russell 2000 <sup>®</sup> Index (Bloomberg ticker: RTY) (each, an "Index" and collectively, the "Indices")
Contingent Interest Payments:	If the notes have not been previously redeemed early and the Index closing level of each Index on any Review Date is greater than or equal to its Interest Barrier, you will receive on the applicable Interest Payment Date for each \$1,000 principal amount note a Contingent Interest Payment equal to between \$33.75* and \$36.25* (equivalent to a Contingent Interest Rate of between 6.75%* and 7.25%* per annum, payable at a rate of between 3.375%* and 3.625%* semiannually). <i>If the Index closing level of either Index on any Review Date is less than its Interest Barrier, no Contingent Interest Payment will be made with respect to that Review Date.</i>
Interest Barrier / Trigger Level:	With respect to each Index, an amount that represents 70.00% of its Initial Index Level
Contingent Interest Rate:	Between 6.75%* and 7.25%* per annum, payable at a rate of between 3.375%* and 3.625%* semiannually, if applicable *The actual Contingent Interest Rate will be provided in the pricing supplement and will not be less than 6.75% per annum or greater than 7.25% per annum.
Early Redemption:	We, at our election, may redeem the notes early, in whole but not in part, on any of the Interest Payment Dates (other than the final Interest Payment Date) at a price for each \$1,000 principal amount note equal to \$1,000 plus any accrued and unpaid Contingent Interest Payment. If we intend to redeem your notes early, we will deliver notice to The Depository Trust Company, or DTC, at least five business days before the applicable Interest Payment Dates on which the notes are redeemed early.
Payment at Maturity:	If the notes have not been redeemed early and a Trigger Event has <b>not</b> occurred, you will receive a cash payment at maturity, for each \$1,000 principal amount note, equal to (a) \$1,000 plus (b) the Contingent Interest Payment applicable to the final Review Date. If the notes have not been redeemed early and a Trigger Event <b>has</b> occurred, at maturity you will lose 1% of the principal amount of your notes for every 1% that the Ending Index Level of the Lesser Performing Index is less than its Initial Index Level. Under these circumstances, your payment at maturity per \$1,000 principal amount note will be calculated as follows: $\$1,000 + (\$1,000 \times \text{Lesser Performing Index Return})$ <i>If the notes have not been redeemed early and a Trigger Event has occurred, you will lose more than 30% of your principal amount and could lose all of your principal amount at maturity.</i>
Trigger Event:	A Trigger Event occurs if the Ending Index Level ( <i>i.e.</i> , the Index closing level on the final Review Date) of either Index is less than its Trigger Level.
Pricing Date:	On or about June 21, 2013
Settlement Date:	On or about June 28, 2013
Review Dates <sup>†</sup> :	December 23, 2013, June 23, 2014, December 22, 2014, June 22, 2015, December 21, 2015 and June 21, 2016 (the "final Review Date")
Interest Payment Dates <sup>†</sup> :	Notwithstanding anything to the contrary in the accompanying product supplement no. 29-I, the Interest Payment Dates will be December 31, 2013, June 30, 2014, December 30, 2014, June 29, 2015, December 29, 2015 and the Maturity Date
Maturity Date <sup>†</sup> :	June 28, 2016
CUSIP:	48126DNF1
Other Key Terms:	See "Additional Key Terms" in this term sheet
	<sup>†</sup> Subject to postponement in the event of certain market disruption events and as described under "Description of Notes — Postponement of a Review Date" and "Description of Notes — Postponement of a Payment Date" in the accompanying product supplement no. 29-I

**Investing in the Callable Contingent Interest Notes involves a number of risks. See "Risk Factors" beginning on page PS-13 of the accompanying product supplement no. 29-I, "Risk Factors" beginning on page US-1 of the accompanying underlying supplement 1-I and "Selected Risk Considerations" beginning on page TS-3 of this term sheet.** Neither the Securities and Exchange Commission (the "SEC") nor any state securities commission has approved or disapproved of the notes or passed upon the accuracy or the adequacy of this term sheet or the accompanying product supplement, underlying supplement, prospectus supplement and prospectus. Any representation to the contrary is a criminal offense.

	Price to Public (1)	Fees and Commissions (2)	Proceeds to Issuer
Per note	\$1,000	\$	\$
Total	\$	\$	\$

- (1) See "Supplemental Use of Proceeds" in this term sheet for information about the components of the price to public of the notes.  
 (2) J.P. Morgan Securities LLC, which we refer to as JPMS, acting as agent for JPMorgan Chase & Co., will pay all of the selling commissions it receives from us to other affiliated or unaffiliated dealers. In no event will these selling commissions exceed \$18.50 per \$1,000 principal amount note. See "Plan of Distribution (Conflicts of Interest)" beginning on page PS-66 of the accompanying product supplement no. 29-I.

