Hypothetical Payout Profile (Maturity Payment Amount)

If the securities are not automatically called prior to maturity and the ending price is less than the threshold price, you will lose more than 50%, and possibly all, of the principal amount of your securities at maturity. Any return on the securities will be limited to the sum of your contingent coupon payments, if any. You will not participate in any appreciation of the Underlying Stock, but you will have full downside exposure to the Underlying Stock on the final calculation day if the ending price is less than the threshold price. The securities are unsecured and unsubordinated obligations of JPMorgan Chase Financial Company LLC, which we refer to as JPMorgan Financial, the payment on which is fully and unconditionally guaranteed by JPMorgan Chase & Co. Any payment on the securities is subject to the credit risk of JPMorgan Financial, as issuer of the securities, and the credit risk of JPMorgan Chase & Co., as guarantor of the securities. If the securities priced on the date of the accompanying preliminary pricing supplement, the estimated value of the securities would be approximately \$947.50 per security. The estimated value of the securities, when the terms of the securities are set, will be provided in the pricing supplement and will not be less than \$910.00 per security. See "The Estimated Value of the Securities" in the preliminary pricing supplement for additional information. See "Risk Factors" in the accompanying prospectus supplement and the accompanying product supplement and "Selected Risk Considerations" in the accompanying preliminary pricing supplement. The securities are not bank deposits, are not insured by the Federal Deposit Insurance Corporation or any other governmental agency and are not obligations of, or guaranteed by, a bank.
