Hypothetical Payout Profile*

* Assumes a call premium for each call date equal to the minimum call premium for that call date

If the securities are not automatically called and the ending level of the lowest performing Index on the final calculation day is less than its threshold level, you will have full downside exposure to the decrease in the level of that Index from its starting level, and you will lose more than 25%, and possibly all, of the principal amount of your securities at maturity.

Any positive return on the securities will be limited to the applicable call premium, even if the closing level of the lowest performing Index on the applicable call date significantly exceeds its starting level. You will not participate in any appreciation of any Index beyond the applicable call premium.

The securities are unsecured and unsubordinated obligations of JPMorgan Chase Financial Company LLC, which we refer to as JPMorgan Financial, the payment on which is fully and unconditionally guaranteed by JPMorgan Chase & Co. **Any payment on the securities is subject to the credit risk of JPMorgan Financial, as issuer of the securities, and the credit risk of JPMorgan Chase & Co., as guarantor of the securities.**

If the securities priced on the date of the accompanying preliminary pricing supplement, the estimated value of the securities would be approximately $951.80 per security. The estimated value of the securities, when the terms of the securities are set, will be provided in the pricing supplement and will not be less than $920.00 per security. See "The Estimated Value of the Securities" in the preliminary pricing supplement for additional information.