**If the notes priced today, the estimated value of the notes as determined by JPMS would be approximately \$958.00 per \$1,000 principal amount note. JPMS's estimated value of the notes, when the terms of the notes are set, will be provided by JPMS in the pricing supplement and will not be less than \$940.00 per \$1,000 principal amount note. See "JPMS's Estimated Value of the Notes" in this term sheet for additional information.**

*The notes are not bank deposits and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency, nor are they obligations of, or guaranteed by, a bank.*

J.P.Morgan

June 4, 2013

### Additional Terms Specific to the Notes

JPMorgan Chase & Co. has filed a registration statement (including a prospectus) with the SEC for the offering to which this term sheet relates. Before you invest, you should read the prospectus in that registration statement and the other documents relating to this offering that JPMorgan Chase & Co. has filed with the SEC for more complete information about JPMorgan Chase & Co. and this offering. You may get these documents without cost by visiting EDGAR on the SEC website at [www.sec.gov](http://www.sec.gov). Alternatively, JPMorgan Chase & Co., any agent or any dealer participating in this offering will arrange to send you the prospectus, the prospectus supplement, product supplement no. 29-I, underlying supplement no. 1-I and this term sheet if you so request by calling toll-free 866-535-9248.

You may revoke your offer to purchase the notes at any time prior to the time at which we accept such offer by notifying the applicable agent. We reserve the right to change the terms of, or reject any offer to purchase, the notes prior to their issuance. In the event of any changes to the terms of the notes, we will notify you and you will be asked to accept such changes in connection with your purchase. You may also choose to reject such changes, in which case we may reject your offer to purchase.

You should read this term sheet together with the prospectus dated November 14, 2011, as supplemented by the prospectus supplement dated November 14, 2011 relating to our Series E medium-term notes of which these notes are a part, and the more detailed information contained in product supplement no. 29-I dated August 31, 2012 and underlying supplement no. 1-I dated November 14, 2011. **This term sheet, together with the documents listed below, contains the terms of the notes and supersedes all other prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, fact sheets, brochures or other educational materials of ours.** You should carefully consider, among other things, the matters set forth in “Risk Factors” in the accompanying product supplement no. 29-I and “Risk Factors” in the accompanying underlying supplement no. 1-I, as the notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisers before you invest in the notes.

You may access these documents on the SEC website at [www.sec.gov](http://www.sec.gov) as follows (or if such address has changed, by reviewing our filings for the relevant date on the SEC website):

- Product supplement no. 29-I dated August 31, 2012:  
[http://www.sec.gov/Archives/edgar/data/19617/000095010312004448/crt\\_dp32532-424b2.pdf](http://www.sec.gov/Archives/edgar/data/19617/000095010312004448/crt_dp32532-424b2.pdf)
- Underlying supplement no. 1-I dated November 14, 2011:  
[http://www.sec.gov/Archives/edgar/data/19617/000089109211007615/e46154\\_424b2.pdf](http://www.sec.gov/Archives/edgar/data/19617/000089109211007615/e46154_424b2.pdf)
- Prospectus supplement dated November 14, 2011:  
[http://www.sec.gov/Archives/edgar/data/19617/000089109211007578/e46180\\_424b2.pdf](http://www.sec.gov/Archives/edgar/data/19617/000089109211007578/e46180_424b2.pdf)
- Prospectus dated November 14, 2011:  
[http://www.sec.gov/Archives/edgar/data/19617/000089109211007568/e46179\\_424b2.pdf](http://www.sec.gov/Archives/edgar/data/19617/000089109211007568/e46179_424b2.pdf)

Our Central Index Key, or CIK, on the SEC website is 19617. As used in this term sheet, the “Company,” “we,” “us” and “our” refer to JPMorgan Chase & Co.

### Additional Key Terms

Index Return:	With respect to each Index: $\frac{\text{Ending Index Level} - \text{Initial Index Level}}{\text{Initial Index Level}}$
Initial Index Level:	With respect to each Index, the Index closing level of that Index on the Pricing Date.
Ending Index Level:	With respect to each Index, the Index closing level of that Index on the final Review Date
Lesser Performing Index:	The Index with the Lesser Performing Index Return
Lesser Performing Index Return:	The lower of the Index Returns of the Indices

### Supplemental Terms of the Notes

Notwithstanding anything to the contrary in product supplement no. 29-I, the notes will be subject to early redemption at our option as described under “Key Terms — Early Redemption” in this term sheet and will not be subject to an automatic call.

## Selected Purchase Considerations

- **SEMIANNUAL CONTINGENT INTEREST PAYMENTS** — The notes offer the potential to earn a Contingent Interest Payment in connection with each semiannual Review Date of between \$33.75\* and \$36.25\* per \$1,000 principal amount note (equivalent to a Contingent Interest Rate of between 6.75%\* and 7.25%\* per annum, payable at a rate of between 3.375%\* and 3.625%\* semiannually). If the notes have not been redeemed early and the Index closing level of each Index on any Review Date is greater than or equal to its Interest Barrier, you will receive a Contingent Interest Payment on the applicable Interest Payment Date. If the Index closing level of either Index on any Review Date is less than its Interest Barrier, no Contingent Interest Payment will be made with respect to that Review Date. If payable, a Contingent Interest Payment will be made to the holders of record at the close of business on the business day immediately preceding the applicable Interest Payment Date. **Because the notes are our unsecured and unsubordinated obligations, payment of any amount on the notes is subject to our ability to pay our obligations as they become due.**

\*The actual Contingent Interest Rate will be provided in the pricing supplement and will not be less than 6.75% per annum or greater than 7.25% per annum.

