Underlying Indices

For more information about the underlying indices, including historical performance information, see the accompanying preliminary pricing supplement.

Risk Considerations

The risks identified below are not exhaustive. Please see “Risk Factors” in the accompanying prospectus supplement, product supplement and preliminary pricing supplement.

Risks Relating to the Securities Generally

- The securities do not pay interest or guarantee the return of any principal and your investment in the securities may result in a loss.
- The appreciation potential of the securities is limited.
- You are exposed to the price risk of each underlying index.
- Because the securities are linked to the performance of the worst performing underlying index, you are exposed to greater risks of no early redemption payment or maturity redemption payment and sustaining a significant loss on your investment than if the securities were linked to just one underlying index.
- The securities are subject to the credit risks of JPMorgan Financial and JPMorgan Chase & Co., and any actual or anticipated changes to our or JPMorgan Chase & Co.’s credit ratings or credit spreads may adversely affect the market value of the securities.
- As a finance subsidiary, JPMorgan Financial has no independent activities and has limited assets.
- Investors will not participate in any appreciation of any underlying index.
- Early redemption risk.
- Secondary trading may be limited.
- We may accelerate your securities in our sole discretion and the calculation agent may adjust their final payment in good faith and in a commercially reasonable manner if an acceleration event occurs.
- The final terms and estimated valuation of the securities will be provided in the pricing supplement.
- The U.S. federal income tax consequences of an investment in the securities are uncertain.

Risks Relating to Conflicts of Interest

- Economic interests of the issuer, the guarantor, the calculation agent, the agent of the offering of the securities and other affiliates of the issuer may be different from those of investors.
- Hedging and trading activities by the issuer and its affiliates could potentially affect the value of the securities.

Risks Relating to the Estimated Value and Secondary Market Prices of the Securities

- The estimated value of the securities will be lower than the original issue price (price to public) of the securities.
- The estimated value of the securities does not represent future values of the securities and may differ from others’ estimates.
- The estimated value of the securities is derived by reference to an internal funding rate.
- The value of the securities as published by J.P. Morgan Securities LLC (and which may be reflected on customer account statements) may be higher than the then-current estimated value of the securities for a limited time period.
- Secondary market prices of the securities will likely be lower than the original issue price of the securities.
- Secondary market prices of the securities will be impacted by many economic and market factors.

Risks Relating to the Underlying Indices

- JPMorgan Chase & Co. is currently one of the companies that make up the SPX Index.
- Investing in the securities is not equivalent to investing in any underlying index.
- Adjustments to any underlying index could adversely affect the value of the securities.
- An investment in the securities is subject to risks associated with small capitalization stocks with respect to the RTY Index.
- The securities are subject to risks associated with securities issued by non-U.S. companies with respect to the SX5E Index.
- The securities are not directly exposed to fluctuations in foreign exchange rates with respect to the SX5E Index.
- Governmental legislative and regulatory actions, including sanctions, could adversely affect your investment in the securities.

Tax Considerations

You should review carefully the discussion in the accompanying preliminary pricing supplement under “Additional Information about the Securities — Additional Provisions — Tax considerations” concerning the U.S. federal income tax consequences of an investment in the securities, and you should consult your tax adviser.
