## Structured Investments

JPMorgan Chase & Co.

\$

## Buffered Return Enhanced Notes Linked to the FTSE™ 100 Index due September 10, 2008

### General

- The notes are designed for investors who seek a return of twice the appreciation of the FTSE™ 100 Index up to a maximum total return on the notes of 15.20%\* at maturity. Investors should be willing to forgo interest and dividend payments and, if the Index declines by more than 10%, be willing to lose some or all of their principal.
- Senior unsecured obligations of JPMorgan Chase & Co. maturing September 10, 2008<sup>†</sup>.
- Minimum denominations of \$50,000 and integral multiples of \$1,000 in excess thereof.
- The terms of the notes as set forth in “Key Terms” below, to the extent they differ from or conflict with those set forth in the accompanying product supplement no. 54-IV, shall supersede the terms set forth in product supplement no. 54-IV.
- The notes are expected to price on or about June 1, 2007<sup>††</sup> and are expected to settle on or about June 6, 2007.

| Index:                                | The FTSE™ 100 Index (the “Index”)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Upside Leverage Factor:               | 2                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Payment at Maturity:                  | <p>If the FTSE Closing Level is greater than the FTSE Starting Level, you will receive a cash payment that provides you with a return per \$1,000 principal amount note equal to the FTSE Return multiplied by two, subject to a Maximum Total Return on the notes of 15.20%*. For example, if the FTSE Return is more than 7.60%, you will receive the Maximum Total Return on the notes of 15.20%*, which entitles you to a maximum payment at maturity of \$1,152 for every \$1,000 principal amount note that you hold. Accordingly, if the FTSE Return is positive, your payment per \$1,000 principal amount note will be calculated as follows, subject to the Maximum Total Return:</p> $\$1,000 + [\$1,000 \times (\text{FTSE Return} \times 2)]$ <p>*The actual Maximum Total Return on the notes will be set on the pricing date and will not be less than 15.20%.</p> <p>Your principal is protected against up to a 10% decline of the Index at maturity. If the FTSE Closing Level declines from the FTSE Starting Level by up to 10%, you will receive the principal amount of your notes at maturity.</p> <p>If the FTSE Closing Level declines from the FTSE Starting Level by more than 10%, you will lose 1.1111% of the principal amount of your notes for every 1% that the Index declines beyond 10% and your final payment per \$1,000 principal amount note will be calculated as follows:</p> $\$1,000 + [\$1,000 \times (\text{FTSE Return} + 10\%) \times 1.1111]$ <p><i>You will lose some or all of your investment at maturity if the FTSE Closing Level declines from the FTSE Starting Level by more than 10%.</i></p> |
| Buffer Amount:                        | 10%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| CUSIP:                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

<sup>†</sup> Subject to postponement in the event of a market disruption event and as described under “Description of Notes — Payment at Maturity” in the accompanying product supplement no. 54-IV.

<sup>††</sup> The pricing of the notes is subject to our special tax counsel delivering to us their opinion as described under “Selected Purchase Considerations — Capital Gains Tax Treatment.”

**Investing in the Buffered Return Enhanced Notes involves a number of risks. See “Risk Factors” beginning on page PS-11 of the accompanying product supplement no. 54-IV and “Selected Risk Considerations” beginning on page TS-3 of this term sheet.**

JPMorgan Chase & Co. has filed a registration statement (including a prospectus) with the Securities and Exchange Commission, or SEC, for the offering to which this term sheet relates. Before you invest, you should read the prospectus in that registration statement and the other documents relating to this offering that JPMorgan Chase & Co. has filed with the SEC for more complete information about JPMorgan Chase & Co. and this offering. You may get these documents without cost by visiting EDGAR on the SEC website at [www.sec.gov](http://www.sec.gov). Alternatively, JPMorgan Chase & Co., any agent or any dealer participating in this offering will arrange to send you the prospectus, each prospectus supplement, product supplement no. 54-IV and this term sheet if you so request by calling toll-free 866-535-9248.

You may revoke your offer to purchase the notes at any time prior to the time at which we accept such offer by notifying the applicable agent. We reserve the right to change the terms of, or reject any offer to purchase the notes prior to their issuance. In the event of any changes to the terms of the notes, we will notify you and you will be asked to accept such changes in connection with your purchase. You may also choose to reject such changes in which case we may reject your offer to purchase.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of the notes or passed upon the accuracy or the adequacy of this term sheet or the accompanying prospectus supplements and prospectus. Any representation to the contrary is a criminal offense.