- **POTENTIAL EARLY EXIT AS A RESULT OF THE EARLY REDEMPTION FEATURE** — We, at our election, may redeem the notes early, in whole but not in part, on any of the Interest Payment Dates (other than the final Interest Payment Date). If the notes are redeemed early, you will receive \$1,000 *plus* any accrued and unpaid Contingent Interest Payment for each \$1,000 principal amount note on the applicable Interest Payment Date on which the notes are redeemed early.
- **THE NOTES DO NOT GUARANTEE THE RETURN OF YOUR PRINCIPAL IF THE NOTES ARE NOT REDEEMED EARLY** — If the notes have not been redeemed early, we will pay you your principal back at maturity only if a Trigger Event has not occurred. **However, if the notes have not been redeemed early and a Trigger Event has occurred, you will lose more than 30% of your principal amount and could lose up to the entire principal amount of your notes.**

- **EXPOSURE TO EACH OF THE INDICES** — The return on the notes is linked to the Lesser Performing Index, which will be either of the S&P 500® Index or the Russell 2000® Index.

The S&P 500® Index consists of 500 component stocks selected to provide a performance benchmark for the U.S. equity markets. For additional information about the S&P 500® Index, see the information set forth under “Equity Index Descriptions — The S&P 500® Index” in the accompanying underlying supplement no. 1-I.

The Russell 2000® Index consists of the middle 2,000 companies included in the Russell 3000E™ Index and, as a result of the index calculation methodology, consists of the smallest 2,000 companies included in the Russell 3000® Index. The Russell 2000® Index is designed to track the performance of the small capitalization segment of the U.S. equity market. For additional information about the Russell 2000® Index, see the information set forth under “Equity Index Descriptions — The Russell 2000® Index” in the accompanying underlying supplement no. 1-I.

- **TAX TREATMENT** — You should review carefully the section entitled “Material U.S. Federal Income Tax Consequences” in the accompanying product supplement no. 29-I, although for purposes of this offering, references therein to an automatic call should be read to refer to an early redemption. In determining our reporting responsibilities we intend to treat (i) the notes for U.S. federal income tax purposes as prepaid forward contracts with associated contingent coupons and (ii) any Contingent Interest Payments as ordinary income, as described in the section entitled “Material U.S. Federal Income Tax Consequences — Tax Consequences to U.S. Holders — Tax Treatment as Prepaid Forward Contracts with Associated Contingent Coupons” in the accompanying product supplement no. 29-I. Based on the advice of Davis Polk & Wardwell LLP, our special tax counsel, we believe that this is a reasonable treatment, but that there are other reasonable treatments that the Internal Revenue Service (the “IRS”) or a court may adopt, in which case the timing and character of any income or loss on the notes could be materially affected. In addition, in 2007 Treasury and the IRS released a notice requesting comments on the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. The notice focuses in particular on whether to require investors in these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments and the relevance of factors such as the nature of the underlying property to which the instruments are linked. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially affect the tax consequences of an investment in the notes, possibly with retroactive effect. You should consult your tax adviser regarding the U.S. federal income tax consequences of an investment in the notes, including possible alternative treatments and the issues presented by this notice.

The U.S. federal income tax treatment of Contingent Interest Payments is uncertain, and although we believe it is reasonable to conclude that Contingent Interest Payments are not subject to U.S. withholding tax (at least if a Form W-8 is provided), a withholding agent may nonetheless withhold on these payments (generally at a rate of 30%, subject to the possible reduction or elimination of that rate under an applicable income tax treaty), unless income from your notes is effectively connected with your conduct of a trade or business in the United States (and, if an applicable treaty so requires, attributable to a permanent establishment in the United States). In the event of any withholding, we will not be required to pay any additional amounts with respect to amounts so withheld. If you are not a United States person, you are urged to consult your tax adviser regarding the U.S. federal income tax consequences of an investment in the notes in light of your particular circumstances.

## Selected Risk Considerations

An investment in the notes involves significant risks. Investing in the notes is not equivalent to investing directly in either or both of the Indices or any of the equity securities included in the Indices. These risks are explained in more detail in the “Risk Factors” section of the accompanying product supplement no. 29-I dated August 31, 2012 and in the “Risk Factors” section of the accompanying underlying supplement no. 1-I dated November 14, 2011.

