### Hypothetical Payout Profile\*

\*Assumes an upside participation rate equal to the minimum upside participation rate.

**If the securities are automatically called, the positive return on the securities will be limited to the call premium, even if the stock closing price of the lowest performing Underlying Stock on the call date significantly exceeds its starting price. If the securities are automatically called, you will not have the opportunity to participate in any appreciation of the lowest performing Underlying Stock on the final calculation day at the upside participation rate.**

**If the securities are not automatically called and the ending price of the lowest performing Underlying Stock on the final calculation day is less than its threshold price, you will have full downside exposure to the decrease in the price of that Underlying Stock from its starting price and you will lose more than 50%, and possibly all, of the principal amount of your securities at maturity.**

The securities are unsecured and unsubordinated obligations of JPMorgan Chase Financial Company LLC, which we refer to as JPMorgan Financial, the payment on which is fully and unconditionally guaranteed by JPMorgan Chase & Co. **Any payment on the securities is subject to the credit risk of JPMorgan Financial, as issuer of the securities, and the credit risk of JPMorgan Chase & Co., as guarantor of the securities.**