### ADDITIONAL TERMS SPECIFIC TO THE NOTES

You should read this term sheet together with the prospectus dated December 1, 2005, as supplemented by the prospectus supplement dated December 1, 2005 relating to our Series E medium-term notes of which these notes are a part, and the more detailed information contained in product supplement no. 54-IV dated May 4, 2007. **This term sheet, together with the documents listed below, contains the terms of the notes and supersedes all other prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, fact sheets, brochures or other educational materials of ours.** You should carefully consider, among other things, the matters set forth in "Risk Factors" in the accompanying product supplement no. 54-IV, as the notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisers before you invest in the notes.

You may access these documents on the SEC website at [www.sec.gov](http://www.sec.gov) as follows (or if such address has changed, by reviewing our filings for the relevant date on the SEC website):

- Product supplement no. 54-IV dated May 4, 2007:

- Prospectus dated December 1, 2005:  
[http://www.sec.gov/Archives/edgar/data/19617/000089109205002389/e22923\\_base.txt](http://www.sec.gov/Archives/edgar/data/19617/000089109205002389/e22923_base.txt)

Our Central Index Key, or CIK, on the SEC website is 19617. As used in this term sheet, the "Company," "we," "us," or "our" refers to JPMorgan Chase & Co.

### What Is the Total Return on the Notes at Maturity Assuming a Range of Performance for the Index?

The following table and graph illustrate the hypothetical total return at maturity on the notes. The "total return" as used in this term sheet is the number, expressed as a percentage, that results from comparing the payment at maturity per \$1,000 principal amount note to \$1,000. The hypothetical total returns set forth below assume a FTSE Starting Level of 6600 and a Maximum Total Return on the notes of 15.20%. The hypothetical total returns set forth below are for illustrative purposes only and may not be the actual total returns applicable to a purchaser of the notes. The numbers appearing in the following table, graph and examples have been rounded for ease of analysis.

| FTSE Closing Level | FTSE Return | Total Return |
|--------------------|-------------|--------------|
| 11880.00           | 80.00%      | 15.20%       |
| 10890.00           | 65.00%      | 15.20%       |
| 9900.00            | 50.00%      | 15.20%       |
| 9240.00            | 40.00%      | 15.20%       |
| 8250.00            | 25.00%      | 15.20%       |
| 7260.00            | 10.00%      | 15.20%       |

|                |              |              |
|----------------|--------------|--------------|
| 7101.60        | 7.60%        | 15.20%       |
| 6930.00        | 5.00%        | 10.00%       |
| 6765.00        | 2.50%        | 5.00%        |
| 6666.00        | 1.00%        | 2.00%        |
| <b>6600.00</b> | <b>0.00%</b> | <b>0.00%</b> |
| 6270.00        | -5.00%       | <b>0.00%</b> |
| 5940.00        | -10.00%      | <b>0.00%</b> |
| 5280.00        | -20.00%      | -11.11%      |
| 4620.00        | -30.00%      | -22.22%      |
| 3960.00        | -40.00%      | -33.33%      |
| 3300.00        | -50.00%      | -44.44%      |
| 2640.00        | -60.00%      | -55.56%      |
| 1980.00        | -70.00%      | -66.67%      |
| 1320.00        | -80.00%      | -77.78%      |
| 660.00         | -90.00%      | -88.89%      |
| 0              | -100.00%     | -100.00%     |

### Hypothetical Examples of Amounts Payable at Maturity

The following examples illustrate how the total returns set forth in the table and graph above are calculated.

**Example 1: The level of the Index increases from the FTSE Starting Level of 6600 to a FTSE Closing Level of 6930.** Because the FTSE Closing Level of 6930 is greater than the FTSE Starting Level of 6600 and the FTSE Return of 5% multiplied by 2 does not exceed the hypothetical Maximum Total Return of 15.20%, the investor receives a payment at maturity of \$1,100 per \$1,000 principal amount note, calculated as follows:

$$\$1,000 + [\$1,000 \times (5\% \times 2)] = \$1,100$$

**Example 2: The level of the Index decreases from the FTSE Starting Level of 6600 to a FTSE Closing Level of 5940.** Because the FTSE Closing Level of 5940 is less than the FTSE Starting Level of 6600 by not more than the Buffer Amount of 10%, the investor will receive a payment at maturity of \$1,000 per \$1,000 principal amount note.