- **YOUR INVESTMENT IN THE NOTES MAY RESULT IN A LOSS** — The notes do not guarantee any return of principal. If the notes have not been redeemed early and a Trigger Event has occurred, you will lose 1% of your principal amount at maturity for every 1% that the Ending Index Level of the Lesser Performing Index is less than its Initial Index Level. Accordingly, under these circumstances, you will lose more than 30% of your principal amount and could lose up to the entire principal amount of your notes.
- **THE NOTES DO NOT GUARANTEE THE PAYMENT OF INTEREST AND MAY NOT PAY ANY INTEREST AT ALL** — The terms of the notes differ from those of conventional debt securities in that, among other things, whether we pay interest is linked to the performance of each Index. If the notes have not been redeemed early, we will make a Contingent Interest Payment with respect to a Review Date only if the Index closing level of each Index on that Review Date is greater than or equal to its Interest Barrier. If the Index closing level of either Index on that Review Date is less than its Interest Barrier, no Contingent Interest Payment will be made with respect to that Review Date, and the Contingent Interest Payment that would otherwise have been payable with respect to that Review Date will not be accrued and subsequently paid. Accordingly, if the Index closing level of either Index on each Review Date is less than its Interest Barrier, you will not receive any interest payments over the term of the notes.
- **CREDIT RISK OF JPMORGAN CHASE & CO.** — The notes are subject to the credit risk of JPMorgan Chase & Co., and our credit ratings and credit spreads may adversely affect the market value of the notes. Investors are dependent on JPMorgan Chase & Co.’s ability to pay all amounts due on the notes. Any actual or potential change in our creditworthiness or credit spreads, as determined by the market for taking our credit risk, is likely to adversely affect the value of the notes. If we were to default on our payment obligations, you may not receive any amounts owed to you under the notes and you could lose your entire investment.
- **THE OPTIONAL EARLY REDEMPTION FEATURE MAY FORCE A POTENTIAL EARLY EXIT** — If the notes are redeemed early, the amount of Contingent Interest Payments made on the notes may be less than the amount of Contingent Interest Payments that would have been payable if the notes were held to maturity, and, for each \$1,000 principal amount note, you will receive \$1,000 *plus* any accrued and unpaid Contingent Interest Payment.
- **REINVESTMENT RISK** — If your notes are redeemed early, the term of the notes may be reduced to as short as six months and you will not receive any Contingent Interest Payments after the applicable Interest Payment Date. There is no guarantee that you would be able to reinvest the proceeds from an investment in the notes at a comparable return and/or with a comparable interest rate for a similar level of risk in the event the notes are redeemed early prior to the Maturity Date.
- **THE APPRECIATION POTENTIAL OF THE NOTES IS LIMITED, AND YOU WILL NOT PARTICIPATE IN ANY APPRECIATION IN THE VALUE OF EITHER INDEX** — The appreciation potential of the notes is limited to the sum of any Contingent Interest Payments that may be paid over the term of the notes, regardless of any appreciation in the value of either Index, which may be significant. You will not participate in any appreciation in the value of either Index. Accordingly, the return on the notes may be significantly less than the return on a direct investment in either Index during the term of the notes.
- **POTENTIAL CONFLICTS** — We and our affiliates play a variety of roles in connection with the issuance of the notes, including acting as calculation agent and as an agent of the offering of the notes, hedging our obligations under the notes and making the assumptions used to determine the pricing of the notes and the estimated value of the notes when the terms of the notes are set, which we refer to as JPMS’s estimated value. In performing these duties, our economic interests and the economic interests of the calculation agent and other affiliates of ours are potentially adverse to your interests as an investor in the notes. In addition, our business activities, including hedging and trading activities, could cause our economic interests to be adverse to yours and could adversely affect any payment on the notes and the value of the notes. It is possible that hedging or trading activities of ours or our affiliates in connection with the notes could result in substantial returns for us or our affiliates while the value of the notes declines. Please refer to “Risk Factors — Risks Relating to the Notes Generally” in the accompanying product supplement no. 29-I for additional information about these risks.  
We are also currently one of the companies that make up the S&P 500® Index. We will not have any obligation to consider your interests as a holder of the notes in taking any corporate action that might affect the value of the S&P 500® Index and the notes.
- **YOU ARE EXPOSED TO THE RISK OF DECLINE IN THE VALUE OF EACH INDEX** — Your return on the notes and your payment at maturity, if any, is not linked to a basket consisting of the Indices. If the notes have not been redeemed early, your payment at maturity is contingent upon the performance of each individual Index such that you will be equally exposed to the risks related to *either* of the Indices. Poor performance by any of the Indices over the term of the notes may negatively affect whether you will receive a Contingent Interest Payment on any Interest Payment Date and your payment

at maturity and will not be offset or mitigated by positive performance by the other Index. Accordingly, your investment is subject to the risk of decline in the level of each Index.

