

2-Year NDX Auto-Callable Dual Directional Trigger PLUS

This document provides a summary of the terms of the Auto-Callable Dual Directional Trigger PLUS, which we refer to as the Trigger PLUS. Investors must carefully review the accompanying preliminary pricing supplement referenced below, product supplement, underlying supplement, prospectus supplement and prospectus and the "Risk Considerations" on the following page, prior to making an investment decision.

SUMMARY TERMS

Issuer: JPMorgan Chase Financial Company LLC ("JPMorgan Financial")
Guarantor: JPMorgan Chase & Co.
Underlying index: Nasdaq-100 Index® (Bloomberg ticker: NDX Index)
Early redemption: If, on the redemption observation date, the closing level of the underlying index is **greater than or equal to** the initial index value, the Trigger PLUS will be automatically redeemed for the early redemption payment on the redemption date. No further payments will be made on the Trigger PLUS once they have been redeemed. In addition, if the Trigger PLUS are automatically redeemed prior to maturity, you will not benefit from the leverage feature that applies to the payment at maturity if the final index value is greater than the initial index value. Moreover, if the Trigger PLUS are automatically redeemed, your investment may underperform the underlying index, and the early redemption payment may be significantly less than the payment at maturity you would receive for the same level of appreciation of the underlying index had the Trigger PLUS not been automatically redeemed and instead remained outstanding until maturity.

Early redemption payment: At least \$1,097.00 per Trigger PLUS. The actual early redemption payment will be provided in the pricing supplement and will not be less than \$1,097.00 per Trigger PLUS.

Payment at maturity: If the Trigger PLUS have not been automatically redeemed prior to maturity and:
 If the final index value is greater than the initial index value, for each \$1,000 stated principal amount Trigger PLUS:
 \$1,000 + leveraged upside payment
 If the final index value is less than or equal to the initial index value but is greater than or equal to the trigger level, for each \$1,000 stated principal amount Trigger PLUS:
 \$1,000 + (\$1,000 × absolute index return)

In this scenario, you will receive a 1% positive return on the Trigger PLUS for each 1% negative return on the underlying index. In no event will this amount exceed the stated principal amount plus \$200.00. Accordingly, the maximum downside payment at maturity is \$1,200.00 per Trigger PLUS.

If the final index value is less than the trigger level, for each \$1,000 stated principal amount Trigger PLUS:
 \$1,000 × index performance factor
This amount will be less than the stated principal amount of \$1,000 per Trigger PLUS and will represent a loss of more than 20%, and possibly all, of your investment.

Leveraged upside payment: \$1,000 × leverage factor × index percent change

Index percent change: (final index value – initial index value) / initial index value

Absolute index return: The absolute value of the index percent change. For example, a -5% index percent change will result in a +5% absolute index return.

Initial index value: The closing level of the underlying index on the pricing date

Final index value: The closing level of the underlying index on the valuation date

Trigger level: 80% of the initial index value

Leverage factor: 125%

Index performance factor: final index value / initial index value

Stated principal amount: \$1,000 per Trigger PLUS

Issue price: \$1,000 per Trigger PLUS

Pricing date: Expected to be March 15, 2024

Original issue date (settlement date): 3 business days after the pricing date

Redemption observation date†: March 24, 2025

Redemption date†: March 27, 2025

Valuation date†: March 31, 2026

Maturity date†: April 6, 2026

CUSIP / ISIN: 48134WTN7 / US48134WTN73