**Example 3: The level of the Index increases from the FTSE Starting Level of 6600 to a FTSE Closing Level of 8250.** Because the FTSE Closing Level of 8250 is greater than the FTSE Starting Level of 6600 and the FTSE Return of 25% multiplied by 2 exceeds the hypothetical Maximum Total Return of 15.20%, the investor receives a payment at maturity of \$1,152 per \$1,000 principal amount note, the maximum payment on the notes.

**Example 4: The level of the Index decreases from the FTSE Starting Level of 6600 to a FTSE Closing Level of 5280.** Because the FTSE Closing Level of 5280 is less than the FTSE Starting Level of 6600 by more than the Buffer Amount of 10%, the FTSE Return is negative and the investor receives a payment at maturity of \$888.89 per \$1,000 principal amount note, calculated as follows:

$$\$1,000 + [\$1,000 \times (-20\% + 10\%) \times 1.1111] = \$888.89$$

### Selected Purchase Considerations

- **APPRECIATION POTENTIAL** — The notes provide the opportunity to enhance equity returns by multiplying a positive FTSE Return by two, up to the Maximum Total Return on the notes of 15.20%, or \$1,152 for every \$1,000 principal amount note. The actual Maximum Total Return on the notes will be set on the pricing date and will not be less than 15.20%. Because the notes are our senior unsecured obligations, payment of any amount at maturity is subject to our ability to pay our obligations as they become due.
- **LIMITED PROTECTION AGAINST LOSS** — Payment at maturity of the principal amount of the notes is protected against a decline in the FTSE Closing Level, as compared to the FTSE Starting Level, of up to 10%. If the FTSE Closing Level declines by more than 10%, for every 1% decline of the Index beyond 10%, you will lose an amount equal to 1.1111% of the principal amount of your notes.

- **DIVERSIFICATION AMONG EUROPEAN EQUITIES OF THE FTSE™ 100 INDEX** — The return on the notes is linked to the FTSE™ 100 Index. The FTSE™ 100 Index measures the composite price performance of stocks of the largest 100 companies (determined on the basis of market capitalization) traded on the London Stock Exchange. For additional information about the Index, see the information set forth under “The FTSE™ 100 Index” in the accompanying product supplement no. 54-IV.
- **CAPITAL GAINS TAX TREATMENT** — You should review carefully the section entitled “Certain U.S. Federal Income Tax Consequences” in the accompanying product supplement no. 54-IV. The pricing of the notes is subject to delivery of an opinion of our special tax counsel, Davis Polk & Wardwell, that it is reasonable to treat your purchase and ownership of the notes as an “open transaction” for U.S. federal income tax purposes. The opinion will be subject to the limitations described in the section entitled “Certain U.S. Federal Income Tax Consequences” in product supplement no. 54-IV and will be based on certain factual representations to be received from us on or prior to the pricing date. Assuming this characterization is respected, your gain or loss on the notes should be treated as long-term capital gain or loss if you hold the notes for more than a year, whether or not you are an initial purchaser of notes at the issue price. However, the Internal Revenue Service or a court may not respect this characterization or treatment of the notes, in which case the timing and character of any income or loss on the notes could be significantly and adversely affected. You should consult your tax adviser regarding the treatment of the notes, including possible alternative characterizations.

## Selected Risk Considerations

An investment in the notes involves significant risks. Investing in the notes is not equivalent to investing directly in the Index or any of the component stocks of the Index. These risks are explained in more detail in the “Risk Factors” section of the accompanying product supplement no. 54-IV dated May 4, 2007.