- **THE BENEFIT PROVIDED BY THE TRIGGER LEVEL MAY TERMINATE ON THE FINAL REVIEW DATE** — If the Ending Index Level of either Index is less than its Trigger Level (*i.e.*, a Trigger Event occurs) and the notes have not been redeemed early, the benefit provided by the Trigger Level will terminate and you will be fully exposed to any depreciation in the Lesser Performing Index. Because the Ending Index Level of each Index will be determined based on the applicable Index closing level on a single day near the end of the term of the notes, the Index closing level of each Index at the maturity date or at other times during the term of the notes could be greater than or equal to its Trigger Level. This difference could be particularly large if there is a significant decrease in the Index closing level of either or both Indices during the later portion of the term of the notes or if there is significant volatility in the Index closing level of either or both Indices during the term of the notes, especially on dates near the final Review Date.
- **YOUR PAYMENT AT MATURITY MAY BE DETERMINED BY THE LESSER PERFORMING INDEX** — If the notes have not been redeemed early and a Trigger Event has occurred, you will lose some or all of your principal amount at maturity if the Ending Index Level of either Index is less than its Initial Index Level. This will be true even if the Ending Index Level of the other Index is greater than or equal to its Initial Index Level. The Indices' respective performance may not be correlated and, as a result, if the notes have not been redeemed early, you may receive the principal amount of your notes at maturity only if there is a broad-based rise in the performance of U.S. equities across diverse markets during the term of the notes.
- **JPMS'S ESTIMATED VALUE OF THE NOTES WILL BE LOWER THAN THE ORIGINAL ISSUE PRICE (PRICE TO PUBLIC) OF THE NOTES** — JPMS's estimated value is only an estimate using several factors. The original issue price of the notes will exceed JPMS's estimated value because costs associated with selling, structuring and hedging the notes are included in the original issue price of the notes. These costs include the selling commissions, the projected profits, if any, that our affiliates expect to realize for assuming risks inherent in hedging our obligations under the notes and the estimated cost of hedging our obligations under the notes. See "JPMS's Estimated Value of the Notes" in this term sheet.
- **JPMS'S ESTIMATED VALUE DOES NOT REPRESENT FUTURE VALUES OF THE NOTES AND MAY DIFFER FROM OTHERS' ESTIMATES** — JPMS's estimated value of the notes is determined by reference to JPMS's internal pricing models when the terms of the notes are set. This estimated value is based on market conditions and other relevant factors existing at that time and JPMS's assumptions about market parameters, which can include volatility, dividend rates, interest rates and other factors. Different pricing models and assumptions could provide valuations for notes that are greater than or less than JPMS's estimated value. In addition, market conditions and other relevant factors in the future may change, and any assumptions may prove to be incorrect. On future dates, the value of the notes could change significantly based on, among other things, changes in market conditions, our creditworthiness, interest rate movements and other relevant factors, which may impact the price, if any, at which JPMS would be willing to buy notes from you in secondary market transactions. See "JPMS's Estimated Value of the Notes" in this term sheet.
- **JPMS'S ESTIMATED VALUE IS NOT DETERMINED BY REFERENCE TO CREDIT SPREADS FOR OUR CONVENTIONAL FIXED-RATE DEBT** — The internal funding rate used in the determination of JPMS's estimated value generally represents a discount from the credit spreads for our conventional fixed-rate debt. The discount is based on, among other things, our view of the funding value of the notes as well as the higher issuance, operational and ongoing liability management costs of the notes in comparison to those costs for our conventional fixed-rate debt. If JPMS were to use the interest rate implied by our conventional fixed-rate credit spreads, we would expect the economic terms of the notes to be more favorable to you. Consequently, our use of an internal funding rate would have an adverse effect on the terms of the notes and any secondary market prices of the notes. See "JPMS's Estimated Value of the Notes" in this term sheet.
- **THE VALUE OF THE NOTES AS PUBLISHED BY JPMS (AND WHICH MAY BE REFLECTED ON CUSTOMER ACCOUNT STATEMENTS) MAY BE HIGHER THAN JPMS'S THEN-CURRENT ESTIMATED VALUE OF THE NOTES FOR A LIMITED TIME PERIOD** — We generally expect that some of the costs included in the original issue price of the notes will be partially paid back to you in connection with any repurchases of your notes by JPMS in an amount that will decline to zero over an initial predetermined period. These costs can include projected hedging profits, if any, and, in some circumstances, estimated hedging costs and our secondary market credit spreads for structured debt issuances. See "Secondary Market Prices of the Notes" in this term sheet for additional information relating to this initial period. Accordingly, the estimated value of your notes during this initial period may be lower than the value of the notes as published by JPMS (and which may be shown on your customer account statements).
- **SECONDARY MARKET PRICES OF THE NOTES WILL LIKELY BE LOWER THAN THE ORIGINAL ISSUE PRICE OF THE NOTES** — Any secondary market prices of the notes will likely be lower than the original issue price of the notes because, among other things, secondary market prices take into account our secondary market credit spreads for structured debt issuances and, also, because secondary market prices (a) exclude selling commissions and (b) may exclude projected hedging profits, if any, and estimated hedging costs that are included in the original issue price of the notes. As a result, the price, if any, at which JPMS will be willing to buy notes from you in secondary market transactions, if at all, is likely to be lower than the original issue price. Any sale by you prior to the maturity date

could result in a substantial loss to you. See the immediately following risk consideration for information about additional factors that will impact any secondary market prices of the notes.

The notes are not designed to be short-term trading instruments. Accordingly, you should be able and willing to hold your notes to maturity. See “— Lack of Liquidity” below.

- **SECONDARY MARKET PRICES OF THE NOTES WILL BE IMPACTED BY MANY ECONOMIC AND MARKET FACTORS** — The secondary market price of the notes during their term will be impacted by a number of economic and market factors, which may either offset or magnify each other, aside from the selling commissions, projected hedging profits, if any, estimated hedging costs and the levels of the Indices, as applicable, including:
  - any actual or potential change in our creditworthiness or credit spreads;
  - customary bid-ask spreads for similarly sized trades;
  - secondary market credit spreads for structured debt issuances;
  - the actual and expected volatility in the levels of the Indices;
  - the time to maturity of the notes;
  - whether the Index closing level of either Index has been, or is expected to be, less than its Interest Barrier on any Review Date and whether a Trigger Event is expected to occur;
  - the optional early redemption feature and whether we are expected to redeem the notes early, which is likely to limit the value of the notes;
  - the dividend rates on the equity securities included in the Indices;
  - the actual and expected positive or negative correlation between the Indices, or the actual or expected absence of any such correlation;
  - interest and yield rates in the market generally; and
  - a variety of other economic, financial, political, regulatory and judicial events.
- **ADDITIONALLY, INDEPENDENT PRICING VENDORS AND/OR THIRD PARTY BROKER-DEALERS MAY PUBLISH A PRICE FOR THE NOTES, WHICH MAY ALSO BE REFLECTED ON CUSTOMER ACCOUNT STATEMENTS. THIS PRICE MAY BE DIFFERENT (HIGHER OR LOWER) THAN THE PRICE OF THE NOTES, IF ANY, AT WHICH JPMS MAY BE WILLING TO PURCHASE YOUR NOTES IN THE SECONDARY MARKET.**
- **NO DIVIDENDS OR VOTING RIGHTS** — As a holder of the notes, you will not have voting rights or rights to receive cash dividends or other distributions or other rights that holders of the securities included in the Indices would have.
- **VOLATILITY RISK** — Greater expected volatility with respect to an Index indicates a greater likelihood as of the Pricing Date that the Index closing level of that Index could be less than its Interest Barrier on a Review Date and/or that a Trigger Event could occur. An Index’s volatility, however, can change significantly over the term of the notes. The Index closing level of an Index could fall sharply on any day during the term of the notes, which could result in your not receiving any Contingent Interest Payment or a significant loss of principal, or both.
- **AN INVESTMENT IN THE NOTES IS SUBJECT TO RISKS ASSOCIATED WITH SMALL CAPITALIZATION STOCKS** — The stocks that constitute the Russell 2000® Index are issued by companies with relatively small market capitalization. The stock prices of smaller companies may be more volatile than stock prices of large capitalization companies. Small capitalization companies may be less able to withstand adverse economic, market, trade and competitive conditions relative to larger companies. Small capitalization companies are less likely to pay dividends on their stocks, and the presence of a dividend payment could be a factor that limits downward stock price pressure under adverse market conditions.
- **LACK OF LIQUIDITY** — The notes will not be listed on any securities exchange. JPMS intends to offer to purchase the notes in the secondary market but is not required to do so. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the notes easily. Because other dealers are not likely to make a secondary market for the notes, the price at which you may be able to trade your notes is likely to depend on the price, if any, at which JPMS is willing to buy the notes.
- **THE TERMS AND VALUATION OF THE NOTES WILL BE PROVIDED IN THE PRICING SUPPLEMENT** — The final terms of the notes will be based on relevant market conditions when the terms of the notes are set and will be provided in the pricing supplement. In particular, each of JPMS’s estimated value and the Contingent Interest Rate will be provided in the pricing supplement and each may be as low as the applicable minimum set forth on the cover of this term sheet. Accordingly, you should consider your potential investment in the notes based on the minimums for JPMS’s estimated value and the Contingent Interest Rate.

### What Are the Payments on the Notes, Assuming a Range of Performances for the Lesser Performing Index?

If the notes have not been previously redeemed early and the Index closing level of each Index on any Review Date is greater than or equal to its Interest Barrier, you will receive on the applicable Interest Payment Date for each \$1,000 principal amount note a Contingent Interest Payment equal to between \$33.75 and \$36.25 (equivalent to a Contingent Interest Rate of between 6.75% and 7.25% per annum, payable at a rate of between 3.375% and 3.625% semiannually). The actual Contingent Interest Rate will be provided in the pricing supplement and will not be less than 6.75% per annum or greater than 7.25% per annum. If the Index closing level of either Index on any Review Date is less than its Interest Barrier, no Contingent Interest Payment will be made with respect to that Review Date. We refer to the Interest Payment Date immediately following any Review Date on which the Index closing level of either Index is less than its Interest Barrier as a "No-Coupon Date." The following table assumes a Contingent Interest Rate of 6.75% per annum and illustrates the hypothetical total Contingent Interest Payments per \$1,000 principal amount note over the term of the notes depending on how many No-Coupon Dates occur.

Number of No-Coupon Dates	Total Contingent Coupon Payments
0 No-Coupon Dates	\$202.50
1 No-Coupon Date	\$168.75
2 No-Coupon Dates	\$135.00
3 No-Coupon Dates	\$101.25
4 No-Coupon Dates	\$67.50
5 No-Coupon Dates	\$33.75
6 No-Coupon Dates	\$0.00

The following table illustrates the payment at maturity per \$1,000 principal amount note, assuming a range of performances for the Lesser Performing Index on a given Review Date. **Each hypothetical payment set forth below assumes that the notes are not redeemed early and that the Lesser Performing Index is the Russell 2000® Index. We make no representation or warranty as to which of the Indices will be the Lesser Performing Index for purposes of calculating your actual payment at maturity, if any, or as to what the Index closing level of either Index will be on any Review Date.** In addition, the following table and examples assume an Initial Index Level for the Lesser Performing Index of 1,000, an Interest Barrier and a Trigger Level for the Lesser Performing Index of 700 (equal to 70% of the hypothetical Initial Index Level) and a Contingent Interest Rate of 6.75% per annum (payable at a rate of 3.375% semiannually). The actual Contingent Interest Rate will be provided in the pricing supplement and will not be less than 6.75% per annum or greater than 7.25% per annum. Each hypothetical payment set forth below is for illustrative purposes only and may not be the actual payment applicable to a purchaser of the notes. The numbers appearing in the following table and examples have been rounded for ease of analysis.