- **YOUR INVESTMENT IN THE NOTES MAY RESULT IN A LOSS** — The notes do not guarantee any return of principal. The return on the notes at maturity is linked to the performance of the Index and will depend on whether, and the extent to which, the FTSE Return is positive or negative. Your investment will be exposed on a leveraged basis to any decline in the FTSE Closing Level beyond the 10% buffer as compared to the FTSE Starting Level.
- **YOUR MAXIMUM GAIN ON THE NOTES IS LIMITED TO THE MAXIMUM TOTAL RETURN** — If the FTSE Closing Level is greater than the FTSE Starting Level, for each \$1,000 principal amount note, you will receive at maturity \$1,000 plus an additional amount that will not exceed a predetermined percentage of the principal amount, regardless of the appreciation in the Index, which may be significant. We refer to this percentage as the Maximum Total Return, which will be set on the pricing date and will not be less than 15.20%.
- **CERTAIN BUILT-IN COSTS ARE LIKELY TO ADVERSELY AFFECT THE VALUE OF THE NOTES PRIOR TO MATURITY** — While the payment at maturity described in this term sheet is based on the full principal amount of your notes, the original issue price of the notes includes the agent’s commission and the cost of hedging our obligations under the notes through one or more of our affiliates. As a result, the price, if any, at which J.P. Morgan Securities Inc., whom we refer to as JPMSI, will be willing to purchase notes from you in secondary market transactions will likely be lower than the original issue price, and any sale prior to the maturity date could result in a substantial loss to you. The notes are not designed to be short-term trading instruments. Accordingly, you should be able and willing to hold your notes to maturity.
- **NO DIRECT EXPOSURE TO FLUCTUATIONS IN FOREIGN EXCHANGE RATES** — The value of your notes will not be adjusted for exchange rate fluctuations between the U.S. dollar and the currencies in which the stocks composing the Index are denominated, although any currency fluctuations could affect the performance of the Index. Therefore, if the applicable currencies appreciate or depreciate relative to the U.S. dollar over the term of the notes, you will not receive any additional payment or incur any reduction in your payment at maturity.
- **NO INTEREST OR DIVIDEND PAYMENTS OR VOTING RIGHTS** — As a holder of the notes, you will not receive interest payments, and you will not have voting rights or rights to receive cash dividends or other distributions or other rights that holders of securities composing the FTSE™ 100 Index would have.
- **LACK OF LIQUIDITY** — The notes will not be listed on any securities exchange. JPMSI intends to offer to purchase the notes in the secondary market but is not required to do so. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the notes easily. Because other dealers are not likely to make a secondary market for the notes, the price at which you may be able to trade your notes is likely to depend on the price, if any, at which JPMSI is willing to buy the notes.
- **POTENTIAL CONFLICTS** — We and our affiliates play a variety of roles in connection with the issuance of the notes, including acting as calculation agent and hedging our obligations under the notes. In performing these duties, the economic interests of the calculation agent and other affiliates of ours are potentially adverse to your interests as an investor in the notes.
- **MANY ECONOMIC AND MARKET FACTORS WILL IMPACT THE VALUE OF THE NOTES** — In addition to the level of the Index on any day, the value of the notes will be affected by a number of economic and market factors that may either offset or magnify each other, including:
  - the expected volatility of the Index;
  - the time to maturity of the notes;
  - the dividend rate on the common stocks underlying the Index;
  - interest and yield rates in the market generally;
  - a variety of economic, financial, political, regulatory or judicial events;
  - the exchange rate and the volatility of the exchange rate between the U.S. dollar and the U.K. pound; and
  - our creditworthiness, including actual or anticipated downgrades in our credit ratings.
- **THE OFFERING OF THE NOTES MAY BE TERMINATED BEFORE PRICING** — This term sheet has not been reviewed by our special tax counsel, Davis Polk & Wardwell, and the pricing of the offering of the notes is subject to delivery by them of an opinion regarding the tax treatment of the notes as described under “Selected Purchase Considerations — Capital Gains Tax Treatment” above. If our special tax counsel does not deliver this opinion prior to pricing, the offering of the notes will be terminated.

The following graph sets forth the historical performance of the Index based on the weekly Index closing level, from January 4, 2002 through May 18, 2007. The Index closing level on May 24, 2007 was 6565.40. We obtained the Index closing levels below from Bloomberg Financial Markets. We make no representation or warranty as to the accuracy or completeness of the information obtained from Bloomberg Financial Markets.

The historical levels of the Index should not be taken as an indication of future performance, and no assurance can be given as to the Index closing level on any of the Ending Averaging Dates. We cannot give you assurance that the performance of the Index will result in the return of any of your initial investment.

#### Supplemental Underwriting Information

JPMSI, acting as agent for JPMorgan Chase & Co., will receive a commission that will depend on market conditions on the pricing date. In no event will that commission, which includes structuring and development fees, exceed \$17.50 per \$1,000 principal amount note. See “Underwriting” beginning on page PS-125 of the accompanying product supplement no. 54-IV.

For a different portion of the notes to be sold in this offering, an affiliated bank will receive a fee and another affiliate will receive a structuring and development fee. In no event will the total amount of these fees exceed \$17.50 per \$1,000 principal amount note.