Ending Index Level of Lesser Performing Index	Lesser Performing Index Return	Payment at Maturity	
		Payment at Maturity If a Trigger Event Has Not Occurred (1)	Payment at Maturity If a Trigger Event Has Occurred (1)
1,800.00	80.00%	\$1,033.75	N/A
1,700.00	70.00%	\$1,033.75	N/A
1,600.00	60.00%	\$1,033.75	N/A
1,500.00	50.00%	\$1,033.75	N/A
1,400.00	40.00%	\$1,033.75	N/A
1,300.00	30.00%	\$1,033.75	N/A
1,200.00	20.00%	\$1,033.75	N/A
1,150.00	15.00%	\$1,033.75	N/A
1,100.00	10.00%	\$1,033.75	N/A
1,050.00	5.00%	\$1,033.75	N/A
<b>1,000.00</b>	<b>0.00%</b>	<b>\$1,033.75</b>	<b>N/A</b>
950.00	-5.00%	\$1,033.75	N/A
900.00	-10.00%	\$1,033.75	N/A
800.00	-20.00%	\$1,033.75	N/A
700.00	-30.00%	\$1,033.75	N/A
699.90	-30.01%	N/A	\$699.90
600.00	-40.00%	N/A	\$600.00
500.00	-50.00%	N/A	\$500.00
400.00	-60.00%	N/A	\$400.00
300.00	-70.00%	N/A	\$300.00
200.00	-80.00%	N/A	\$200.00
100.00	-90.00%	N/A	\$100.00
0.00	-100.00%	N/A	\$0.00

(1) A Trigger Event occurs if the Ending Index Level (*i.e.*, the Index closing level on the final Review Date) of either Index is less than its Trigger Level.

## Hypothetical Examples of Amounts Payable on the Notes

The following examples illustrate how a payment set forth in the tables on the prior page is calculated.

**Example 1: The notes are not redeemed early, Contingent Interest Payments are paid in connection with each of the Review Dates preceding the final Review Date and the Index closing level of the Lesser Performing Index increases from the Initial Index Level of 1,000 to an Ending Index Level of 1,200 — A Trigger Event has not occurred.** The investor receives a payment of \$33.75 per \$1,000 principal amount note in connection with each of the Review Dates preceding the final Review Date. Because the notes are not redeemed early and the Ending Index Level of each Index is greater than its Interest Barrier and Trigger Level, the investor receives at maturity a payment of \$1,033.75 per \$1,000 principal amount note. This payment consists of a Contingent Interest Payment of \$33.75 per \$1,000 principal amount note and repayment of principal equal to \$1,000 per \$1,000 principal amount note. The total amount paid on the notes over the term of the notes is \$1,202.50 per \$1,000 principal amount note. *This represents the maximum total payment an investor may receive over the term of the notes.*

**Example 2: The notes are not redeemed early, Contingent Interest Payments are paid in connection with two of the Review Dates preceding the final Review Date and the Index closing level of the Lesser Performing Index decreases from the Initial Index Level of 1,000 to an Ending Index Level of 700 — A Trigger Event has not occurred.** The investor receives a payment of \$33.75 per \$1,000 principal amount note in connection with two of the Review Dates preceding the final Review Date. Because the notes are not redeemed early, a Trigger Event has not occurred and the Ending Index Level of the Lesser Performing Index is equal to its Interest Barrier, even though the Ending Index Level of the Lesser Performing Index is less than its Initial Index Level, the investor receives at maturity a payment of \$1,033.75 per \$1,000 principal amount note. This payment consists of a Contingent Interest Payment of \$33.75 per \$1,000 principal amount note and repayment of principal equal to \$1,000 per \$1,000 principal amount note. The total amount paid on the notes over the term of the notes is \$1,101.25 per \$1,000 principal amount note.

**Example 3: The notes are not redeemed early, Contingent Interest Payments are paid in connection with each of the Review Dates preceding the final Review Date and the Index closing level of the Lesser Performing Index decreases from the Initial Index Level of 1,000 to an Ending Index Level of 400 — A Trigger Event has occurred.** The investor receives a payment of \$33.75 per \$1,000 principal amount note in connection with each of the Review Dates preceding the final Review Date. Because the notes are not redeemed early, a Trigger Event has occurred and the Ending Index Level of the Lesser Performing Index is less than its Interest Barrier, the investor receives at maturity a payment of \$400 per \$1,000 principal amount note, calculated as follows:

$$\$1,000 + (\$1,000 \times -60\%) = \$400$$

The total amount paid on the notes over the term of the notes is \$568.75 per \$1,000 principal amount note.

**Example 4: The notes are not redeemed early, no Contingent Interest Payments are paid in connection with the Review Dates preceding the final Review Date and the Index closing level of the Lesser Performing Index decreases from the Initial Index Level of 1,000 to an Ending Index Level of 300 — A Trigger Event has occurred.** Because the notes are not redeemed early, no Contingent Interest Payments are paid in connection with the Review Dates preceding the final Review Date, a Trigger Event has occurred and the Ending Index Level of the Lesser Performing Index is less than its Interest Barrier, the investor receives no payments over the term of the notes, other than a payment at maturity of \$300 per \$1,000 principal amount note, calculated as follows:

$$\$1,000 + (\$1,000 \times -70\%) = \$300$$

The hypothetical payments on the notes shown above do not reflect fees or expenses that would be associated with any sale in the secondary market. If these fees and expenses were included, the hypothetical payments shown above would likely be lower.

## Historical Information

The following graphs show the historical weekly performance of the S&P 500® Index and the Russell 2000® Index from January 4, 2008 through May 31, 2013. The Index closing level of the S&P 500® Index on June 3, 2013 was 1,640.42. The Index closing level of the Russell 2000® Index on June 3, 2013 was 990.53.

We obtained the various Index closing levels of the Indices below from Bloomberg Financial Markets, without independent verification. The historical levels of each Index should not be taken as an indication of future performance, and no assurance can be given as to the Index closing level of either Index on the Pricing Date or any Review Date, including the final Review Date. We cannot give you assurance that the performance of the Indices will result in the return of any of your principal or the payment of any interest.

## JPMS's Estimated Value of the Notes

JPMS's estimated value of the notes set forth on the cover of this term sheet is equal to the sum of the values of the following hypothetical components: (1) a fixed-income debt component with the same maturity as the notes, valued using our internal funding rate for structured debt described below, and (2) the derivative or derivatives underlying the economic terms of the notes. JPMS's estimated value does not represent a minimum price at which JPMS would be willing to buy your notes in any secondary market (if any exists) at any time. The internal funding rate used in the determination of JPMS's estimated value generally represents a discount from the credit spreads for our conventional fixed-rate debt. For additional information, see "Selected Risk Considerations — JPMS's Estimated Value Is Not Determined by Reference to Credit Spreads for Our Conventional Fixed-Rate Debt." The value of the derivative or derivatives underlying the economic terms of the notes is derived from JPMS's internal pricing models. These models are dependent on inputs such as the traded market prices of comparable derivative instruments and on various other inputs, some of which are market-observable, and which can include volatility, dividend rates, interest rates and other factors, as well as assumptions about future market events and/or environments. Accordingly, JPMS's estimated value of the notes is determined when the terms of the notes are set based on market conditions and other relevant factors and

assumptions existing at that time. See “Selected Risk Considerations — JPMS’s Estimated Value Does Not Represent Future Values of the Notes and May Differ from Others’ Estimates.”

JPMS’s estimated value of the notes will be lower than the original issue price of the notes because costs associated with selling, structuring and hedging the notes are included in the original issue price of the notes. These costs include the selling commissions paid to JPMS and other affiliated or unaffiliated dealers, the projected profits, if any, that our affiliates expect to realize for assuming risks inherent in hedging our obligations under the notes and the estimated cost of hedging our obligations under the notes. Because hedging our obligations entails risk and may be influenced by market forces beyond our control, this hedging may result in a profit that is more or less than expected, or it may result in a loss. A portion of the profits realized in hedging our obligations under the notes may be allowed to other affiliated or unaffiliated dealers, and we or one or more of our affiliates will retain any remaining hedging profits. See “Selected Risk Considerations — JPMS’s Estimated Value of the Notes Will Be Lower Than the Original Issue Price (Price to Public) of the Notes” in this term sheet.

### Secondary Market Prices of the Notes

For information about factors that will impact any secondary market prices of the notes, see “Selected Risk Considerations — Secondary Market Prices of the Notes Will Be Impacted by Many Economic and Market Factors” in this term sheet. In addition, we generally expect that some of the costs included in the original issue price of the notes will be partially paid back to you in connection with any repurchases of your notes by JPMS in an amount that will decline to zero over an initial predetermined period that is intended to be the shorter of six months and one-half of the stated term of the notes. The length of any such initial period reflects the structure of the notes, whether our affiliates expect to earn a profit in connection with our hedging activities, the estimated costs of hedging the notes and when these costs are incurred, as determined by JPMS. See “Selected Risk Considerations — The Value of the Notes as Published by JPMS (and Which May Be Reflected on Customer Account Statements) May Be Higher Than JPMS’s Then-Current Estimated Value of the Notes for a Limited Time Period.”

### Supplemental Use of Proceeds

The net proceeds we receive from the sale of the notes will be used for general corporate purposes and, in part, by us or one or more of our affiliates in connection with hedging our obligations under the notes.

The notes are offered to meet investor demand for products that reflect the risk-return profile and market exposure provided by the notes. See “What Are the Payments on the Notes, Assuming a Range of Performances for the Lesser Performing Index?” and “Hypothetical Examples of Amounts Payable on the Notes” in this term sheet for an illustration of the risk-return profile of the notes and “Selected Purchase Considerations — Exposure to Each of the Indices” in this term sheet for a description of the market exposure provided by the notes.

The original issue price of the notes is equal to JPMS’s estimated value of the notes plus the selling commissions paid to JPMS and other affiliated or unaffiliated dealers, plus (minus) the projected profits (losses) that our affiliates expect to realize for assuming risks inherent in hedging our obligations under the notes, plus the estimated cost of hedging our obligations under the notes.

For purposes of the notes offered by this term sheet, the first and second paragraph of the section entitled “Use of Proceeds and Hedging” on page PS-39 of the accompanying product supplement no. 29-I are deemed deleted in their entirety. Please refer instead to the discussion set forth above.

### Supplemental Plan of Distribution

We expect that delivery of the notes will be made against payment for the notes on or about the settlement date set forth on the front cover of this term sheet, which will be the fifth business day following the expected pricing date of the notes (this settlement cycle being referred to as T+5). Under Rule 15c6-1 under the Securities Exchange Act of 1934, as amended, trades in the secondary market generally are required to settle in three business days, unless the parties to that trade expressly agree otherwise. Accordingly, purchasers who wish to trade notes on the pricing date or the succeeding business day will be required to specify an alternate settlement cycle at the time of any such trade to prevent a failed settlement and should consult their own advisors.
